Introduction

The sub-funds of MGI Funds plc (the "Sub-Funds") (the "Company") are managed using a proprietary manager of managers or fund of funds investment strategy. This strategy involves allocating some or all of the assets of a Sub-Fund to specialist investment managers or sub-advisors ("Sub-Investment Managers") or investing in pooled funds, which are selected by Mercer Global Investments Europe Limited (the "Investment Manager"), under authority from Mercer Global Investments Management Limited (the "Manager"), based on criteria for producing consistent superior returns and which, in aggregate, are considered most likely to achieve the overall objectives of the given Sub-Fund.

Q3 2025

In Q3, markets were driven by resilient economic growth. Economic resilience shone through in the US with growth surpassing expectations, even as the labour market softened. The US Federal Reserve reduced its rate by 25bps. The European Central Bank left rates unchanged, with Germany's fiscal stimulus supporting the growth story. Political developments in France stirred some volatility over the quarter.

Global equities rose due to easing trade tensions, sustained enthusiasm for Artificial Intelligence (AI) and growing expectations of interest rate cuts by the US Federal Reserve. Emerging markets outperformed developed markets, led by the Chinese market, which was supported by the extension of the US-China trade truce and strong optimism around AI. As per Q2 2025, gains were recorded across most sectors and regions over Q3, with new all-time highs recorded in many major market indices. Government bond yields were higher across the curve for most major economies, except for the US, where yields declined across the curve in anticipation of US Federal Reserve rate cuts. UK and German yields were higher as political uncertainty and concerns over fiscal prudence weighed on bonds. Credit spreads narrowed further, although the pace of narrowing slowed. Commodity prices increased during the quarter, led by precious metals.

Q4 2025

Economic resilience and ongoing AI-led optimism drove financial markets, despite uncertainty driven by regional politics. While some developed market central banks continued cutting rates, the narrative of a sharp slowdown was brushed aside, supported by abating risks from tariffs and trade. The US Federal Reserve reduced its policy rate amidst a weakening labour market and cooling inflation. In Europe, political upheaval in France and German fiscal stimulus largely dominated market sentiments, and the European Central Bank left rates unchanged.

Global equity markets rose, supported by robust earnings, easing inflation, and anticipation of lower interest rates. However, concerns over stretched tech and AI stock valuations persisted throughout the quarter. Within equities, emerging markets outperformed developed markets, with dollar weakness helping to support emerging market currencies. The tariff truce between China and the US continued to ease geopolitical tensions. Meanwhile, China's emphasis on AI and its drive for technological self-reliance bolstered its equity market. Government bond yields showed a mixed trend across economies in Q4. In the US, the yield curve steepened, with a drop in 2-year yields and slight increases at the longer end. German bond yields were higher across the curve, while the UK's 10-year gilt yield fell. Commodity prices rose during the quarter, driven mainly by industrial and precious metals.

Q1 2026

Economic optimism was offset by geopolitical tensions. The Iran war led to a sharp spike in energy prices, which increased inflation expectations and stoked fears of other second-round effects. This resulted in a hawkish repricing of central banks' interest rates, although developed market central banks left their key policy rates unchanged over Q1.

Global equities finished Q1 2026 lower due to the geopolitical uncertainty in the Middle East, increasing oil prices, rising interest rate expectations, and a rotation out of AI exposed tech stocks, which drove a risk-off sentiment in the markets. Within equities, emerging markets outperformed developed markets. Government bond yields rose across the curve globally, with a flattening bias as short-term yields increased more than longer-term yields, reflecting hawkish central bank signals and inflation concerns tied to energy shocks and supply chain disruptions. Commodity prices rose during the quarter, led by energy after Iran's closure of the Strait of Hormuz, which also pushed up foodgrains and industrial metals prices. Gold prices, however, saw increased volatility and fell from historic highs.

Q2 2026

Financial markets were driven by three main themes: geopolitical volatility, AI-led capex boom and scaling back of the hawkish central bank pricing witnessed earlier in the year. In Q2, the US Federal Reserve and Bank of England kept rates unchanged, while the European Central Bank and Bank of Japan each raised rates by 25bps.

Global equities rose over Q2, supported by improving geopolitical sentiment, resilient earnings, and continued AI-driven optimism. Emerging markets, particularly emerging Asia, outperformed developed markets, though gains remained concentrated in technology- and AI-sensitive sectors. Global government bond yields showed a diverging trend across economies. US yields rose, while Euro area and UK yields fell as growth slowed and interest rate expectations turned more dovish. Commodity prices fell, with performance dominated by sharp swings in energy markets. Outside energy, structural demand trends supported industrial metals, while precious metals weakened as safe-haven demand faded.

Overall

In terms of the main asset classes, performance over the past year was as follows:

- Developed market equities delivered strong positive returns overall, supported by resilient growth, AI-driven optimism and easing trade tensions, despite periods of geopolitical volatility and interest rate uncertainty.
- Emerging market equities delivered particularly strong returns, outperforming developed markets, driven by strength in China and emerging Asia, supported by the US-China trade truce, AI enthusiasm, and periods of US dollar weakness.
- Bond markets generally saw positive returns overall, with global high yield and emerging market debt the top performers, despite shifting central bank expectations and geopolitical shocks driving volatility in yields.
- LDI funds are key building blocks of pension fund risk management. By using derivatives, LDI funds provide leveraged exposure to liability matching assets (primarily bonds or gilts) for pension scheme investors. These derivatives allow investors to hedge high proportions of their funded liabilities efficiently whilst still retaining a meaningful allocation to growth assets. LDI returns varied significantly depending on the exposure provided.
- Multi-asset fund returns were positive over the period, driven mainly by strong equity performance, although fixed income exposures also boosted returns.

MGI Funds plc Overview

All performance figures shown below refers to the representative share class and are calculated by the Investment Manager using pricing from State Street Fund Services (Ireland) Limited (the "Administrator"). Figures shown are gross of the Management Fee, net of Sub-Investment Managers' fees and of all other expenses including custody and administration costs depending on the structure of the Sub-Fund, unless otherwise indicated.

There are three different scenarios where Sub-Fund performance may be driven by or compared to an index or benchmark:

- Passive index-tracking Sub-Funds will aim to track the performance of a specific market index ("Benchmark").
- Actively managed Sub-Funds may aim to outperform a specific benchmark/index.
- A Sub-Fund may choose to use a certain benchmark/index for performance comparison purposes only.

Share Class Investment Performance to 30 June 2026 (EUR)

Sub-Fund Name	Performance over the Financial Year	
	Sub-Fund (%)	Benchmark (%)
Mercer European Equity Fund *The Sub-Fund:* • *Uses the MSCI Europe ex UK Net Tax Total Return Index (EUR), unhedged as an outperformance target.* • *Underperformed the benchmark by 4.0% over the last year.*	18.5	22.5

Market Outlook

We are relatively constructive on the outlook for the global economy. Countries exposed to the AI supercycle, including the US and parts of Asia, could do particularly well. We expect healthy growth rates in the US, Japan and some emerging markets, but growth could be sub-trend elsewhere. In the US, we expect trend-rate growth and see risks to the upside, supported by AI-led capital expenditure, resilient consumption and supportive fiscal policy, although higher inflation, the falling household savings rate, and geopolitical risks pose downside risks. In contrast, growth in the Euro area and the UK is likely to remain below trend this year, as higher energy costs, weak sentiment and tightening financial conditions constrain demand. Japan is expected to grow above trend, supported by strong domestic demand, positive real wage growth and private investment. In China, we believe growth should accelerate in the second half of 2026, based on expectations of resilient export growth (led by AI exports) and faster fiscal deployment. However, we expect consumption to remain weak. Growth across emerging markets ex-China should remain relatively resilient for the rest of the year at around trend levels. Growth is likely to be stronger in countries with high exposure to AI, such as Taiwan and Korea.

The Middle East conflict caused a surge in the global energy price, driving headline inflation higher. This energy-driven surge in inflation should fade over the year, although the recent hostilities in the Middle East could slow the disinflation process. Headline inflation is expected to be above target in most countries this year. However, medium-term inflation expectations are anchored and the risk of passthrough from higher inflation to wage growth is limited for most economies at this stage. In the US, both headline and underlying inflation are expected to remain above the Federal Reserve's target this year, reflecting AI-related demand and some tariff related passthrough, although stable wage growth and an improving labour market should limit second-round effects. In the Euro area and the UK, headline inflation is also likely to remain above target this year, but second-round effects are likely to be muted, particularly in the UK as the labour market is weak. In Japan, headline and core inflation are expected to exceed the Bank of Japan's 2% target in the second half of 2026, with risks to the upside given expansionary fiscal policy, the weaker Japanese yen and secondary effects of the geopolitical-driven price shocks on wages. In China, inflation is likely to remain subdued due to weak domestic demand. Across emerging markets ex-China, inflation is likely to move toward the upper end of central bank target ranges, led by higher energy, food and transportation prices, although most Asian economies appear relatively well placed to weather the one-off inflationary spike.

Decent growth and above target inflation create upside risks for most central banks. The neutral rate is likely higher than thought, driven by demand for AI-capex. But we think the global hiking cycle will be mild and that there is less pressure for central banks to hike outside of the US. This is because our base case is that second-round effects stay contained as labour markets are soft and elevated energy costs need not translate directly into wage acceleration.

We view equities as attractive because we believe that earnings growth could be strong. While valuations are rich, they are less worrying when strong earnings growth is considered. Furthermore, we think AI is a transformational technology and can have a sizeable impact on profits. We are optimistic on government bonds outside of the US and have a positive stance on UK gilts and Japanese Government Bonds. We are neutral on credit overall, but positive on Asia high yield, hard-currency emerging-market debt and Frontier Market Debt. In currencies, we are positive on emerging market currencies and the Japanese yen against the Euro and British pound, while broadly neutral on the US dollar. We maintain our neutral stance on broad commodities.

Benchmark Tracking Error Appendix

Sub-Fund	Sub-Fund return for the year	Benchmark return for the year	Tracking difference	Tracking difference explanation	Anticipated tracking error	Realised tracking error	Tracking error explanation
MGI Passive Euro Bond Fund	1.70%	1.71%	(0.01%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.04%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
MGI Passive UK Inflation Linked Bond Fund	1.82%	1.84%	(0.02%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.13%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
MGI Passive UK Long Gilt Fund	1.22%	1.28%	(0.07%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.08%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Short Dated UK Gilt Fund	3.04%	3.09%	(0.05%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.06%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive US Treasury 1-3 Year Bond Fund	3.02%	2.94%	0.08%	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.10%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive US Treasury 3-7 Year Bond Fund	2.44%	2.36%	0.08%	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.20%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.

Benchmark Tracking Error Appendix (continued)

Sub-Fund	Sub-Fund return for the year	Benchmark return for the year	Tracking difference	Tracking difference explanation	Anticipated tracking error	Realised tracking error	Tracking error explanation
Mercer Passive Emerging Markets Equity Fund	45.04%	44.21%	0.83%	Fund performance has deviated from the index over the year primarily due to unrealised gains from Indian assets. This was due to reduction in the accrual of Capital Gains Tax (CGT) on the unrealised gains of Indian assets within the portfolio. The accrual of CGT within the fund accounting aims to buffer investors from the sudden impact of any future CGT payments due on the sale of these assets i.e. the future tax payment is priced into the Net Asset Value (NAV) on a daily basis.	0.50%	0.43%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Global Equity Fund	21.33%	21.32%	0.01%	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.05%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Euro Corporate Bond Fund	2.59%	2.55%	0.03%	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.11%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Global High Yield Bond fund	5.04%	4.62%	0.43%	The positive deviation from the benchmark over the one-year period can mainly be attributed to efficient trading by the underlying sub-IM and transaction costs being lower than anticipated.	0.50%	0.25%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Sustainable Global Equity Feeder Fund*	16.96%	16.95%	0.00%	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.07%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Global REITS Feeder Fund*	14.58%	14.80%	(0.22%)	The performance of the feeder fund slightly deviated from the benchmark over the period, this was driven by a combination of the impact of large investor flows and the performance of the equitisation mandate.	0.50%	0.22%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.

Benchmark Tracking Error Appendix (continued)

Sub-Fund	Sub-Fund return for the year	Benchmark return for the year	Tracking difference	Tracking difference explanation	Anticipated tracking error	Realised tracking error	Tracking error explanation
Mercer Passive Low Volatility Equity Feeder Fund*	4.52%	4.43%	0.10%	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.15%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Euro Over 5 Year Bond UCITS Fund	1.04%	1.06%	(0.02%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.05%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Universal Global Equity Fund	24.31%	24.27%	0.04%	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.04%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.
Mercer Passive Climate Transition Listed Infrastructure Feeder Fund*	11.52%	11.62%	(0.10%)	The Sub-Fund performance over the year was in line with expectations and close to the Index performance before costs (Total Expense Ratio (the "TER"))	0.50%	0.12%	The Sub-Fund has tracked its benchmark index within its anticipated tracking error.

* For these UCITS feeder funds, which are substantially invested in underlying master UCITS which passively track a benchmark, the tracking difference and tracking error information is for additional transparency. As UCITS feeders, these Sub-Funds do not directly track a benchmark but rather are substantially invested in an underlying index tracking master UCITS. Performance versus that master UCITS benchmark is reported herein for transparency to investors. Direct performance information in relation to the corresponding master UCITS, being sub-funds of Mercer UCITS CCF, is available in the Mercer UCITS CCF annual report, which can be requested from the Manager.

The figures reported are based on the base currency of the Sub-Fund where available, otherwise it will use the currency of Unit Class with the longest history if base currency is not available. If Sub-Funds were launched during the year, figures in the table above are reported from the Sub-Fund's launch date.

Tracking difference measures the extent to which a product's return differs from that of its benchmark index. Tracking error indicates how much variability exists among the individual data points that make up the Sub-Fund's average tracking difference to the benchmark.

The above realised tracking error is calculated monthly over one year or since inception if the Sub-Fund launched within the period under review.

The Directors have the pleasure of submitting their report to the Shareholders together with the audited financial statements for the financial year ended 30 June 2026.

Principal Activities

MGI Funds plc (the "Company") is an open-ended umbrella fund investment company with variable capital with segregated liability between Sub-Funds. The share capital of the Company is divided into different series of shares with each series of shares representing a portfolio of assets which comprises a separate fund (each a "Sub-Fund"). The Company is authorised and regulated by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended from time to time, (the "UCITS Regulations") and the Central Bank's (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2026, as amended from time to time, (the "Central Bank UCITS Regulations").

As at 30 June 2026, the Company consisted of eighty-one (30 June 2025: seventy-five) Sub-Funds of which sixty-six are active (30 June 2025: fifty-seven), seven are authorised but not launched (30 June 2025: thirteen), eight are terminated but not de-authorised at the financial year end (30 June 2025: five).

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Report of the Directors and financial statements, in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law, they have elected to prepare the financial statements in accordance with International Financial Reporting Standards ("IFRS") Accounting Standards as adopted by the European Union ("EU") and applicable law.

Under Company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company as at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for ensuring that the Company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy, ensuring that the financial statements and the Report of the Directors comply with the Companies Act 2014 and with the UCITS Regulations and the Central Bank UCITS Regulations and enable the financial statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Compliance on Corporate Governance Code

The Company has adopted in full the voluntary Code of Corporate Governance (the "Corporate Governance Code") for Collective Investment Schemes ("CIS") and Management Companies issued by the Irish Funds ("IF"), the text of which is available from the IF website, www.irishfunds.ie.

The Company has been in compliance with the Corporate Governance Code during the financial year ended 30 June 2026.

Directors

The Directors, who held office on 30 June 2026 as stated below, are not required to retire by rotation under the Memorandum and Articles of Association.

Directors

The Directors are:

Name	Director Status	Nationality	Date of Appointment
Gráinne Alexander	Independent non-executive	Irish	1 Jan 2019
Helen O'Beirne	Non-executive	Irish	13 Jan 2020
Liam Miley	Independent non-executive	Irish	13 May 2020
Carmel Jordan	Non-executive	Irish	31 May 2020
Susan Dargan	Independent non-executive	Irish	1 Nov 2023
James Furlong	Non-executive	Irish	15 May 2024
Michael Aherne	Non-executive	Irish	1 Jul 2024

Directors' fees (including expenses) for the financial year are stated in Note 4 to the financial statements.

Changes in Directorships
There were no changes in Directorships during the financial year ended 30 June 2026.

Transactions involving Directors:
The Board of Directors (the "Board") are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest as defined in the Companies Act 2014, at any time during the financial year ended 30 June 2026 (30 June 2025: Nil), other than those disclosed in Note 4 to the financial statements.

Directors' & Secretary's Interests

None of the Directors nor the Secretary, who held office at 30 June 2026, or their families, held any interest in the shares of the Company at any time during the financial year ended 30 June 2026 (30 June 2025: Nil).

Audit Committee

The Company has established an Audit Committee with responsibility for monitoring the financial reporting process; monitoring the effectiveness of the Company's systems of internal control, internal audit and risk management, monitoring the statutory auditors, including oversight of any additional services provided to the Company by the auditors.

Employees

For details of identified staff of the Manager, as defined by regulations, the MGIM Remuneration Policy is available via the following link https://investment-solutions.mercer.com/global/all/en/investment-solutions-home/corporate-policies.html as well as page 356-357.

Transactions with connected parties

Regulation 46 of the Central Bank UCITS Regulations *"Restrictions on transactions with connected parties"* states that *"A responsible person shall ensure that any transaction between a UCITS and a connected party is a) conducted at arm's length, and b) in the best interests of the unitholders of the UCITS".*

As required under the Central Bank UCITS Regulation 84.4, the Board of Directors is satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 46(1) are applied to all transactions with a connected party; and all transactions with connected party that were entered into during the year to which the report relates, complied with the obligations that are prescribed by Regulation 46(1).

UK Reporting Status

The Company has received confirmation from HM Revenue & Customs ("HMRC") in the United Kingdom ("UK") that the Sub-Funds listed in the table below, have been granted reporting fund status for UK tax purposes from the effective dates listed below.

Sub-Fund	Share Class	Reporting Fund Regime Effective Date

Business Review, Results and Future Developments

The business of the Company is reviewed in detail in the Investment Manager's Report. The results for the financial year are stated in the Statement of Comprehensive Income. The Company will continue to act as an investment vehicle as set out in its Memorandum and Articles of Association. The analysis of the Company's key performance indicators ("KPI's") are contained in the Investment Manager's Report. The Board does not anticipate any significant change in the structure or investment objectives of the Sub-Funds.

Going Concern

The financial statements of the Company have been prepared on a going concern basis as it has been determined that the Company can continue in operational existence for at least twelve months from the date of approval of these financial statements (the period of assessment). The assessment is completed at Company level by the Directors and takes multiple factors into account including Sub-Fund size, Net Asset Value ("NAV") movements and new Sub-Fund launches and terminations.

Principal Risks and Uncertainties

The principal risks and uncertainties faced by the Company are credit risk, currency risk, interest rate risk, liquidity risk and market price risk which are outlined in Note 9 to the financial statements.

Share Capital

The net assets under management are disclosed in the Statement of Financial Position.

Full details of the Company's share capital, including changes during the financial year under review and significant Shareholders are disclosed in Note 12 to the financial statements.

Distributions

Details of distributions declared and paid during the financial year ended 30 June 2026 and 30 June 2025 are disclosed in Note 13 to the financial statements.

Responsible Investment

Over the past few years, the EU has been building a sustainable finance framework, to better support the financing of sustainable economic activities, and to support the transition to a carbon neutral economy by 2050. Regulation surrounding financial products and market participants has developed with the aim to improve transparency and availability of environmental, social and governance ("ESG") related information for investors.

The Sustainable Finance Disclosure Regulation ("SFDR") is a fundamental pillar of the EU Sustainable Finance agenda, along with other regulations such as the EU Taxonomy Regulation and the Corporate Sustainability Reporting Directive ("CSRD").

Periodic reporting for products that disclose under Article 8 and additional information for products disclosing under Article 6 that consider Principal Adverse Impacts ("PAI") are included in these financial statements.

A number of Mercer Sub-Funds make disclosures under Article 8 of the SFDR. The attributes of the Sub-Funds relating to promotion of environmental and/or social characteristics vary. Details on the precise environmental and social characteristics of the Sub-Funds are set out in the relevant Supplement. Information on the environmental or social characteristics of each relevant Sub-Fund are set out in the Unaudited Supplemental Information on pages 332-334, 463-900. Information on Sub-Funds that do not promote environmental or social characteristics but consider PAI are set out on pages 901-910.

Sustainability related data

In evaluating a security, issuer or index based on sustainability-related characteristics, the Investment Manager (or its delegate) is dependent on information and data which may be incomplete, inaccurate or unavailable. The Investment Manager (or its delegate) may rely upon data sourced from third-party ESG research and market data providers who may similarly rely on information which is incomplete, inaccurate or unavailable. The wide variety of types, sources and uses of ESG data can produce very different results and the models used by third-party ESG research providers can result in conflicting and subjective assessments. Third-party ESG research and market data providers typically limit or exclude any responsibility or liability with respect to the accuracy, reasonableness or completeness of any sustainability related assessments.

Data quality and coverage in relation to investee companies has various challenges across different countries and regions (especially for smaller companies and less developed markets). Some data may be modelled rather than reported data and data from some companies may be delayed. In addition, not all self-reported data is independently verified. Since the regulation and standards of non-financial reporting is developing, data quality, coverage, consistency and accessibility remains challenging over the near term.

Significant events during the financial year

See Note 14 to the financial statements for significant events affecting the Company during the financial year.

Subsequent events

See Note 15 to the financial statements for significant events affecting the Company since the financial year end date.

Adequate accounting records

The Board ensures compliance with the Company's obligation to maintain adequate accounting records by appointing competent persons to be responsible for them. The adequate accounting records are kept by State Street Fund Services (Ireland) Limited (the "Administrator"), at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

Relevant audit information

The Board believes that they have taken all steps necessary to make themselves aware of any relevant audit information and have established that the Company's statutory auditor is aware of that information. In so far as they are aware, there is no relevant audit information of which the Company's statutory auditor is unaware.

Independent Auditor

Deloitte Ireland LLP, Chartered Accountants & Statutory Audit Firm, (the "Auditor") indicated their willingness to continue in office in accordance with Section 383(2) of the Companies Act 2014.

Statement of Directors' Compliance

We acknowledge that we are responsible for securing the Company's compliance with its relevant obligations. We confirm that:

- a compliance policy statement has been drawn up setting out the Company's policies;
- appropriate arrangements and structures that are, in our opinion, designed to secure material compliance with the Company's relevant obligations, have been put in place; and
- a review analysis has been conducted, during the financial year, of the arrangements and structures that have been put in place to secure the Company's compliance with its relevant obligations.

On behalf of the Board of Directors

Susan Dargan

Director

Liam Miley

Director

22 October 2026

We have enquired into the conduct of MGI Funds plc (the "Company") for the financial year ended 30 June 2026, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that financial year in accordance with the provisions of the Company's constitutional documentation and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed:

(i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the constitutional documentation and the UCITS regulations; and

(ii) otherwise in accordance with the constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2026 (the "Central Bank UCITS Regulations"); and

(ii) otherwise in accordance with the provisions of the constitutional documentation, the UCITS Regulations and Central Bank UCITS Regulations.

Report on the audit of the financial statements

Opinion on the financial statements of MGI Funds plc (the "Company")

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 30 June 2026 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows;
- the related notes 1 to 16, including material accounting policy information as set out in note 2; and
- Portfolio Statements.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2026 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Report on the audit of the financial statements (continued)

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements.

This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements.
- In our opinion, those parts of the directors' report specified for our review, which does not include sustainability reporting when required by Part 28 of the Companies Act 2014, have been prepared in accordance with the Companies Act 2014.

Report on other legal and regulatory requirements (continued)

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

**For the purpose of combining the financial statements of the Sub-Funds to arrive at Company figures, the amounts in the financial statements have been translated to Euro. The method of translation has no effect on the NAV per Redeemable Participating Share attributable to the individual Sub-Funds. The resulting Euro gain is owing to the difference in exchange rate used to translate the Statement of Comprehensive Income and the Statement of Financial Position and is included as a foreign currency translation adjustment in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. This is a notional gain, which has no impact on the NAV of the Sub-Funds.

*Sub-Fund launched during the financial year ended 30 June 2026 therefore there is no comparative information.

**This amount includes cash and cash equivalents of €35,066 held on the Sub-Funds that terminated during the financial year ended 30 June 2025.

***For the purpose of combining the financial statements of the Sub-Funds to arrive at Company figures, the amounts in the financial statements have been translated to Euro. The resulting gain of Euro is owing to the difference in exchange rate used to translate the Statement of Comprehensive Income and the Statement of Financial Position and is included as a foreign currency translation adjustment in the Statement of Cash Flows. This is a notional gain, which has no impact on the NAV of the Sub-Funds.

[1]These amounts exclude non-cash transactions of US$ 220,404,919. Please refer to Note 6 to the financial statements for more detail regarding in-specie transactions.

[2]These amounts exclude non-cash transactions of US$ 442,670,857. Please refer to Note 6 to the financial statements for more detail regarding in-specie transactions.

*Sub-Fund launched during the financial year ended 30 June 2025.

**This amount includes cash and cash equivalents of € 1,509,956 held on the Sub-Funds that terminated during the financial year ended 30 June 2024.

***For the purpose of combining the financial statements of the Sub-Funds to arrive at Company figures, the amounts in the financial statements have been translated to Euro. The resulting loss of Euro is owing to the difference in exchange rate used to translate the Statement of Comprehensive Income and the Statement of Financial Position and is included as a foreign currency translation adjustment in the Statement of Cash Flows. This is a notional loss, which has no impact on the NAV of the Sub-Funds.

[1]These amounts exclude non-cash transactions of € 1,459,099,825. Please refer to Note 6 to the financial statements for more detail regarding in-specie transactions.

1. Reporting entity

MGI Funds plc (the "Company") is an open-ended investment company with variable capital organised under the laws of Ireland. The Company is organised in the form of an umbrella fund insofar as the share capital of the Company will be divided into different series of shares with each series of shares representing a portfolio of assets which will comprise a separate fund (each a "Sub-Fund") and each Sub-Fund has segregated liability under Irish law.

MGI Funds plc is the reporting entity.

2. Material accounting policies

The material accounting policies adopted by the Company are as follows:

a) Basis of preparation

The financial statements have been prepared in accordance with IFRS Accounting Standards as adopted by the EU, and Irish statute comprising the Companies Act 2014, the European Communities UCITS Regulations 2011, as amended from time to time, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings For Collective Investment In Transferable Securities) Regulations 2026, as amended from time to time, (the "Central Bank UCITS Regulations").

The financial statements of the Company have been prepared on a going concern basis as it has been determined that the Company can continue in operational existence for at least twelve months from the date of approval of these financial statements (the period of assessment). The assessment is completed at Company level by the Directors and takes multiple factors into account including Sub-Fund size, NAV movements and new Sub-Fund launches and terminations.

Comparative figures presented in these financial statements may have been adjusted during the preparation of the current year's financial statements. These adjustments include presentational changes and do not impact the primary financial statements.

b) Functional and presentation currency

(i) Functional and presentation currency of the Company
The functional and presentation currency of the Company is the Euro ("€") as it is the currency of the primary economic environment in which the Company operates.

(ii) Functional and presentation currency of the Sub-Funds
Items included in the Company's financial statements are measured using the currency of the primary economic environment in which the respective Sub-Funds operate (the "functional currency"). If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The functional currencies of the Sub-Funds are shown in the primary statements. The Sub-Funds have adopted these functional currencies as their presentation currency.

(iii) Translation of Sub-Funds for the purposes of calculating the Company values
For the purposes of presenting the financial statements of the Company, the Statement of Financial Position of the Sub-Funds with functional and presentation currencies other than € were translated to € at the exchange rate prevailing as at 30 June 2026. The Statement of Comprehensive Income, proceeds from redeemable participating shares issued, redemptions of redeemable participating shares and Statement of Cash Flows of the Sub-Funds with functional currencies other than the € were translated at the average rates during the year where those rates represent a reasonable approximation of actual rates.

(iv) Translation and balances
Monetary assets and liabilities denominated in currencies other than the functional currency of a particular Sub-Fund are translated to the functional currency at the closing rates of exchange at financial year end. Transactions during the financial year are translated at the rate of exchange prevailing on the date of the transaction. Foreign currency gains and losses are included in Net gain/(loss) from financial instruments at fair value through profit or loss ("FVTPL") in the Statement of Comprehensive Income.

Average rates of exchange were used to translate transfers of shares between share classes of the Sub-Funds (each a "Share Class") with functional currencies other than the functional currency of the Sub-Fund, where those rates represent a reasonable approximation of actual rates.

2. Material accounting policies (continued)

c) Use of judgements and estimates

The preparation of financial statements in conformity with IFRS Accounting Standards as adopted by the EU requires management to make judgements, estimates and assumptions which affects the application of accounting policies and the reported amounts of assets and liabilities, income and expenses and the disclosure of contingent assets and liabilities as at the date of the financial statements. The estimates and associated assumptions are based on historical experience and various other factors which are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about carrying values of assets and liabilities which are not readily apparent from others.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the financial year in which the estimates are revised and in any future years affected.

(i) Judgements
Information about judgements made in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements of the Company and the Sub-Funds is included in Note 2b and in Note 7 to the financial statements.

(ii) Assumptions and estimation uncertainties
Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the financial year ending 30 June 2026 and 30 June 2025 is included in Note 10 to the financial statements and relates to the determination of fair value of certain financial instruments with significant unobservable inputs.

d) New standards, amendments or interpretations issued and effective for the financial year beginning 1 July 2025

The following new standards, amendments to standards or interpretations are effective for annual periods beginning 1 July 2025. These have been applied in preparing the Company's financial statements and have not had a significant impact on the Company's financial position, performance or disclosures in its financial statements.
- Amendments to IAS 21 - Lack of Exchangeability.

e) New standards, amendments or interpretations issued but not effective for the financial year beginning 1 July 2025 and not early adopted

A number of new standards, amendments to standards or interpretations are not effective for the financial year beginning 1 July 2025, and have not been adopted in preparing these financial statements.

IFRS 18 "Presentation and Disclosure in Financial Statements" was issued in April 2024 and applies to an annual financial reporting period beginning on or after 1 January 2027. IFRS 18 replaces IAS 1 "Presentation of Financial Statements". IFRS 18 aims to improve financial reporting by requiring additional defined subtotals in the Statement of Comprehensive Income, requiring disclosures about management-defined performance measures and adding new principles for grouping (aggregation and disaggregation) of information. The Company is in the process of assessing the impact of the accounting standard.

The following new standards, amendments to standards or interpretations are not expected to have a material impact on the Company's financial statements:
- Amendments to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments.
- Amendments to IAS 21 – Translation to a Hyperinflationary Presentation Currency.
- Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10, IAS 7 - Annual Improvements to IFRS Accounting Standards.
- Amendments to IFRS 9 and IFRS 7 - Contracts Referencing Nature-dependent Electricity.
- IFRS 19 – Subsidiaries without Public Accountability: Disclosures.
- The third edition of IFRS for SMEs Accounting Standard.
- IFRS 20 - Regulatory Assets and Regulatory Liabilities.

f) Financial instruments

(i) Recognition and initial measurement
Financial assets and financial liabilities are initially recognised at FVTPL on the trade date, which is the date on which the Company becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised on the date on which they originated. From this date any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded in the Statement of Comprehensive Income.

2. Material accounting policies (continued)

f) Financial instruments (continued)

(i) Recognition and initial measurement (continued)

Financial assets and liabilities are measured initially at fair value. For an item not classified at FVTPL, it is measured initially at fair value plus or minus transaction costs that are directly attributable to its acquisition or issue. Transaction costs on financial assets and financial liabilities at FVTPL are expensed immediately, while on other financial instruments they are amortised.

(ii) Classification and subsequent measurement

On initial recognition, the Company classifies financial assets as measured at amortised cost or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

Business model assessment

In making an assessment of the objectives of the business model in which a financial asset is held, the Company considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how Mercer Global Investments Europe Limited ("MGIE", the "Investment Manager", the "Distributor") is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for de-recognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets. The Company has determined that there are two business models.

- Held to collect business model: this includes cash and cash equivalents, due from broker, subscriptions receivable, deposits, receivable for securities sold, reverse repurchase agreements and other assets. These financial assets are held to collect contractual cash flows.
- Other business model: this includes debt securities, equity investments, money market instruments, loans, investments in open-ended CIS and financial derivative instruments ("FDIs"). These financial assets are managed and their performance is evaluated on a fair value basis, typically with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purposes of this assessment, "principal" is defined as the fair value of the financial asset on initial recognition. "Interest" is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- leverage features;
- prepayments and extension features;
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features); and
- features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

A financial liability is classified as FVTPL if it is classified as held-for-trading, if it is an FDI or, if it is designated as such on initial recognition.

2. Material accounting policies (continued)

f) Financial instruments (continued)

(ii) Classification and subsequent measurement (continued)

Assessment whether contractual cash flows are SPPI (continued)
The Company has classified its financial assets and financial liabilities into the following categories:

- Financial assets at FVTPL - investments in transferable securities, money market instruments, loans, investment funds and FDIs with positive fair values.
- Financial assets at amortised cost - cash and cash equivalents, due from broker, receivable for securities sold, subscriptions receivable, other assets, deposits and reverse repurchase agreements.
- Financial liabilities at amortised cost - bank overdraft, due to broker, payable for securities purchased, unfunded loan, interest payable, redemptions payable, expenses payable, repurchase agreements and net assets attributable to holders of redeemable participating shares.
- Financial liabilities at FVTPL - securities sold short, FDIs with negative fair values.

Financial assets and financial liabilities at FVTPL are subsequently measured at fair value. Net gains and losses arising from changes in the fair value of financial assets and financial liabilities at FVTPL are included in the Statement of Comprehensive Income in the year in which they arise.

Financial assets and financial liabilities at amortised cost are subsequently measured at amortised cost using the effective interest rate ("EIR") method. Interest income from the financial assets measured at amortised cost are recognised in Interest income calculated using EIR in the Statement of Comprehensive Income. Interest expense from the financial liabilities measured at amortised cost is recognised in Interest expense in the Statement of Comprehensive Income.

Reclassifications
Financial assets are not reclassified subsequent to their initial recognition unless the Company were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

(iii) Fair value measurement
"Fair Value" is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Sub-Funds have access at that date. The fair value of a liability reflects its non-performance risk.

The fair value of financial instruments traded in active markets (such as equities) or any other regulated market (such as fixed income securities) is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. In respect of debt securities, the quoted market price used for financial assets and liabilities held by the Company is the mean price. In respect of equity securities, the quoted market price used is the last traded price.

A market is regarded as "active" if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The Sub-Funds measure instruments quoted in an active market at current last traded market price, because this price provides a reasonable approximation of the exit price. If there is no quoted price in an active market, then the Sub-Fund uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

This includes, but is not limited to, reviewing information on stale and static prices, suspended securities and securities in liquidation and securities valued at cost. If the Investment Manager has reasonable belief that the valuation of a particular security may not reflect fair market value, the Investment Manager's Valuation Committee ("VC") will meet to consider the appropriate valuation of the security in question. The VC meets on a regular basis and formally reviews all new fair value assessments and other pricing issues. Ad-hoc fair value approvals may be received via email to the committee members or by means of extraordinary meetings of the VC should the need arise.

The Company recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

(iv) Amortised cost measurement
The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the EIR of any difference between the initial amount recognised and the maturity amount, minus any adjustment for any loss allowances for financial assets.

2. Material accounting policies (continued)

f) Financial instruments (continued)

(v) Impairment of financial assets

IFRS 9 requires an impairment assessment to be carried out on its financial assets held at amortised cost. Mercer Global Investments Management Limited ("MGIM", the "Manager") has reviewed the impairment assessment of financial assets held at amortised cost. The Manager considers the probability of default to be close to zero, as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised in the financial statements based on 12-month expected credit losses ("ECLs") as any such impairment would be wholly insignificant to the Company.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due. The Company considers a financial asset to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of "investment grade". The Company considers this to be Baa3 or higher per Moody's or BBB- or higher per Standard and Poor's.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from the default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the EIR of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is "credit-impaired" when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 90 days past due; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisations.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write off

The gross carrying amount of financial assets is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

(vi) Derecognition

The Company derecognises a financial asset when the contractual right to the cash flows from the financial asset expires or it transfers the financial asset and the transfer qualifies for derecognition in accordance with IFRS 9.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expired. The Company uses the average cost method to determine realised gains and losses on derecognition.

(vii) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the Statement of Financial Position when and only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

2. Material accounting policies (continued)

f) Financial instruments (continued)

(vii) Offsetting (continued)
Income and expenses are presented on a net basis for gains and losses from financial instruments at FVTPL and foreign exchange gains and losses.

g) Trade capture

The Sub-Funds investment trades are recorded on a T+1 basis. The trade date cut-off time is the end of the business day in the respective market. If a trade is communicated after the cut-off time, it will be reflected in the accounting records on T+2, provided it is communicated before the next day's cut-off time. Similarly, capital and hedging trades are also reported on a T+1 basis. For the purposes of these financial statements, an adjustment may be made for trades received after the cut-off time that are above specified thresholds as determined by the Manager.

h) Dividend and interest income/expense

Dividend income is recognised in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income on the date that the right to receive payment is established. Dividend income from unquoted equities is recognised when the dividend is declared and Shareholders' approval has been obtained.

Bank interest income and bank interest expense are included in the Statement of Comprehensive Income under Interest income calculated using the EIR and Bank interest expense, respectively.

Interest income and interest expense generated from assets classified at FVTPL is disclosed in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

i) Net gain/(loss) from financial instruments at FVTPL

Net gain/(loss) from financial instruments at FVTPL includes all realised gains and losses, unrealised gains and losses from fair value changes, foreign exchange differences, dividend and interest income/(expense) on financial instruments at FVTPL. The Company records its investment transactions on trade date basis. Realised gains and losses are calculated based on the average cost method.

The change in unrealised gain or loss represents a movement in fair value to cost of the investment between reporting periods. Where a security's fair value over cost increases over the period, this is recorded as a change in unrealised gain on investments. Where a security's fair value over cost decreases over the period, this is recorded as a change in unrealised loss on investments. For investments and FDIs held at the end of the prior financial year and sold in their entirety during the current financial year, the change in unrealised gain or loss represents the difference between the carrying amount of a financial instrument at the beginning of the period, or the transaction price if it was purchased in the current reporting period, and its carrying amount at the end of the period, being € Nil.

j) Rebate income

Rebate income is received by a Sub-Fund by virtue of its investment in the units of another investment fund where the Manager has negotiated a discounted management fee (the "Management Fee") on its investment in the units of the underlying Investment Fund. Rebate income is accounted for on an accrual basis in the Statement of Comprehensive Income.

k) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis.

l) Cash and cash equivalents and bank overdraft

Cash and cash equivalents comprise deposits with banks and highly liquid financial assets with maturities of three months or less from the date of acquisition that are subject to an insignificant risk of changes in their fair value and are used by the Company in the management of short-term commitments, other than cash collateral provided in respect of derivatives and securities borrowing transactions. Bank overdrafts are shown within liabilities in the Statement of Financial Position.

m) Unfunded loans

Unfunded loans occur when the Company commits to purchase a loan asset and has purchased less than 100% of the commitment as at year end. The percentage outstanding as at year end is the unfunded loan. The full 100% of the commitment is reflected in the Statement of Financial Position. The percentage outstanding is reflected in the Statement of Financial Position as a financial liability.

2. Material accounting policies (continued)

n) Redeemable participating shares

Redeemable participating shares are redeemable at the Shareholder's option and are classified as financial liabilities.

The redeemable participating shares can be put back to the Sub-Funds at any dealing day for cash equal to a proportionate share of the relevant Sub-Fund's NAV. The redeemable participating shares are carried at the redemption amount that is payable at the reporting date if the Shareholders exercised their right to put the share back to the Sub-Fund.

Swing Pricing
The Directors may determine, at their discretion, to "swing" the NAV to counter the possible negative effects of dilution. Swing pricing is applied to a Sub-Fund once net subscriptions or redemptions for a Sub-Fund for a given dealing day exceeds a predetermined amount.

Anti-Dilution levy
The Directors may determine to add or deduct, as appropriate, an anti-dilution levy, to or from the subscription or redemption amount on that dealing day in order to cover dealing costs and to preserve the value of the underlying assets of the Sub-Fund for existing Shareholders.

Please see Note 12 to the financial statements for further details.

o) Financial derivative instruments

(i) Forward foreign currency contracts
The fair value of open forward foreign currency contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the valuation date. Gains or losses arising on the settlement of forward foreign currency contracts are included in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income. Unrealised gains and losses on unsettled forward foreign currency contracts are included in the Statement of Financial Position. The unrealised gain/(loss) on open forward foreign currency contracts is calculated by reference to the forward price. Realised gains or losses include net gains and losses on contracts which have been settled or offset by other contracts.

(ii) Futures contracts on securities
The fair value of futures contracts is based upon daily quoted settlement prices. Changes in the value of the contract are recognised as unrealised gains or losses in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income by "marking to market" the value of the contract at the reporting date. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded as a realised gain/(loss) in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income. Futures contracts are presented in the Portfolio Statements on a gross basis.

(iii) Interest rate swaps, credit default swaps, total return swaps and cross currency interest rate swaps
Interest rate swaps ("IRS") are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Fair values are obtained from counterparties or from quoted market prices in active markets, including recent market transactions, and from valuation techniques using discounted cash flow models and option pricing models as appropriate. IRS are included in assets when the fair value is positive and in liabilities when the fair value is negative, unless there is the legal ability and intention to settle the asset and liability on a net basis. Revenues/payments arising on IRS are included in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income. Swap contracts are carried at fair value based upon the fair value of the underlying assets, the risk associated with the underlying assets, and any additional provisions of the derivative contract.

Credit default swaps ("CDS") contracts are valued at fair value based on a pricing methodology utilising certain factors which include the credit risk of the reference obligations of the underlying issuers, as well as the specific terms of the contract. Certain CDS contracts entered into may include upfront fees that are paid by the buyer to the seller of the CDS contracts at the date of transaction. Such fees are reported as unrealised gains or losses in the Statement of Financial Position and as net gains and losses in the Statement of Comprehensive Income. These upfront payments represent the amounts paid or received when initially entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and the prevailing market conditions and are included as realised gains or losses in the Statement of Comprehensive Income upon termination or maturity of the swap.

Total return swaps ("TRS") is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In TRS, the underlying asset, referred to as the reference asset, is usually a stock or fixed income index. This is owned by the party receiving the set rate payment. TRS allow the party receiving the total return to gain exposure and benefit from a reference asset without actually having to own it. Contracts are marked-

2. Material accounting policies (continued)

o) Financial derivative instruments (continued)

(iii) Interest rate swaps, credit default swaps, total return swaps and cross currency interest rate swaps (continued)
to-market daily based upon calculations using a valuation model and the change, if any, is recorded as unrealised gain or loss in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

Cross currency interest rate swaps ("CCIRS") are contracts between the Sub-Fund and a counterparty to exchange cash flows based on interest rate markets in two different currencies (fixed or floating), calculated on a notional principal value for a fixed period. For non-deliverable CCIRS the payments for one of the currencies is settled through an alternate major currency. CCIRS are entered into to gain exposure to long and short positions in a range of international interest rates. Contracts are marked to market daily based upon calculations using a valuation model and the change, if any, is recorded as unrealised gain or loss. Payments received or paid on maturity or termination of the contract are recognised as realised gains or losses in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

(iv) Swaptions
When a Sub-Fund writes a swaption, a premium is received by the Sub-Fund and the swaption is initially recognised at the amount of the premium. The difference between the premium received and the fair value reported in the Statement of Financial Position gives rise to an unrealised gain/(loss). When a swaption which the Sub-Fund has written is exercised, the amount of the premium originally received will offset the cost of the swap upon exercise of the option in arriving at the movement in unrealised gain/(loss) to be included in the Statement of Comprehensive Income. Premiums received on swaptions written which expire unexercised are treated as realised gains in the Statement of Comprehensive Income.

When a Sub-Fund purchases a swaption, a premium is paid by the Sub-Fund and the swaption is initially recognised at the amount of the premium. The swaption is subsequently marked-to-market to reflect the fair value of the swaption purchased, which is reported within financial assets at FVTPL in the Statement of Financial Position. When a swaption which the Sub-Fund holds is exercised, the amount of the premium originally paid will offset the cost of the swap upon exercise of the option in arriving at the movement in unrealised gain/(loss) to be included in the Statement of Comprehensive Income. Premiums paid from the purchase of swaptions which expire unexercised are treated as realised losses in the Statement of Comprehensive Income.

(v) Warrants
The valuation of the warrants depends on the level of trading. If the warrants are actively traded in the market, then the market price is used. If the warrants are not actively traded in the market, the intrinsic value of the warrant based on underlying equity price and warrant strike price is used. Warrants by their nature are covered investments.

(vi) Options
A Sub-Fund may purchase and sell (write) call and put options on securities, securities indices and foreign currencies traded on a national securities exchange or in an over the counter ("OTC") market.

When a Sub-Fund purchases a call or a put option, a premium is paid by the Sub-Fund. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid on the purchase of options which expire unexercised are treated as realised losses. The option is subsequently marked-to-market to reflect the fair value of the option purchased, which is reported within financial assets at FVTPL in the Statement of Financial Position for each relevant Sub-Fund.

If an option which a Sub-Fund has written either expires on its stipulated expiration date or a Sub-Fund enters into a closing purchase transaction, a Sub-Fund realises a gain (or loss, if the cost of a closing purchase transaction exceeds the premium received when the option was sold) without regard to any unrealised gain or loss on the underlying security, and the liability related to such option is extinguished. If a call option which a Sub-Fund has written is exercised, a Sub-Fund realises a capital gain or loss from the sale of the underlying security, and the proceeds from such sales are increased by the premium originally received. When a put option which a Sub-Fund has written is exercised, the amount of the premium originally received will reduce the cost of the security which a Sub-Fund purchases upon exercise of the option.

The OTC options are valued at close of business on the dealing day at the settlement price as provided by the counterparty/broker and the values are independently valued, at a minimum, weekly. The fair values of exchange traded options are based upon their quoted daily settlement prices on the relevant exchange. In the event of it being impossible or incorrect to carry out a valuation of a specific investment in accordance with the valuation rules, or if such valuation is not representative of a security's fair market value, the Directors are entitled to use other generally recognised valuation methods in order to reach a proper valuation of that specific instrument, provided that such method of valuation has been approved by State Street Custodial Services (Ireland) Limited (the "Depositary").

2. Material accounting policies (continued)

o) Financial derivative instruments (continued)

(vii) Bond forward contracts

Bond forward contracts are financial instruments that derive their value from an underlying sovereign bond issued by a specific government. Sub-Funds record the difference between the fair value and the cost of the underlying bonds as a change in unrealised/realised gain or loss for bond forward contract position, which is reflected in the NAV calculation of the Sub-Funds in the Statement of Comprehensive Income. The Sub-Funds benefit or suffer based on the gains or losses realised due to the difference in purchase and sale prices and the associated currency gains or losses on these transactions. The currency gains or losses associated with the interest bought or sold are recorded in the Statement of Comprehensive Income. Net realised gains and losses and net change in unrealised gain and loss related to bond forwards are included in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

p) Repurchase agreements and reverse repurchase agreements

(i) Repurchase agreements

When a Sub-Fund sells a financial asset and simultaneously enters into an agreement to repurchase the same or a similar asset at a fixed price on a future date, the arrangement is accounted for as a borrowing and is recognised in the Statement of Financial Position as a payable under a repurchase agreement.

(ii) Reverse repurchase agreements

When a Sub-Fund purchases a financial asset and simultaneously enters into an agreement to resell the same or a substantially similar asset at a fixed price on a future date, the arrangement is accounted for as a loan and receivable, and recognised in the Statement of Financial Position as a receivable from a reverse repurchase agreement, and the underlying asset is not recognised in the Company's financial statements.

Receivable for reverse repurchase agreements and payable for repurchase agreements are subsequently measured at amortised cost.

Securities borrowed by the Sub-Funds are not recognised in the Statement of Financial Position. If the Sub-Fund subsequently sells the borrowed securities, then the arrangement is accounted for as a short sold position, recognised in the Statement of Financial Position as a financial liability at FVTPL. Cash collateral for borrowed securities is included within due from broker in the Statement of Financial Position.

q) Due from/to broker

Due from/to broker is margin cash and cash collateral which is held by or due to brokers. This amount is the minimum deemed by the brokers and counterparties for collateral requirements and is as such restricted and is reported separately to the unrestricted cash in the Statement of Financial Position.

Upon entering into a centrally cleared derivative contract, the Sub-Funds are required to pledge cash or securities as collateral to a central clearing house, through a broker, in accordance with the initial margin requirements of the central clearing house. At year end, the balances of the initial margin requirements at each broker, excluding the value of any securities pledged as collateral, are recorded as due from/to broker in the Statement of Financial Position. Any security that has been pledged as collateral is identified as an asset in the Statement of Financial Position at FVTPL.

r) Cross Investments within the Company

For the purposes of producing the combined Company total financial statements, investments by Sub-Funds within the Company in the units of other Sub-Funds within the Company, also known as "Cross Investments" must be eliminated in order to prevent double counting.

s) Collateral

A Sub-Fund's assets may be deposited for collateral purposes with counterparties in respect of OTC FDIs, reverse repurchase agreements and repurchase agreements held by a Sub-Fund. Investments pledged by a Sub-Fund as collateral are recognised at fair value in the relevant Sub-Fund's Portfolio Statements and such investments are referenced accordingly at the base of the Portfolio Statement. These assets remain in the ownership of the relevant Sub-Fund and are recorded as an asset in the Statement of Financial Position.

A Sub-Fund may also receive assets as collateral from counterparties. Securities received by the Sub-Funds as collateral from counterparties do not form part of the NAV of the Sub-Funds and are disclosed at the end of the relevant Portfolio Statement.

Cash collateral received is disclosed in the Statement of Financial Position as an asset and a related liability to repay the collateral is recorded, both of which are valued at amortised cost.

2. Material accounting policies (continued)

s) Collateral (continued)

Cash pledged by the Sub-Funds as collateral is disclosed in the Statement of Financial Position within due from broker.

t) Taxation

The Sub-Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

u) Other assets

Other assets do not carry any interest and are short-term in nature and are accordingly stated at their nominal value as reduced by appropriate allowances for estimated irrecoverable amounts.

v) Expenses payable

Accrued expenses are recognised initially at fair value and subsequently stated at amortised cost using the EIR method.

w) Receivable for securities sold/payable for securities purchased

Receivable for securities sold and payable for securities purchased represent sales and purchases that have been contracted for but not yet delivered by the end of the financial year. They are disclosed as assets and liabilities, respectively, in the Statement of Financial Position.

x) Subscriptions receivable/redemptions payable

The subscriptions receivable/redemptions payable represent amounts receivable and payable from/to investors for Sub-Fund shares issued/redeemed for which settlement has not occurred at the end of the financial year and are included as assets/liabilities in the Statement of Financial Position.

y) Distributions

Distributions on distributing share classes with an ex-date during the financial year are included as a finance cost in the Statement of Comprehensive Income. The reinvestment of distributions if applicable, being the portion of the total distribution reinvested, are included as a share transaction in the Statement of Changes in net assets attributable to holders of redeemable participating shares. None of the distributions are paid out of the capital.

z) Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, forwards and swaps are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities, futures and options are included in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income for each Sub-Fund. Depositary transaction costs are included in Expenses in the Statement of Comprehensive Income for each Sub-Fund. These costs are separately identifiable transaction costs and the total of these costs incurred by each Sub-Fund during the financial year are disclosed in Note 3 to the financial statements.

aa) Securities lending income

Income earned from securities lending activities is accounted for on an accruals basis. Securities lending income is recognised in the Statement of Comprehensive Income. Investments lent under securities lending agreement continue to be recognised in the Statement of Financial Position, as the Company continues to be exposed to all gains and losses arising from the ownership of these securities and are measured in accordance with the accounting policy for financial instruments.

2. Material accounting policies (continued)

ab) Interest payable

Interest payable is stated at its accrued value.

ac) Securities sold short

The Company may synthetically enter into short sales transactions. A short sale is a transaction in which a Sub-Fund sells securities it may not own in anticipation of a decline in the fair value of the securities. Securities sold in short sale transactions and the interest payable on such securities, if any, is reflected as a liability on the Statement of Financial Position. A Sub-Fund is obligated to deliver securities at the trade price at the time the short position is covered. Possible losses from short sales may be unlimited, whereas losses from purchases cannot exceed the total amount invested. Cash collateral for borrowed securities is included within due from broker in the Statement of Financial Position.

ad) Money market instruments

Certain Sub-Funds may invest in money market instruments including money market funds, commercial paper, floating rate notes and freely transferable promissory notes for ancillary liquidity purposes. Money market funds are disclosed in Investment funds in the Statement of Financial Position.

Money market instruments are recognised at FVTPL and included in the Statement of Financial Position.

ae) To Be Announced ("TBA") commitments

The Sub-Funds may enter into TBA purchase commitments, with payment and delivery at a scheduled future date beyond the customary settlement period for that security. With TBA transactions, the particular securities to be delivered are not identified at trade date. The Sub-Funds maintain cash reserves and liquid assets sufficient to settle their TBAs. TBA securities are purchased and sold on a forward commitment basis with an approximate principal amount and maturity date. The actual principal amount and maturity date will be determined upon settlement when the specific mortgage pools are assigned. TBA commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to settlement date.

Unsettled TBA commitments are valued at FVTPL and included in transferable securities in the Statement of Financial Position.

3. Fees and expenses

The Sub-Funds listed below have the following specific aggregate fee arrangement in place as disclosed per the Sub-Fund Supplement.

Sub-Fund	Aggregate Fee
Acadian Global Managed Volatility Equity II*	Includes Manager, Administrator and Depositary fees capped at 0.15% plus Sub- Investment Manager fees capped at the individual percentage for the relevant Share Class indicated in the individual Share Class name and the relevant Sub- Fund Supplement

*Sub-Fund terminated during the financial year ended 30 June 2026.

Fees incurred by the Company during the financial year are recognised in the Statement of Comprehensive Income.

Management Fee

The Manager is paid a fee comprised of two components: a Manager Fee and a Hedging Fee, where applicable (together the "Management Fee").

The Manager Fee remunerates the Manager for its services to the Sub-Funds. The Hedging Fee is paid to the Manager to discharge the variable costs of any delegate or service provider who may be engaged to perform currency hedging for hedged Share Classes. See Note 4 to the financial statements for details of the Management Fee incurred and payable for the year ended 30 June 2026 and 30 June 2025.

Investments by Sub-Funds of the Company into share classes of funds also managed by the Manager (Z Share Classes) are not charged a Management Fee at the level of the underlying fund, therefore ensuring there is no double charging of Management Fees by the Manager. However, a hedging fee may be applied where the investment is into a hedged share class (Z Hedged Share Classes).

3. Fees and expenses (continued)

Management Fee (continued)

The following table details the Management Fee per Share Class as a percentage of net assets of each Sub-Fund at 30 June 2026 and 30 June 2025.

Operating expenses

The fees and expenses of the Administrator and the Depositary, (including reasonable out of pocket expenses) shall be paid by the Company out of the assets of the relevant Sub-Fund.

The Sub-Funds are charged Administration fees, which includes fund accounting, Share Class fees, transfer agency, financial and tax reporting fees, at fee rates ranging between 0.36125 basis points ("bps") and 1.5 bps of the NAV based on the daily Assets under Administration ("AUA"). The Sub-Funds are charged Depositary fees, at fee rates ranging between 0.153 bps and 0.625 bps of the NAV based on the daily AUA.

The Company shall also reimburse the Depositary out of the assets of the relevant Sub-Fund for the reasonable fees and customary agents' charges paid by the Depositary to any sub-custodian (which shall be charged at normal commercial rates) together with value added tax ("VAT"), if any, thereon. These fees accrue and are calculated on each dealing date and are payable monthly in arrears.

3. Fees and expenses (continued)

Operating expenses (continued)

The table below outlines the Administration and Depositary fees incurred during the financial year ended 30 June 2026 and 30 June 2025 and the amounts payable at the financial year end.

MGI Funds plc	30 Jun 2026 €	30 Jun 2025 €
Administration fees	5,112,884	4,676,764

Depositary fees	2,092,209	1,911,659
Depositary fees payable	568,998	467,032

Voluntary Cap

The Manager or Sub-Investment Manager can limit the annual expenses for certain share classes by using a Voluntary Cap as a percentage of net assets of each Sub-Fund. See Note 4 to the financial statements for details of any Voluntary Cap reimbursements received by the Sub-Funds during the financial year ended 30 June 2026 and 30 June 2025.

The table below details the Sub-Funds that had a Voluntary Cap at 30 June 2026 and 30 June 2025.

*Sub-Fund terminated during the financial year ended 30 June 2025.
**Sub-Fund launched during the financial year ended 30 June 2026 therefore there is no comparative information.
^On 11 May 2026, the Voluntary Cap was replaced by an Operating Expense Cap.

Operating Expense Cap

On 15 November 2024 and 11 May 2026, the Voluntary Cap was replaced by an Operating Expense Cap for a number of Sub-Funds.

The Manager may undertake to limit the Operating Expenses attributable to certain Sub-Funds, or certain Classes within a Sub-Fund, where so set out in the Relevant Supplement, save for any excluded fees and expenses. To achieve this Operating Expense Cap, the Manager will absorb (either directly by waiving a portion of its Management Fee or by reimbursement to the relevant Sub-Fund) any Operating Expenses over the applicable Operating Expense Cap that may arise.

3. Fees and expenses (continued)

Operating Expense Cap (continued)

As at 30 June 2026 and 30 June 2025, the Operating Expense Cap of 0.20% applies to all Sub-Funds+ with the exceptions indicated below.

*Sub-Fund terminated during the financial year ended 30 June 2026.
**Sub-Fund launched during the financial year ended 30 June 2026 therefore there is no comparative information.

+As at 30 June 2026, the Operating Expense Cap does not apply to Acadian Global Managed Volatility Equity II. As at 30 June 2025, the Operating Expense Cap does not apply to Mercer Euro Nominal Bond Medium Duration Fund, Mercer Passive Global Small Cap Equity Feeder Fund, Acadian China A Equity, Acadian European Equity, Acadian Global Managed Volatility Equity, Acadian Global Managed Volatility Equity II, Mercer Sustainable Listed Infrastructure Feeder Fund, Acadian European Small Cap Equity, Acadian Global High Yield Bond Fund and Acadian Emerging Market Enhanced Equity.

Investment Manager and Sub-Investment Managers' fees

The Manager has appointed Mercer Global Investments Europe Limited ("MGIE", the "Investment Manager") as Investment Manager for the Company. The Investment Manager has responsibility for the on-going monitoring of investments within each of the Sub-Funds of the Company. The Investment Manager's fee is paid by the Manager out of the Management Fee, save where otherwise disclosed in the Supplement.

The Sub-Investment Managers' fees compensate the appointed Sub-Investment Managers for the day-to-day investment management of their assigned segments of the Sub-Funds. The Sub-Investment Managers' fees shall be paid out of the assets of the relevant Sub-Fund or by the Investment Manager out of its fees as specified in the Relevant Supplement.

The table below outlines the Sub-Investment Managers' fees incurred during the financial year ended 30 June 2026 and 30 June 2025 and the amounts payable at the financial year end.

MGI Funds plc	30 Jun 2026 €	30 Jun 2025 €
Sub-Investment Managers' fees	74,144,594	61,828,804
Sub-Investment Managers' fees payable	26,054,555	18,426,772

Portfolio Advisor and Investor Services Agent

The Investment Manager appoints Christian Brothers Investment Services, Inc. ("CBIS"), to act as Portfolio Advisor to the Catholic Responsible Investments Global Bond Fund and Catholic Responsible Investments Global Equity Fund. The Portfolio Advisor advises the Investment Manager in a non-discretionary capacity in relation to activities linked to the ongoing alignment of the Sub-Fund's portfolio with Catholic teachings, in particular voting, exclusions and engagement. The Portfolio Advisor also advises the Investment Manager on a non-discretionary basis regarding portfolio construction and Sub-Investment Manager selection.

The Portfolio Advisor will charge a 0.15% fee to each Share Class within the relevant Sub-Fund.

The Investment Manager appoints CBIS with authority to identify and establish contact with potential investors and to provide ongoing client relationship services to investors introduced. The Investment Manager is responsible for the fees of the Investor Services Agent.

Performance fee

Sub-Investment Manager Performance fee - Acadian China A Equity

The Sub-Investment Manager may be entitled to receive a performance fee (the "Performance Fee") which shall be calculated and accrued daily for each applicable Share Class at each Valuation Point for the period starting at the end of

3. Fees and expenses (continued)

Performance fee (continued)

Sub-Investment Manager Performance fee - Acadian China A Equity (continued)

the Initial Offer Period of that Share Class and ending on 30 June of the year following a period of at least 12 months from the end of that Initial Offer Period and thereafter on 30 June of each successive year (the "Performance Period") and shall be payable in arrears at the end of each such Performance Period (except in the case of a redemption or transfer of Shares (a "Transfer")). In the case of redemptions or Transfers by Shareholders, the Performance Fee for the relevant Share Class in respect of the current Performance Period for that Share Class will be calculated in respect of the redeemed or transferred Shares and paid as though the date of the redemption or Transfer were the end of a Performance Period for that Share Class.

The first calculation period in such circumstances is the period commencing on the Business Day immediately following the end of the Initial Offer Period and ending on the last Dealing Day in the Performance Period and the initial price of the relevant Share Class will be taken as the starting price of the first such Performance Period.

Any Performance Fee shall normally be paid within 90 calendar days after the end of the relevant Performance Period.

The Performance Fee is payable to the Sub-Investment Manager only with respect to the outperformance for the relevant Share Class. Outperformance is measured as the performance of the relevant Share Class above the relevant performance index (the "Benchmark") during a Performance Period. The Benchmarks are set out below. A Benchmark must at all times be consistent with the investment policy of the relevant Sub-Fund.

Any negative performance must be clawed back before the Sub-Investment Manager may receive a Performance Fee in subsequent Performance Periods.

In no event will a Performance Fee calculated and accrued in respect of a Share Class exceed 15% of the outperformance when compared to the relevant Benchmark, during a Performance Period for relevant Share Classes of Acadian China A Equity.

It is possible that Performance Fees may be payable by the Manager to the Sub-Investment Manager even though the overall NAV of the Sub-Fund, may not have increased, i.e. the Sub-Fund has negative performance. This can happen if the performance of the Performance Benchmark is negative and the Sub-Fund is also in negative performance, but it has outperformed the Performance Benchmark.

Benchmarks
The Benchmark of the Sub-Fund will be the MSCI China A Onshore Index (USD) – Net Returns (the "Index") for performance measurement purposes.

With the exception of any relevant GBP and EUR Share Classes of Acadian China A Equity, where the Class Currency of the relevant Share Class differs from the currency of the relevant Benchmark, the performance of the Share Class will be calculated by reference to the equivalent currency version of the Benchmark. In the case of any relevant GBP and EUR Share Classes of Acadian China A Equity, the performance of any such Share Class will be calculated in Euro using World Markets/Reuters 4 pm exchange rates. The Benchmark used for such calculations have been determined by Sub-Investment Manager to be consistent with the Sub-Fund's investment policy.

There were no Performance Fees earned or payable for the financial ended 30 June 2026 or 30 June 2025.

3. Fees and expenses (continued)

Transaction costs

Feeder Funds

The Feeder Funds listed below invests substantially all of its assets in the Class Z and F1 Units of the Master Fund. The Class Z and F1 Units are offered primarily to clients of the Investment Manager or its affiliates pursuant to an investment management agreement. Investors in the Class Z and F1 Units are charged a 0% Management Fee. The Feeder Fund indirectly bears a pro rata portion of the fees and expenses of the Master Fund as an investor in the Fund. The Company is related to Mercer UCITS Common Contractual Fund by virtue of the fact that they are managed by the same Manager and Investment Manager. The financial statements of the Master Fund can be found on the Mercer Sub-Funds Website (Fund Information (mercer.com)).

Michael Aherne is a non-executive Director and the Chief Executive Officer (the "CEO") of MGIM.

Only independent non-executive Directors receive a fee for their Directorships.

The table below outlines the independent non-executive Directors' fees incurred during the financial year ended 30 June 2026 and 30 June 2025.

MGI Funds plc	30 Jun 2026 €	30 Jun 2025 €
Directors' fees	188,876	188,020

These fees are paid to the Directors monthly by Mercer (Ireland) Limited and recharged to the Company on a quarterly basis. The Company does not bear the cost of Directors' expense reimbursements, these are paid by the Investment Manager. The Company is related to Mercer (Ireland) Limited by virtue of Mercer (Ireland) Limited and the Manager sharing a common direct parent company, Mercer Ireland Holdings Limited.

Other related party transactions

The Company is related to Mercer PIF Fund plc, Mercer QIF Fund plc, Mercer QIF CCF and Mercer UCITS Common Contractual Fund by virtue of the fact they are managed by the same Manager and Investment Manager. The Company is further related to Mercer PIF Fund plc and Mercer QIF Fund plc by virtue of the fact they have common Directors, and to Mercer UCITS Common Contractual Fund and Mercer QIF CCF by virtue of the fact that the Directors of the Manager of these common contractual funds are common with the Directors of the Company.

Class Z Shares

Class Z Shares are offered primarily to clients of the Investment Manager or its affiliates pursuant to an investment management agreement. The Sub-Funds and any other fund for which the Manager or any of its affiliates may serve as manager or investment manager may also invest in Class Z Shares. Those investors in the Z Share Class are charged a 0% Management Fee. The Z Hedged Share Classes may be subject to hedging fees.

5. Cross Investments

For the purposes of producing the combined financial statements, investments by Sub-Funds within the Company in the shares of other Sub-Funds within the Company, also known as "Cross Investments" must be eliminated in order to prevent double counting.

In preparing the combined Statement of Financial Position, the value of financial assets at FVTPL of the Company is reduced by the value of all Cross Investments as at 30 June 2026 and 30 June 2025. In preparing the combined Statement of Comprehensive Income, the Net gain/(loss) from financial instruments at FVTPL, is reduced by the amount of realised and unrealised gains and losses earned during the financial year on such Cross Investments.

The following table details the Cross Investments within the Sub-Funds of the Company at 30 June 2026 and 30 June 2025.

30 June 2026

Shareholders. This transfer and the associated issue of shares relates to the completion of a UCITS merger in accordance with the UCITS Regulations during the financial year ended 30 June 2026.

Axiom Global Small Cap Equity Fund, as the receiving fund in a UCITS merger, accepted an in-specie transfer of assets during the financial year ended 30 June 2026 amounting to US$ 45,378,444, which included cash of US$ 2,288,523, receivables for securities sold of US$ 314,191 and other assets of US$ 9,338, in exchange for the issue of shares to Shareholders. This transfer and the associated issue of shares relates to the completion of a UCITS merger in accordance with the UCITS Regulations during the financial year ended 30 June 2026.

Mercer Frontier Markets Debt Fund accepted an in-specie transfer of assets during the financial year ended 30 June 2026 amounting to US$ 274,701,325, which included cash of US$ 48,489,150. This transfer relates to a subscription and a redemption to and from the Sub-Fund made during the financial year ended 30 June 2026.

Catholic Responsible Investments Global Bond Fund, as the receiving fund in a UCITS merger, accepted an in-specie transfer of assets during the financial year ended 30 June 2026 amounting to US$ 227,839,532, which included cash of US$ 4,931,434 and other assets and liabilities of US$ 2,503,179, in exchange for the issue of shares to Shareholders. This transfer and the associated issue of shares relates to the completion of a UCITS merger in accordance with the UCITS Regulations during the financial year ended 30 June 2026.

Catholic Responsible Investments Global Equity Fund, as the receiving fund in a UCITS merger, accepted an in-specie transfer of assets during the financial year ended 30 June 2026 amounting to US$ 445,293,430, which included cash of US$ 2,335,008 and other assets of US$ 287,565, in exchange for the issue of shares to Shareholders. This transfer and the associated issue of shares relates to the completion of a UCITS merger in accordance with the UCITS Regulations during the financial year ended 30 June 2026.

30 June 2025

Mercer Passive Global Equity Fund actioned an in-specie transfer of assets during the financial year ended 30 June 2025 amounting to US$ 1,633,237,121, which included cash of US$ 57,773,556. This transfer relates to a redemption from the Sub-Fund made during the financial year ended 30 June 2025.

Mercer Passive Universal Global Equity Fund accepted an in-specie transfer of assets during the financial year ended 30 June 2025 amounting to € 1,512,606,227, which included cash of € 53,506,402. This transfer relates to a subscription to the Sub-Fund made during the financial year ended 30 June 2025.

7. Interests in unconsolidated structured entities

The Company meets the definition of an Investment Entity under IFRS 10 and therefore does not consolidate any investments. IFRS 12 requires disclosures around “Unconsolidated Structured Entities”.

IFRS 12 defines a structured entity as an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to the administrative tasks only and the relevant activities are directed by means of contractual agreements. Disclosures are required where an interest is held in a structured entity and where, for example, the investor has been involved in the setting up of the structured entity and the investor would have exposure to potential losses or costs over and above the amount actually invested.

Where it is within their investment objectives, at 30 June 2026 and 30 June 2025 the Sub-Funds held various investments in asset backed securities (“ABS”), mortgage backed securities (“MBS”) and investment funds. The fair value of the ABS and MBS is recorded in the Transferable securities line and the investment funds are recorded in the Investment funds line in the Statement of Financial Position. All gains and losses are recognised as part of Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income. The carrying value of these investments is equivalent to fair value, and the Sub-Fund’s maximum exposure to loss from these investments is equal to their total fair value. Once a Sub-Fund has disposed of its holding in any of these investments, the Sub-Fund ceases to be exposed to any risk from that investment.

At 30 June 2026 and 30 June 2025, there were no significant restrictions on the ability of the structured entity to transfer funds to the Company in the form of redemption of the shares held by the Company. The Company has no commitments or intentions to provide financial support or other support to the structured entity.

7. Interests in unconsolidated structured entities (continued)

The Sub-Funds have concluded that ABS, MBS and CIS in which they invest, but that they do not consolidate, meet the definition of structured entities because:

- the voting rights in these entities are not the dominant rights in deciding who controls them, as they relate to administrative tasks only;
- each entity's activities are restricted by its Prospectus; and
- the entities have narrow and well-defined objectives to provide investment opportunities to investors.

The table below describes the type of unconsolidated structured entities, nature, purpose and interest held by the Sub-Funds.

Type of structured entity	Nature and purpose	Interests held by the Sub-Fund
ABS	Allow issuers to generate cash, which can be used for more lending, while giving investors in the ABS the opportunity to participate in a wide variety of income-generating assets.	Investment in ABS
MBS	An investment similar to a bond that is made up of a bundle of home loans bought from the banks that issued them. Investors in MBS receive periodic payments similar to bond coupon payments.	Investment in MBS
CIS	To manage assets on behalf of third party investors. These vehicles are financed through the issue of units to investors.	Investment in units issued by the funds

The table below sets out the interests held by the Sub-Funds in ABS at 30 June 2026.

30 June 2026

Investment in ABS

Sub-Fund	Currency of Sub-Fund	Total debt issued by the Structured Entity	No. of securities held	Carrying amount included in "Financial assets at FVTPL"	% of Total debt held in the underlying Structured Entity

*Based on the latest available Net Assets of the Structured Entities where each underlying fund is considered a structured entity.

As at 30 June 2025, there were no significant restrictions on the Sub-Fund's ability to dispose of holdings in the above listed unconsolidated structured entities.

7. Interests in unconsolidated structured entities (continued)

30 June 2025 (continued)

Investment in CIS (continued)

The table below sets out holdings held by the Sub-Funds in unconsolidated structured entities greater than 50% at 30 June 2025.

Investing Sub-Fund	Name of investee	Place of business	% of ownership
Mercer Diversified Growth Fund	MGI Funds plc - Mercer USD Cash Fund - Class Z1-0.0000 $	Ireland	51.11
	Mercer UCITS Common Contractual Fund - Mercer Passive Global REITS UCITS CCF - Class Z1-0.0000 $	Ireland	60.94
	Mercer UCITS Common Contractual Fund - Mercer Passive Climate Transition Listed Infrastructure UCITS CCF - Class Z1-0.0000 $	Ireland	62.78

Although the Sub-Funds hold more than 50% of the underlying entity, the Sub-Funds do not have sufficient power to affect the returns of the underlying structured entities.

8. Taxation

The Company is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. Therefore, the Company will not be liable to Irish tax in respect of its income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution payments to Shareholders or any encashment, redemption or transfer of shares or the ending period for which the investment was held.

Generally, a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or the ending of a 'Relevant Period'. A 'Relevant Period' is an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event may not arise in respect of:

(i) a Shareholder who is not an Irish resident and not ordinarily resident in Ireland at the time of the chargeable event, provided the necessary signed statutory declarations are held by the Company;
(ii) certain exempted Irish tax resident Investors who have provided the Company with the necessary signed statutory declarations;
(iii) an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another fund;
(iv) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland;
(v) certain exchanges of shares between spouses and former spouses on the occasion of judicial separation and/or divorce;
(vi) an exchange by a Shareholder, effected by way of an arm's length bargain where no payment is made to the Shareholder of Shares in the Company for other Shares in the Company.

There were no chargeable events during the financial year ended 30 June 2026 and 30 June 2025.

Capital gains, dividends and interest (if any) received on investment made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders.

In the absence of an appropriate declaration, the Company will be liable for Irish tax on the occurrence of a chargeable event, and the Company reserves its right to withhold such taxes from the relevant Shareholders.

The Sub-Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

Withholding tax expense incurred by the Company during the financial year amounted to € 73,442,203 (30 June 2025: € 68,439,180). Capital gains tax incurred by the Company during the financial year amounted to € 2,549,416 (30 June 2025: € 17,335,714).

9. Financial instruments and associated risks

Introduction and overview

The investments of a Sub-Fund in securities and derivatives is subject to normal market fluctuations and other risks inherent in investing in securities and derivatives. In pursuing its investment objectives, the Company holds a number of investments, including:

- Equities;
- Investment funds;
- Bonds, MBS, ABS and other debt instruments;
- TBAs;
- Loans;
- Cash and liquid resources;
- Swaps, futures, warrants, options, swaptions, bond forward contracts and forward foreign currency contracts;
- Money market instruments;
- Deposits; and
- Repurchase agreements and reverse repurchase agreements.

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and equity price risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Sub-Funds' financial performance. The Company has maintained its aim of spreading investment risk during the financial year.

The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and relevant Supplement for a more detailed discussion of the risks inherent in investing in the Company.

The Directors review reports received from the relevant Designated Persons of the Manager in relation to the Sub-Funds' performance and risk profile on a quarterly basis or more frequently as required. The Company delegates to the Manager, who in turn delegates to the Investment Manager responsibility for ensuring that the Sub-Funds of the Company are managed in accordance with the terms of each Sub-Fund's investment objective, policy, guidelines and limits as set out in the Prospectus and relevant Supplement, as well as the Investment Manager's own internal investment guidelines and limits.

Risk management framework

The Company's Depositary is responsible for independent day to day monitoring of compliance of each Sub-Fund's investment guidelines and limits, reporting any breaches to the Manager, Investment Manager or Company, as appropriate. These guidelines and limits are set to ensure that the risk borne by each Sub-Fund is appropriate. In addition, the Investment Manager reviews and monitors risk, exposure and performance from internally generated analysis using data fed directly from the Depositary, and this is supplemented with data received directly from the Sub-Investment Managers.

Role of the Investment Manager

The Investment Manager has responsibility for the on-going monitoring of investments within each of the Sub-Funds of the Company. This includes, but is not limited to, reviewing information on stale and static prices, suspended securities and securities in liquidation and securities valued at cost. If the Investment Manager has reasonable belief that the valuation of a particular security may not reflect fair market value, the VC will meet to consider the appropriate valuation of the security in question.

Further to this, the Investment Manager has responsibility for the selection and monitoring of the Sub-Investment Managers. To that end, the Investment Manager follows a well defined and rigorous due diligence review of each Sub-Investment Manager. As part of this process the Investment Manager will review the proposed use of FDIs and ensure they are captured under the Risk Management Process ("RMP"). Additionally, Sub-Investment Managers will agree with the Investment Manager that their use of FDIs will comply with the provisions of the RMP. Any material deviations to a Sub-Investment use of FDI and RMP require the prior notification of and approval of the Investment Manager. This is a condition of the investment or currency management agreements with the Sub-Investment Managers. Each Sub-Investment Manager must complete annual compliance questionnaires and are subject to periodic compliance reviews by the Compliance Group of the Investment Manager.

The portfolio managers within the Investment Manager monitor the Sub-Funds on an ongoing basis. Daily monitoring is in place to ensure Sub-Investment Managers are only using derivatives for which they have been given permission to use and also that they comply with global exposure and counterparty risk exposure restrictions.

9. Financial instruments and associated risks (continued)

Role of Sub-Investment Managers

As mentioned above, discretionary investment management has been outsourced to the Sub-Investment Managers. In addition to the oversight and independent monitoring being carried out by the Investment Manager, Administrator and Depositary, each Sub-Investment Manager must have adequate controls and procedures in place to manage their respective portfolios within the limits prescribed under the UCITS Regulations and the Central Bank guidance in respect of FDIs.

Each Sub-Investment Manager must have a robust RMP in place which is UCITS V compliant. As outlined in the various Sub-Investment Managers' RMP documents, each Sub-Investment Manager must manage its portfolio in accordance with the UCITS Regulations and the Central Bank's guidance on FDIs. Furthermore, the Sub-Investment Managers will only use the FDIs outlined in their respective RMPs. If a Sub-Investment Manager wishes to use a FDI not covered by the existing RMP, this change will necessitate an amendment to their RMP document and, by implication, the Sub-Fund's RMP. This will require the approval of the Central Bank before the FDI can be used.

Permanent Risk Management Function

The Manager has appointed a Head of Risk Management and Designated Persons (the "Designated Persons") for the Managerial Functions* of Operational Risk Management and Fund Risk Management. Together these Designated Persons and Head of Risk constitute the Company's Permanent Risk Management Function ("PRMF") and are responsible for the implementation of their respective obligations under the risk management policy, framework and procedures.

Market risk

(i) Market price risk

Market price risk results mainly from the uncertainty about the future prices of financial instruments held. It represents the potential loss a Sub-Fund may suffer through holding market positions in the face of market movements and changes in exchange rates.

All Sub-Funds' investments present a risk of loss of capital. The Investment Manager and Sub-Investment Managers moderate this risk by ensuring careful selection of securities and other financial instruments within the specified limits as detailed in the Prospectus and approved by the Directors.

Market risk is controlled and monitored through the application of pre-agreed portfolio control ranges which cover attributes such as asset allocation, duration, yield curve and liquidity. The Investment Manager uses historic data to measure market risk, which is controlled relative to the benchmark.

The following tables highlight the market price risk associated with the various financial instruments held by the Company. The market price risk of futures is shown separately. If the price of each of the Sub-Fund's underlying investments to which the relevant Sub-Fund had exposure at 30 June 2026 and at 30 June 2025 had increased by 5%, with all other variables held constant, the impact is as shown in the tables below. Conversely, if the price of each of the Sub-Fund's underlying investments to which the relevant Sub-Fund has exposure had decreased by 5%, this would have an equal but opposite effect on net assets attributable to holders of redeemable participating shares of the relevant Sub-Fund.

Sub-Fund	Sub-Fund Ccy	Fair Value 30 Jun 2026	Impact of 5% price increase 30 Jun 2026	Fair Value 30 Jun 2025	Impact of 5% price increase 30 Jun 2025

9. Financial instruments and associated risks (continued)

Market risk (continued)

(ii) Foreign currency risk

Foreign currency risk arises on financial instruments that are denominated in a foreign currency i.e. in a currency other than the functional currency in which they are measured. The value of the Company's investments can be affected by currency translation movements as some of the assets and income may be denominated in currencies other than the base or functional currency of the Company. Shares are issued and redeemed in Australian Dollar, British Pound, Canadian Dollar, Euro, Japanese Yen, Norwegian Krone, Singapore Dollar, Swedish Krona, Swiss Franc and United States Dollar. A portion of the financial assets/net assets of the Sub-Funds are denominated in currencies other than base currency with the effect that the Statement of Financial Position and total returns can be significantly affected by currency movements. The Company is therefore exposed to currency risk, as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates.

The Investment Manager has identified three principal areas where foreign currency risk could impact the Company:

- movements in exchange rates affecting the value of investments;
- movements in exchange rates affecting the income received; and
- movements in exchange rates affecting the holders of redeemable participating shares in currencies other than the operational currency of the relevant Sub-Fund.

Currency exposure is monitored closely and is considered to be part of the overall investment process. Currency forwards may be used to ensure that the currency exposure of a Sub-Fund is in line with its investment objectives. The Sub-Funds may receive income in currencies other than its base currency and the base value can be affected by movements in exchange rates. Sub-Funds with hedged Share Classes may receive subscriptions or pay redemptions in currencies other than its base currency.

The Investment Manager, or a Sub-Investment Manager, may hedge the foreign currency exposure of classes denominated in a currency other than the base currency of a Sub-Fund in order that investors in that class receive a return in the currency of that class substantially in line with the investment objective of the Sub-Fund. As foreign exchange hedging may be utilised for the benefit of a particular class, transactions will be clearly attributable to that class and the cost and related liabilities and/or benefits shall be for the account of that class only. Accordingly, such costs and related liabilities and/or benefits will be reflected in the NAV per share for shares of any such class.

Per IFRS 7, currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. However, it is the Company's policy that foreign exchange risk is monitored and managed by the Sub-Investment Managers for both monetary and non-monetary assets and liabilities and that the overall exposure is reviewed by the Board of Directors.

In line with the Prospectus, in some cases the Company manages the Sub-Funds' exposure to foreign exchange movements by entering into foreign exchange hedging transactions, while in others the Company elects not to hedge the foreign currency risk but take the effect of the exposure.

9. Financial instruments and associated risks (continued)

Market risk (continued)

(ii) Foreign currency risk (continued)

The table below summarises the foreign currency risk exposure of the Sub-Funds' assets and liabilities, monetary and non-monetary, and reflects the way the risk is monitored and managed. The sensitivity illustrates the impact of a 5% exchange rate increase or decrease between the functional currency and the monetary assets and monetary liabilities denominated in foreign currency relevant to the Sub-Funds. Sensitivity is based on the assumption that all other variables remain constant. The impact on the Sub-Funds is the change in the NAV of the Sub-Funds in terms of the functional currency of the Sub-Funds. The tables show only the Sub-Funds and currencies with a significant foreign currency risk sensitivity greater than +/- 1% of the Sub-Funds' NAV.

Hedge forward foreign currency contracts represent forward foreign currency contracts used to hedge exposure on a Share Class. Non-hedge forward foreign currency contracts are used for investment purposes.

Share Class hedging

In respect of the Share Classes, it is the Sub-Funds' intention, where practicable, to hedge the currency exposure of holders of such classes. The adoption of this strategy may substantially limit holders of these classes from benefiting if the class currencies fall against the base currency of the Sub-Fund and/or against the other currencies in which the assets of the Sub-Funds are denominated. All costs, gains and losses of such hedging transactions will accrue solely to the holders of the hedged Share Classes. The strategy is undertaken and managed on behalf of the Sub-Funds by the Investment Manager/Sub-Investment Managers.

The exchange rate used for the purpose of converting the proceeds of trades in the Australian Dollar hedged classes, Euro hedged classes, British Pound hedged classes, Japanese Yen hedged classes, Norwegian Krone hedged classes, Swedish Krona hedged classes, Singapore Dollar hedged classes and United States Dollar hedged classes to or from the base currency of the Sub-Fund is likely to be the rate prevailing at the time the necessary currency hedging contracts are put in place which means that this exchange rate risk is borne by those transacting investors rather than by the other investor in the Sub-Funds.

(iii) Interest rate risk

Interest rate risk profile and sensitivity analysis

Interest rate risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

9. Financial instruments and associated risks (continued)

Market risk (continued)

(iii) Interest rate risk (continued)

Interest rate risk profile and sensitivity analysis (continued)

The Company's interest-bearing financial assets and liabilities expose it to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The Company invests some of its assets in equities, investee funds and open forward foreign currency contracts, none of which pay interest. As a result, the Company is subject to limited risk due to fluctuations in the prevailing levels of market interest rates on these investments.

To the extent that the underlying funds in which the Sub-Funds invest are themselves invested in other collective investment schemes, the underlying investment funds may be exposed to interest rate fluctuations arising from portfolios of such collective investment schemes.

The Sub-Funds may invest in inflation-linked bonds. Inflation-linked bonds are fixed income securities whose principal value is adjusted periodically according to the rate of inflation. Index-linked gilts differ from conventional gilts in that both the semi-annual coupon payments and the principal payment are adjusted in line with movements in a specified index. They are designed to cut out the inflation risk of a bond.

The inflation-linked bonds held by the Sub-Funds are linked to movements in the below indices.

Australia	Australia Consumer Price Index
Brazil	Extended National Consumer Price Index (IPCA)
Canada	Canada Consumer Price Index
Colombia	Colombia Unit of Real Value
Japan	Japan Consumer Price Index

*Sub-Fund launched during the financial year ended 30 June 2026 therefore there is no comparative information.

The following tables summarises the interest rate sensitivity of each relevant Sub-Fund's exposure to interest rate risks. It includes each relevant Sub-Fund's assets and trading liabilities at fair values, categorised by the earlier of contractual re-pricing or maturity dates.

The Sub-Funds not mentioned below are mainly investing in non-interest bearing assets or its investments have a very short time to maturity. As a result, those Sub-Funds are not subject to significant amounts of risk due to fluctuations in the prevailing level of market interest rates.

The sensitivity analysis illustrates the impact on net assets attributable to holders of redeemable participating shares of reasonably possible changes in interest rates at the reporting date.

The Company has determined that a fluctuation in yield of 25 bps is reasonably possible, considering the economic environment in which the Sub-Funds operate. The table below sets out the effect on the Sub-Funds' net assets attributable to holders of redeemable participating shares of a reasonably possible reduction of 25 bps in yield at 30 June 2026. An increase in yield of the same amount would have resulted in a similar but opposite effect to the amounts shown. The impact of such an increase or reduction has been estimated by calculating the fair value changes of the fixed-interest debt securities and other fixed-interest bearing assets less liabilities and FDIs. This impact is primarily from the change in the fair value of fixed income securities. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

Liquidity risk

The Company's assets comprise mainly of realisable securities and investments in investment funds. The Company's main liability and exposure is to daily cash redemptions of redeemable shares. Assets from a Sub-Fund may need to be sold if insufficient cash is available to finance such redemptions. It therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of.

The Sub-Funds may, from time to time, invest in derivative contracts traded OTC, which are not traded in an organised market and may be less liquid. As a result, the Sub-Funds may not be able to liquidate these as quickly as its cash investments at an amount which represent their fair value. However, this will be managed as mentioned below and would always be a small proportion of a portfolio.

The majority of assets held by the Sub-Funds are negotiable securities. The ability to sell on demand ensures that the Investment Manager can efficiently alter the investment strategy as required. The ability to sell also permits the financing of any unexpected withdrawals from a portfolio. It is important that these assets are readily tradeable and the Investment Manager will ensure that assets are only held where an efficient secondary market is operating. From time to time the secondary market in any particular issue or market may become less liquid, so to minimise this risk the Manager will also ensure that a portfolio is well diversified. In some circumstances the markets in which the Sub-Funds trade can be illiquid, thereby making it difficult to acquire or dispose of investments at prices quoted on the relevant exchanges. In addition, suspension by an exchange of trading in a particular security could make it impossible for positions to be realised and thereby expose the Company to losses.

Investors in the Company may redeem daily or weekly in the case of Mercer UCITS Alternatives Strategies. The Company may, if it receives a request for the repurchase of shares in respect of 10% or more of the outstanding shares of any Sub-Fund, elect to restrict the total number of shares repurchased to 10% or more of the outstanding shares, in which case, redemption requests will be scaled down pro rata and the balance of outstanding redemption requests shall be treated as if they were received on each subsequent dealing day until all the shares to which the original request related have been redeemed. Redemption requests can also be met, following approval by the Directors and agreement with the relevant Shareholder, through a transfer of assets of the Sub-Fund in-specie to the relevant Shareholder.

The Investment Manager carries out a liquidity analysis at least on a quarterly basis. Additional analyses are completed as required, particularly during times of market stress. The liquidity analysis is then reviewed by the Investment Risk Management Committee and Fund Risk Committee. This liquidity analysis incorporates specific liability stress scenarios, which assess the ability of the asset liquidity profile to meet stressed investor redemptions, taking investor concentration into consideration. In the event that these stress tests indicate that investors' stressed liquidity requirements may exceed

9. Financial instruments and associated risks (continued)

Liquidity risk (continued)

the asset liquidity capacity, this will be escalated and brought to the attention of the Manager and Board of Directors as a Key Risk Indicator, alongside analysis and commentary as well as any remedial action proposed. The liquidity of pooled Sub-Funds has been derived with consideration of redemption notification, dealing and settlement terms, in line with the European Securities and Markets Authority ("ESMA"). For segregated accounts, a liquidity scoring methodology is used based on trading volume data. The Manager and Board of Directors has also approved a procedure document with respect to the application of Liquidity Management Procedures in exceptional circumstances. The procedure document sets out the Liquidity Management Tools ("LMTs") used both in the ordinary course of business and exceptional circumstances. The procedure document also outlines the course of action the Manager and Board of Directors will take in the instance of an exceptional liquidity event. The Manager and Board of Directors have also approved a Liquidity Stress Testing Policy. This procedure document outlines the mechanisms by which Fund Liquidity Stress Testing is undertaken, in compliance with the ESMA Guidelines on Liquidity Stress Testing in UCITS and AIFs (the "Liquidity Guidelines").

All liabilities of the Sub-Funds at 30 June 2026 and 30 June 2025 including the net assets attributable to redeemable participating Shareholders are due within one month with the exception of the following.

Sub-Fund	Ccy	Liquidity Profile (%) 5 Day	10 Days	20 Days	25 Days
Mercer UCITS Alternatives Strategies	€	60	91	100	100

The liquidity buckets shown are in line with the dealing cycles of the Sub-Funds. As all Sub-Funds are daily traded, the buckets are grouped to show the liquidity profile of each Sub-Fund from 1 day onwards. There is no guarantee that this level of liquidity will be maintained.

The liquidity profile has been calculated on a maximum liquidity basis. Maximum liquidity is an approach to liquidity where securities are sold based on maximum available amount of assets that can be sold on each business day by Sub-Fund.

Credit risk

The Company takes on exposure to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Company has counterparty risk in relation to transactions it enters into with brokers, banks and other third parties if the counterparty was to fail to complete any transaction to which the Company is a party.

The Company delegates counterparty selection and management to the Sub-Investment Managers. The Company delegates all derivative trading to the Sub-Investment Managers, who are responsible for trading within agreed investment guidelines and ensuring pre-trade compliance with applicable regulations. During the negotiation of these investment guidelines, the use of derivatives will be discussed, and if deemed appropriate, then the exact derivatives to

9. Financial instruments and associated risks (continued)

Credit risk (continued)

be permitted in the Sub-Funds will be outlined. Derivative use outside of these limits is not permitted, which is monitored by daily compliance reports reviewed by the Company.

As part of the operational risk assessment ("ORA"), due diligence is performed on each Sub-Investment Manager prior to their appointment. Counterparty controls are reviewed as part of this ORA. Each Sub-Investment Manager must achieve an acceptable ORA rating before being appointed.

(i) Credit quality analysis
The Company has a credit risk exposure to the Depositary and sub-custodian in relation to cash.

Cash balances and bank overdrafts are held by State Street Bank, London which had a credit rating of AA- at the financial year ended 30 June 2026 (30 June 2025: AA-).

Cash balances held in US Dollar bank accounts with State Street Bank, London automatically transfer into overnight deposit accounts held by State Street Cayman Trust Company Ltd., Cayman Islands, which had a credit rating of A- at the financial year ended 30 June 2026 (30 June 2025: A-).

State Street Bank International GmbH, the Collateral Manager/Secured Party, had a credit rating of AA- at the financial year ended 30 June 2026 (30 June 2025: AA-).

Margin cash
Margin cash balances at 30 June 2026 and 30 June 2025 were as follows.

Credit rating	30 Jun 2026 €	30 Jun 2025 €
AA-	30,996	(44,307)
A+	78,248,715	17,470,885
A	7,297,686	5,076,130
A-	(120,000)	-
	85,457,397	22,502,708

Cash collateral
In addition to the above, the following amounts were pledged or held as cash collateral 30 June 2026 and 30 June 2025.

Credit rating	30 Jun 2026 €	30 Jun 2025 €
AA-	3,276,773	(2,614,790)
A+	35,477,846	15,346,411
A	62,271	(11,690,121)
BBB+	-	949,679
	38,816,890	1,991,179

Repurchase and reverse repurchase agreements
The Company held repurchase agreements at the financial year end 30 June 2026. For repurchase agreements, the Sub-Fund can use the cash proceeds received to make additional investments, which can cause the Sub-Fund's portfolio to behave as if it was leveraged. If the buyer in a repurchase agreement files for bankruptcy or becomes insolvent, the Sub-Fund may be unable to recover the securities it sold or pledged as collateral and as a result would realise a loss equal to the difference between the value of those securities and the cost. In the event of a buyer's bankruptcy or insolvency, the Sub-Fund's use of proceeds from the sale of its securities may be restricted while the other party or its trustee or receiver determines whether to honour the Sub-Fund's right to repurchase the securities.

The Company is exposed to credit risk on reverse repurchase agreements. Reverse repurchase agreements are collateralised by an individual security. Securities purchased under agreements to resell are valued at fair value and adjusted for any movements in foreign exchange rates. Interest rates vary for each reverse repurchase agreement and are set at the initiation of the agreement. The Company will generally obtain additional collateral if the market value of the underlying securities is less than the face value of the reverse repurchase agreements plus any accrued interest. In the event of default on the obligation to repurchase, the Company has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. In the event of default or bankruptcy by the counterparty to the agreement, realisation and/or retention of the collateral or proceeds may be subject to legal proceedings. Collateral received in respect of reverse repurchase agreements is comprised of government issued fixed income securities.

9. Financial instruments and associated risks (continued)

Credit risk (continued)

(i) Credit quality analysis (continued)

Repurchase and reverse repurchase agreements (continued)

The amounts payable under the repurchase agreements and receivable under reverse repurchase agreements and the market value of net collateral in respect of these agreements held at the financial year ended 30 June 2026 and 30 June 2025 are as follows.

	30 Jun 2026 €	30 Jun 2025 €
Receivables from reverse repurchase agreements	103,249,445	109,717,805
Payable for repurchase agreements	(74,956,554)	(135,053,037)
Fair value of net collateral in respect of repurchase and reverse repurchase agreements*	(30,337,013)	22,466,203

*Further information on repurchase and reverse repurchase agreements can be found in the Unaudited Supplemental Information section of the financial statements and for each Sub-Fund in the relevant Portfolio Statement.

Loans

The Company may invest in investments such as loans or participations which typically would result in the Sub-Fund having a contractual relationship only with the lender, not with the borrower. In purchasing participations, the Sub-Fund generally will not have the right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and a Sub-Fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, a Sub-Fund would assume the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, a Sub-Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. There were no participations held by the Sub-Funds as at 30 June 2026 and 30 June 2025.

At 30 June 2026, the Company held investments in loans with a fair value € 46,239,304 (30 June 2025: € 18,786,508). The following table details the credit ratings attaching to the loans held at 30 June 2026 and 30 June 2025.

Credit rating	30 Jun 2026 €	30 Jun 2025 €
AA-	1,486,818	2,674,233
A+	13,676,290	2,105,471
A	25,024,478	5,510,322
BBB+	469,100	1,854,633
Not rated	5,582,618	6,641,849
	46,239,304	18,786,508

FDIs

The Company is exposed to counterparty risk on its derivative positions, being the risk that a counterparty will default or be unable to pay in full its financial obligations. Controlling credit risk is paramount in the Sub-Investment Manager's choice of counterparties. Credit risk arises from receivables due from investee funds, particularly in situations involving redemptions or transactions awaiting settlement. Credit risk relating to unsettled receivables is considered small due to short settlement period involved and the due diligence permitted on the investee funds. The maximum exposure related to unsettled trades equals the amount shown in the Statement of Financial Position. There are no past due or impaired assets as at 30 June 2026 or at 30 June 2025.

Swaps are subject to the counterparty's credit risk: the chance that the other party in the contract will default on its responsibility. Derivative transactions are transacted on exchanges, with central clearing counterparties ("CCPs") or entered into under International Swaps and Derivatives Association ("ISDA") master agreements. In general, under these agreements, in certain circumstances e.g. when a credit event such as a default occurs, all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty. Further analysis of the Sub-Funds' master netting arrangements is disclosed under "Offsetting financial assets and financial liabilities" section of this note. The Company also mitigates the credit risk of FDIs by holding collateral in the form of cash and marketable securities.

*Sub-Fund terminated during the financial year ended 30 June 2026.

State Street Bank and Trust Company, London Branch, the Securities Lending Agent, had a credit rating of AA- as at 30 June 2026 (30 June 2025: AA-).

Debt securities

The Company invests in debt securities such as ABS, convertible securities, corporate bonds, government bonds, loans, MBS, municipal bonds and TBA. A Sub-Fund will have a credit risk on the issuer of debt securities in which it invests which will vary depending on the issuer's ability to make principal and interest payments on the obligation. Not all of the securities in which a Sub-Fund may invest that are issued by sovereign governments or political subdivisions, agencies or instrumentalities thereof, will have the explicit full faith and credit support of the relevant government. Any failure by any such government to meet the obligations of any such political subdivisions, agencies or instrumentalities will have adverse consequences for a Sub-Fund and will adversely affect the NAV per share in a Sub-Fund.

(iii) Amounts arising from ECL

Impairment on cash and cash equivalents, balances due from brokers and receivables from reverse sale and repurchase agreements has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that these exposures have low credit risk based on the external credit ratings of the counterparties.

The Investment Manager monitors changes in credit risk on these exposures by tracking published external credit ratings of the counterparties. To determine whether published ratings remain up to date and to assess whether there has been a significant increase in credit risk at the reporting date that has not been reflected in the published ratings, the Company supplements this by reviewing changes in bond yields, where available, CDS prices together with available press and regulatory information about counterparties.

Loss given default parameters generally reflect an assumed recovery rate of 40%. However, if the asset were credit impaired, then the estimate of loss would be based on a specific assessment of expected cash shortfalls and on the original effective interest rate.

No amounts have been recognised in terms of ECL for the financial year ended 30 June 2026 and 30 June 2025.

Offsetting financial assets and financial liabilities

Offsetting and amounts subject to master netting arrangement and similar agreements

Each Sub-Fund is a party to various master netting agreements. While the terms and conditions of these agreements may vary, all transactions under any such agreement constitute a single contractual relationship. Each party's obligation to make any payments, deliveries or other transfers in respect of any transaction under such an agreement may be netted against the other party's obligations under such agreement. A default by a party in performance with respect to one transaction under such an agreement would give the other party the right to terminate all transactions under such agreement and calculate one net amount owed from one party to the other.

9. Financial instruments and associated risks (continued)

Offsetting financial assets and financial liabilities (continued)

Offsetting and amounts subject to master netting arrangement and similar agreements (continued)

At 30 June 2026 the amount that is due to be paid to, or received from the relevant brokers, on the morning after the close of a trading session is reflected as a due from broker or due to broker, as applicable, in the Statement of Financial Position. The movement of variation margin between the Sub-Funds and the respective brokers usually occurs the morning after the close of a trading session, and therefore at the end of each day, the total value of a trading account may be greater or less than the initial margin requirement by an amount equal to the current day's net change in unrealised gain or loss of the FDIs respective trading account to move either above or below the initial margin requirement. On a daily basis the Sub-Funds will pay or receive cash in an amount that will bring the total value of each trading account back in line with the respective initial margin requirement. Such receipts or payments of cash are known as variation margin.

Upon entering into a centrally cleared derivative contract the Sub-Fund may pledge cash and/or securities to a trading account as collateral to a central clearing house, through a broker, in accordance with the initial margin requirements of the central clearing house. Exchange-traded and centrally cleared derivatives contracts are valued at least daily, and as such, the net appreciation or depreciation of the derivative contracts causes the value of the respective trading account to move either above or below the initial margin requirement. On a daily basis the Sub-Funds will pay or receive cash in an amount that will bring the total value of each trading account back in line with the respective initial margin requirement. Such receipts or payments of cash are known as variation margin. The movement of variation margin between the Sub-Funds and the respective brokers usually occurs the morning after the close of a trading session, and therefore at the end of each day, the total value of a trading account may be greater or less than the initial margin requirement by an amount equal to the current day's net change in unrealised appreciation or depreciation of the derivative contracts. At reporting year end, the amount that is due to be paid to, or received from the relevant brokers, on the morning after the close of a trading session is reflected as a variation margin receivable or variation margin payable, as applicable, in the Statement of Financial Position.

IRS and CDS settle on a net basis and the net inflows/(outflows) are represented by the unrealised gain/(loss).

For certain Sub-Funds the legal right to offset may be at the Sub-Fund level as opposed to the Sub-Investment Manager level. The tables are prepared at the Sub-Investment Manager level to ensure a prudent approach for financial reporting purposes, except that forward foreign currency contracts held with State Street Bank and Trust disclosed at Sub-Fund level.

The following tables present the Sub-Funds' derivatives, repurchase agreements and reverse repurchase agreements by net exposure to each counterparty at Sub-Investment Manager level and any related collateral pledged/received and margin cash as at 30 June 2026.

Warrants are not included in the tables above.

Concentration risk

The Investment Manager reviews the concentration of securities held based on industries and geographical location.

The Company's exposure to industries above 5% of the NAV at 30 June 2026 and 30 June 2025 is set out in the table below.

	30 Jun 2026 % of NAV	30 Jun 2025 % of NAV
Communications	6.35	6.27
Financials	11.23	11.21
Industrials	5.38	-
Non-Cyclical Services	7.36	7.65
Sovereign Debt	15.03	17.13
Technology	12.46	7.99

Emerging markets risk

The Company invests in equities and bonds in emerging markets* and also in investment funds investing in emerging markets. It should be appreciated that liquidity and settlement risks may not provide the same degree of Shareholder protection or information to investors as would generally apply internationally.

*Those countries set out in the Morgan Stanley Capital International or other reputable global index provider, Emerging Markets indices and/or such other markets as the Directors may from time to time determine.

Leverage risk

Any leverage resulting from the use of FDIs and efficient portfolio management ("EPM") techniques are in accordance with the requirements of the Central Bank and will not exceed 100% of the NAV of the Sub-Fund, with the exception of those Sub-Funds detailed on pages 259- 260.

The Investment Manager monitors the assets of each Sub-Fund to ensure that global exposure and leverage, at all times, remains within the limits set by the Central Bank. The commitment approach is used to calculate global exposure on all Sub-Funds which use derivatives, with the exception of Mercer Short Duration Global Bond Fund 1, Mercer Short Duration Global Bond Fund 2, Mercer Global Credit Fund, Mercer Absolute Return Fixed Income Fund, Mercer Investment Fund 6, Mercer Short Duration Bond Fund 3, PIMCO Global Aggregate Bond Fund, Acadian Global High Yield Bond Fund and Catholic Responsible Investments Global Bond Fund which use the Value at Risk ("VaR") method.

In accordance with the Commitment Approach, global exposure is broadly defined as the total market value of the equivalent underlying to all of the FDIs entered into by a Sub-Fund VaR represents an estimate of the potential loss which

9. Financial instruments and associated risks (continued)

Leverage risk (continued)

might arise from unfavourable market movements if the current positions were to be held unchanged for 1 month, measured at a confidence level of 99%. VaR is a representation of the minimum expected loss, under normal market conditions at a given confidence level (99% in this case).

A VaR model has certain inherent limitations and it cannot be relied upon to predict or guarantee that the size or frequency of losses incurred by a Sub-Fund will be limited to any extent. As the VaR model relies on historical market data as one of its key inputs, if current market conditions differ from those during the historical observation period, the effectiveness of the VaR model in predicting the VaR of a Sub-Fund may be materially impaired.

The Company has employed a historical VaR. The methodology is based on full re-valuation across all asset classes. VaR is calculated in accordance with UCITS requirements, with the following parameters:

(i) one-tailed confidence interval of 99%;
(ii) holding period equivalent to 1 month (20 business days);
(iii) effective observation period (history) of risk factors of at least 1 year (250 business days). This is a rolling one year window looking back from the VaR calculation date such that the relevant historical data set is updated daily;
(iv) calculated daily and monitored daily versus VaR limit.

VaR utilisation measures the Sub-Funds' VaR relative to the Sub-Funds' VaR limit. The below table details the approach for each Sub-Fund, the minimum, maximum and median daily VaR utilisation that occurred during one year period ending 30 June 2026 and 30 June 2025 expressed as a percentage of the VaR limit.

Mercer Short Duration Global Bond Fund 1

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	11.32%	9.61%
Highest utilisation of the VaR limit	24.23%	20.00%
Median utilisation of the VaR limit	16.49%	12.29%

Mercer Short Duration Global Bond Fund 2

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	10.71%	10.83%
Highest utilisation of the VaR limit	24.25%	22.56%
Median utilisation of the VaR limit	19.30%	17.45%

Mercer Global Credit Fund

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	43.22%	42.87%
Highest utilisation of the VaR limit	56.76%	53.40%
Median utilisation of the VaR limit	49.33%	49.54%

Mercer Absolute Return Fixed Income Fund

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	5.12%	4.59%
Highest utilisation of the VaR limit	13.91%	20.99%
Median utilisation of the VaR limit	8.54%	8.38%

Mercer Investment Fund 6

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	50.10%	40.64%
Highest utilisation of the VaR limit	79.70%	65.47%
Median utilisation of the VaR limit	58.64%	47.06%

Mercer Short Duration Bond Fund 3

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	13.14%	10.77%

9. Financial instruments and associated risks (continued)

Leverage risk (continued)

	30 Jun 2026	30 Jun 2025
Highest utilisation of the VaR limit	20.96%	19.77%
Median utilisation of the VaR limit	14.81%	13.93%

PIMCO Global Aggregate Bond Fund

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	48.63%	34.62%
Highest utilisation of the VaR limit	94.16%	69.63%
Median utilisation of the VaR limit	76.41%	48.75%

Acadian Global High Yield Bond Fund

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	35.09%	2.22%

Catholic Responsible Investments Global Bond Fund*

	30 Jun 2026	30 Jun 2025
Lowest utilisation of the VaR limit	47.85%	-
Highest utilisation of the VaR limit	61.89%	-
Median utilisation of the VaR limit	51.77%	-

*Sub-Fund launched during the financial year ended 30 June 2026 therefore there is no comparative information.

In accordance with the UCITS regulations, a Sub-Fund using VaR must disclose the level of leverage employed by the Sub-Fund during the financial year under review, calculated as the sum of the absolute value of notionals of the derivatives used. The leverage is calculated on a gross basis and does not take into account any netting and hedging arrangements that the Sub-Funds may have in place at any time, even though these arrangements may be used for risk reduction purposes. Therefore this calculation may not provide an accurate measure of the Sub-Funds' actual investment exposures. Below is the median daily level of leverage for each of the above Sub-Funds during the financial year ending 30 June 2026 and 30 June 2025.

Average leverage employed during the financial year as % of NAV

	30 June 2026	30 June 2025
Mercer Short Duration Global Bond Fund 1	112.23%	117.94%
Mercer Short Duration Global Bond Fund 2	276.56%	237.43%

Legal, tax and regulatory risk

Legal, tax and regulatory changes could occur at any time, during the existence of the Company which may adversely affect the Company. See Note 8 to the financial statements for details of taxation.

Taxation in the People's Republic of China ("PRC")*

The Company and the Investment Manager may be subject to PRC tax, directly or indirectly, in respect of the assets held through Stock Connect, Bond Connect and/or QFIs. The tax law and regulations of the PRC are constantly changing, and they may be changed with retrospective effect. Given the uncertainty surrounding the Company's potential PRC tax

9. Financial instruments and associated risks (continued)

Taxation in the People's Republic of China ("PRC")* (continued)

liabilities or reimbursement obligations, the NAV of a Sub-Fund on any Dealing Day may not accurately reflect such liabilities. However as at 30 June 2026 the risk of any changes to the current status in PRC is low.

*Tax Risk Disclaimer for MGI Funds plc on MGI Emerging Markets Equity Fund, MGI Passive Euro Bond Fund, MGI Global Bond Fund, MGI Global Equity Fund, MGI Emerging Markets Debt Fund, Mercer Global Small Cap Equity Fund, Mercer Low Volatility Equity Fund, Mercer Short Duration Global Bond Fund 2, Mercer Global Credit Fund, Mercer Passive Global Equity Fund, Mercer Passive Emerging Markets Equity Fund, Mercer Investment Fund 6, Mercer Global Select Equity Fund, PIMCO Global Aggregate Bond Fund, Arrowstreet Global Equity Fund, Mercer Passive Euro Corporate Bond Fund, Acadian China A Equity, Acadian Global Managed Volatility Equity, Acadian Emerging Market Enhanced Equity, Mercer Passive Universal Global Equity Fund, Axiom Emerging Markets Equity Fund, Catholic Responsible Investments Global Bond Fund, Catholic Responsible Investments Global Equity Fund, Acadian Global Equity III and Acadian Global Equity Ethical Values.

10. Fair values of financial instruments

Securities, CIS, money market instruments and FDIs are held at FVTPL. All other assets and financial liabilities are stated at amortised cost, which approximates fair value with the exception of redeemable participating shares which are stated at their redemption amount.

The fair value of the instruments that are not traded in an active market (for example, OTC derivatives) are estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value or another investment that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provide a reliable estimate.

Where the discounted cash flow techniques are used, estimated future cash flows are based on management's best estimate and the discount rate used is a market rate at the reporting date applicable for an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the reporting date. Fair values for unquoted equity instruments are estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer.

The fair value of derivatives that are not exchange traded are estimated at the amount that the Company would receive or pay to terminate the contract at the reporting date taking into account current market conditions and the creditworthiness of the counterparties.

Financial assets include investments in CIS. The fair value of such assets is based on the underlying fund administrator's calculation of the NAV per share (market value of the fund's assets less liabilities divided by the number of shares) which will be the latest bid price published by the CIS, taking into account any adjustments that may be required to account for illiquidity, low trading volumes or any such factors that may indicate that the bid price may not be fair value. The fair value of any investments in closed-ended investment funds is based on the bid prices available on the principal market for such security at the valuation date taking into account any adjustments that may be required to account for illiquidity, low trading volumes or any such factors that may indicate that the bid price may not be fair value. There were no adjustments or discounts applied in the valuation of any of the underlying investments in such CIS.

Under IFRS 13, the Company are required to classify assets and liabilities based on the fair value hierarchy, which reflects the significance of the inputs used in measuring their values. IFRS 13 establishes a fair value hierarchy that prioritises the inputs used in valuation techniques for measuring fair value. This hierarchy assigns the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements), and the lowest priority to unobservable inputs (Level 3 measurements). The fair value hierarchy under IFRS 13 consists of three levels:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly (that is, as prices) or indirectly (that is, derived from prices);

Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level within the fair value hierarchy in which the fair value measurement is categorised is determined based on the lowest level input that is significant to the measurement as a whole. In assessing the significance of an input, judgement is applied considering factors specific to the asset or liability. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, it is classified as a Level 3 measurement.

The determination of what constitutes "observable" requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

10. Fair values of financial instruments (continued)

For each class of assets and liabilities not measured at FVTPL in the Statement of Financial Position, but for which fair value is disclosed, IFRS 13 requires the Company to disclose the level within the fair value hierarchy to which the fair value measurement would be categorised along with a description of the valuation technique and inputs used in the technique. These financial instruments typically include short-term financial assets and financial liabilities, whose carrying amounts approximate fair value due to their short-term nature and the high credit quality of counterparties.

Cash and cash equivalents include deposits held with banks, cash due from broker, bank overdraft and other short-term investments in an active market and they are categorised as Level 1.

Reverse repurchase agreements and repurchase agreements are categorised as Level 2.

Receivables for investments sold, subscriptions receivable and other assets include the contractual amounts for settlement of trades and other obligations due to the Company. Payable for investments sold, redemptions payable and other expenses payables represent the contractual amounts and obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2.

The puttable value of redeemable shares is calculated based on the net difference between total assets and all other liabilities of each Sub-Fund within the Company in accordance with the Sub-Funds' offering memorandum. A demand feature is attached to these shares, as they are redeemable at the holders' option and can be put back to the Sub-Funds at any dealing date for cash equal to a proportionate share of the Sub-Fund's NAV attributable to the Share Class. The fair value is based on the amount payable on demand. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable shares.

Fair value hierarchy

The financial instruments at 30 June 2026 and 30 June 2025 are classified as follows.

	Level
ABS	2
Bond forward contracts	2
CDS	2

Transfers between levels of the fair value hierarchy occur when the pricing source or methodology used to price an investment changes which triggers a change in level as defined under IFRS 13. For the financial reporting purposes transfers are deemed to have occurred at the end of the financial year.

During the financial year ended 30 June 2026, transfers occurred from Level 2 to Level 1, as well as from Level 1 to Level 2. These transfers resulted from changes in the classification of investments between corporate bonds and government bonds and for certain investments due to entity shares in the primary market being suspended from trading.

During the financial year ended 30 June 2025, transfers occurred from Level 2 to Level 1, as well as from Level 1 to Level 2. These transfers resulted from changes in the classification of investments between corporate bonds and government bonds.

Transfers in and out of Level 3 are discussed after the Level 3 reconciliation tables below, where relevant.

Sub-Fund	Transfer	30 Jun 2026 Fair value	30 Jun 2025 Fair value

The table below outlines the breakdown of funds by the type of investments for which they hold Level 3 securities.

Investment type	Sub-Fund	Descriptions
Equity	MGI Emerging Markets Equity Fund Mercer European Equity Fund MGI Global Equity Fund Mercer Global Small Cap Equity Fund Mercer Global High Yield Bond Fund Mercer Passive Global Equity Fund Mercer Passive Emerging Markets Equity Fund Arrowstreet Global Equity Fund Mercer Investment Fund 21 - Global High Yield Bond Acadian China A Equity Acadian Global Managed Volatility Equity Acadian Global Managed Volatility Equity II Catholic Responsible Investments Global Equity Fund Acadian Global Equity III	Classified as Level 3 due to the inherent nature of these investments (i.e. private equity investments which are valued based on a number of valuation techniques). Additionally, there are equities classified as Level 3 due to unobservable inputs, often resulting from suspension, being unlisted or reorganization of the entity. For some of the investments, reclassification to Level 3 was driven by ongoing geopolitical issues, restrictions on foreign investors trading on the Russian Exchange Market.
Fixed income	MGI Passive Euro Bond Fund MGI Global Bond Fund MGI UK Cash Fund MGI Emerging Markets Debt Fund Mercer Diversified Growth Fund Mercer Global High Yield Bond Fund Mercer Short Duration Global Bond Fund 2 Mercer Global Credit Fund Mercer Absolute Return Fixed Income Fund Mercer Investment Fund 6 Mercer Multi Asset Growth Fund PIMCO Global Aggregate Bond Fund Mercer Emerging Market Debt - Hard Currency Fund Mercer Investment Fund 21 - Global High Yield Bond Mercer Investment Fund 22 - Emerging Market Debt Hard Currency Mercer Frontier Markets Debt Fund Catholic Responsible Investments Global Bond Fund	Financial assets include investments in fixed income securities: corporate bonds, government bonds, MBS and loans. The Level 3 classification was given to these fixed income securities as a result of decreased liquidity in the market and wider spreads that are consequently reflected in a broader spectrum of indicative broker quotes, which are factors that indicate that the broker quotes are not based on observable prices. For some of the investments, reclassification to Level 3 was driven by ongoing geopolitical issues, restrictions on foreign investors trading on the Russian Exchange Market.
Warrants	MGI Global Equity Fund Mercer Passive Global Equity Fund Arrowstreet Global Equity Fund Mercer Passive Universal Global Equity Fund	Classified as Level 3 due to significant unobservable inputs, as a result of being non trading warrants.

10. Fair values of financial instruments (continued)

Fair value hierarchy (continued)

Significant unobservable inputs used in measuring fair value
The determination of what constitutes "observable" requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability. Securities that have been classified as Level 3 have been valued using either the last traded price in a market that has been inactive for a significant period of time or fair valued in accordance with the fair value policy.

Effect of change in significant assumptions of Level 3 financial instruments

The results of using reasonably possible alternative assumptions for valuing the Level 3 assets may result in the fair value estimate and recoverability of the assets being subject to uncertainty and a range of possible outcomes are likely. Such differences, if any, may have a material effect on the overall portfolio as at 30 June 2026 or as at 30 June 2025. If the fair value of Level 3 investments held by the Sub-Funds' increased/(decreased) by 5%, assuming everything remained equal, the effect on the NAV would be:

Sub-Fund	Price change	30 Jun 2026	30 Jun 2025

**Sub-Fund launched during the financial year ended 30 June 2025.

12. Share capital

Authorised share capital

The authorised share capital of the Company is 500,000,000,002 shares of no par value divided into 2 subscriber shares of no par value and 500,000,000,000 unclassified shares of no par value.

Subscriber share capital

The subscriber share capital does not form part of Shareholders' funds, and is disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's business as an investment fund. Subscriber shares entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on winding up. Shares entitle the holders to attend and vote at general meetings of the Company and to participate equally (subject to any differences between fees, charges and expenses applicable to different classes of shares) in the profits and assets of the Company on the terms and conditions set out in the relevant Supplement. Mercer Global Investments Management Limited hold the 2 issued and fully paid subscriber shares at 30 June 2026 (30 June 2025: Matsack Trust Limited and Matsack Nominees Limited).

Redeemable share capital

The redeemable shares issued by the Sub-Fund provide an investor with the right to require redemption for cash at a value proportionate to the investor's share in the Sub-Fund's net assets at each redemption date and are classified as liabilities. The amounts relating to proceeds from redeemable participating shares issued and payment for redeemable participating shares redeemed are reflected in the functional currency of the Sub-Fund and are inclusive of the anti-dilution charges.

12. Share capital (continued)

Redeemable share capital (continued)

The rights attaching to the redeemable shares are as follows:
- Investors in the Company may redeem daily or weekly in the case of Mercer UCITS Alternatives Strategies.
- All shares carry a right to receive notice of, attend and vote at general meetings.

Note 3 to the financial statements details the different expenses and fee rates charged to each Share Class. In the instance where a suitable Management Fee for a given investor is not available from the Share Classes listed below, a new Share Class may be created in the Sub-Fund in accordance with the requirements of the Central Bank and using the following Share Class naming convention for Acadian China A Equity, Acadian European Equity, Acadian Global Managed Volatility Equity, Acadian Global Managed Volatility Equity II, Acadian European Small Cap Equity, Acadian Global High Yield Bond Fund, Acadian Emerging Market Enhanced Equity, Acadian US Enhanced Equity Feeder Fund, Axiom Concentrated Global Growth Equity Fund, Axiom Emerging Markets Equity Fund, Axiom Global Small Cap Equity Fund, Acadian Global Enhanced Equity Feeder Fund, Acadian Global Equity III, Acadian Emerging Markets ex China Equity and Acadian Global Equity Ethical Values:

Share Class type - sub-designation - hedged/unhedged - Sub-Investment Management Fee - accumulating/distributing - currency - performance fee (if applicable).

The following details the Share Class naming convention for all other Sub-Funds:
Share Class type – hedged/unhedged - Management Fee – accumulating/distributing – currency.

Any such new Share Class will be added to the Supplement in accordance with the requirements of the Central Bank.

The rights attached to each series or class of share may, whether or not the Company is being wound up, be varied with the consent in writing of the holders of three-fourths of the issued shares of that series or class or with the sanction of a special resolution passed at a separate general meeting of the holders of shares of that series or class. The rights attaching to any series or class of shares shall not be deemed to be varied by the creation or issue of further shares ranking pari passu with shares already in issue, unless otherwise expressly provided by the terms of issue of those shares.

Capital Management
The Company's capital includes issued ordinary shares. The capital of the Company is managed in accordance with the Company's investment objectives, policies and restrictions as outlined in the Company's Prospectus, while maintaining sufficient liquidity to meet Shareholder redemptions.

The Company does not have any externally imposed capital requirements.

Swing pricing and anti-dilution levy
To enable a Sub-Fund to recover the cost of investing Sub-Fund assets upon an investor's subscription for shares and the cost of liquidating Sub-Fund assets upon a Shareholder's redemption of shares and to preserve the value of the assets of the relevant Sub-Fund, each Shareholder may be subject to swing pricing or an anti-dilution levy of up to 3% of the subscription proceeds or redemption proceeds. In calculating the swing pricing, the NAV of a Sub-Fund is swung by a "swing factor", the Directors may, in respect of net redemptions, adjust downward the NAV per share and may also, in respect of net subscriptions, adjust upward the NAV per share. The Administrator will calculate the NAV for the relevant Sub-Fund and then adjust ("swing") the NAV by a pre-determined amount. The direction of the swing will depend on whether there are net subscriptions or redemptions in the relevant Sub-Fund on the relevant Dealing Day, while the magnitude of the swing will be based on pre-determined estimates of the average trading costs in the relevant asset class(es) in which the Sub-Fund is invested. The Net assets attributable to holders of redeemable participating shares in the Statement of Financial Position is inclusive of any swing adjustments applied to the Sub-Funds.

Certain Sub-Funds applied swing pricing during the financial year ended 30 June 2026 and 30 June 2025.

An anti-dilution levy, if applicable, is paid to the Sub-Fund for the benefit of all Shareholders and is not to be paid to the Manager or the Investment Manager. The anti-dilution levy is deducted from subscription proceeds and will correspondingly reduce the number of shares purchased by the investor or will be deducted from redemption proceeds and will correspondingly reduce the amounts received by a Shareholder upon redeeming its shares from the Sub-Fund. Proceeds from redeemable participating shares are inclusive of anti-dilution charges.

During the financial year ended 30 June 2026 and 30 June 2025 none of the Sub-Funds received an anti-dilution levy.

Share movement
All proceeds from redeemable participating shares issued and payments for redeemable participating shares redeemed are shown in the base currency of the Sub-Fund.

Prospectus, Supplement and other document updates

The following documents were issued and updated during the financial year ended 30 June 2026.

Umbrella/Sub-Fund	Issue date	Update
MGI Funds plc	16 Apr 2026	Prospectus of the Company updated to: • update the Sustainability Approach section to make some general passage of time updates including the removal of outdated references to Mercer ESG ratings; and • make minor alignment updates to reflect a change in the settlement cycle from T+3 to T+2 for daily dealing funds.
Catholic Responsible Investments Global Bond Fund Catholic Responsible Investments Global Equity Fund	4 Jul 2025	Approval of Sub-Fund by the Central Bank of Ireland.
Mercer Passive Sustainable Global Equity Feeder Fund Mercer Passive Global REITS Feeder Fund	7 Jul 2025	Supplements of the Sub-Funds updated to align with revisions reflected in Supplements of their corresponding master funds (Sub-Funds of Mercer UCITS Common Contractual Fund), to allow the Sub-Funds of the master funds to avail of the increased diversification limits applicable to UCITS index trackers (i.e. 20/35) in Regulation 71 of the UCITS Regulations.
Mercer Euro Nominal Bond Medium Duration Fund	11 Jul 2025	Sub-Fund Supplement restated in a more concise and focused format to enhance comprehensibility and transparency for investors. There were no changes to how the Sub-Fund is managed or operated. There were some non-material changes and clarifications. The Supplement was updated to include the following revisions: • Enhanced Investment Policy description: New 'Strategy' description added; Succinct and consistent style applied to the description of the Sub-Fund's investment universe Including the main types of instrument usage and associated investment limits; Consistent approach to disclosing how the Sub-Fund may use derivatives. • Risk factors updated to focus on the most material risks having regard to the particular investment policy and features of the Sub-Fund. • Fees and expenses by share class type set out in a more accessible tabular format per class type.

14. Significant events during the financial year (continued)

Prospectus, Supplement and other document updates (continued)

Umbrella/Sub-Fund	Issue date	Update
		• Clarification that classes available by jurisdiction for the Sub-Fund, including any classes with a schedule future launch are available upon request from the Manager.
Acadian Global Enhanced Equity Feeder Fund	16 Jul 2025	Supplement updated to reflect repurposing of fund as a feeder fund to Acadian Global Enhanced Equity, a Sub-Fund of Mercer UCITS Common Contractual Fund and to reflect name change from Acadian Multi-Factor Equity Feeder Fund to Acadian Global Enhanced Equity Feeder Fund.
Acadian US Enhanced Global Equity Feeder Fund*	16 Jul 2025	Approval of Sub-Fund by the Central Bank of Ireland.
Mercer Frontier Markets Debt Fund	10 Sep 2025	Approval of Sub-Fund by the Central Bank of Ireland.
Mercer Passive Low Volatility Equity Feeder Fund Mercer Passive Fundamental Indexation Global Equity Feeder Fund Mercer Passive Climate Transition Listed Feeder Fund*	11 Sep 2025	Supplements updated as part of the UCITS enhancement update noted on 11 September 2025.
Mercer Global Listed Infrastructure Fund*	11 Sep 2025	Supplement updated to reflect that the Sub-Fund is closed to subscriptions.
Mercer Passive Climate Transition Listed Infrastructure Feeder Fund	17 Sep 2025	Supplement updated to reflect reduction in minimum commitment level to Sustainable Investments.
Acadian Global Managed Volatility Equity II* Acadian Emerging Markets Equity* Acadian Emerging Markets Equity Ex-Fossil Fuel Reserves* Acadian Multi-Asset Absolute Return*	30 Sep 2025	Consolidated Supplement updated to reflect relocation of Acadian China A Equity, Acadian European Equity and Acadian Global Managed Volatility Equity to standalone Supplements.
Acadian China A Equity Acadian European Equity Acadian Global Managed Volatility Equity	30 Sep 2025	Supplements updated to each be presented in standalone form, having been removed from the consolidated Supplement referenced above. The Supplements were also updated primarily to reflect a revised sustainability strategy designed to enhance and strengthen the Sub-Investment Manager's environmental, social and governance criteria to meet evolving regulatory requirements and investor expectations, and a change to the profile of a typical investor to an investor seeking to achieve a return in the long (rather than medium to long) term.
Acadian Emerging Markets ex China Equity	30 Sep 2025	The Supplement was updated primarily to reflect a revised sustainability strategy designed to enhance and strengthen the Sub-Investment Manager's environmental, social and governance criteria to meet evolving regulatory requirements and investor expectations, and a change to the profile of a typical investor to an investor seeking to achieve a return in the long (rather than medium to long) term.
Mercer Emerging Market Debt - Hard Currency Fund	1 Oct 2025	The Supplement was updated to reflect a change of benchmark from JPM EMBI Global Diversified Ex-CCC Index to JPM EMBI Global Diversified Index.
Acadian Global Equity III	23 Oct 2025	Approval of Sub-Fund by the Central Bank of Ireland.
Acadian Global Equity Ethical Values*	12 Dec 2025	Approval of Sub-Fund by the Central Bank of Ireland.
Mercer Absolute Return Fixed Income Fund	19 Jan 2026	Supplement updated to reflect an update to the investment policy to allow for: • an increase in permitted investment in units or shares of regulated collective investment schemes (Underlying Funds) from 10% to 40% of Net Asset Value; and • an increase in the maximum exposure to collateralised mortgage obligations (CMOs) and collateralised loan obligations (CLOs) from a combined aggregate limit of 10% to a maximum limit of 10% each.

14. Significant events during the financial year (continued)

Prospectus, Supplement and other document updates (continued)

Umbrella/Sub-Fund	Issue date	Update
		In order to take into account the increased potential allocation to Underlying Funds described above, the sustainability approach was updated to reduce the Sub-Fund's minimum alignment with its promoted environmental and social characteristics from 90% to 60% of Net Asset Value.
Acadian Emerging Markets ex China Equity	19 Feb 2026	Supplement updated to reflect an update to the benchmark index from the MSCI Emerging Markets ex China Index (USD) to the MSCI Emerging Markets ex China 10/40 Index (USD), which takes into consideration the 10% and 40% concentration constraints applicable for UCITS.
Catholic Responsible Investments Global Equity Fund	27 Feb 2026	Supplement updated to reflect the application of the restrictions for equity funds under the German Investment Tax Act (GITA) in order to meet GITA eligibility rules.
Axiom Concentrated Global Growth Equity Fund Axiom Emerging Markets Equity Fund Axiom Global Small Cap Equity Fund	4 Mar 2026	Supplements of the Sub-Funds updated with enhanced disclosures to better describe the Sub-Funds' degree of freedom from their reference benchmarks (i.e. by replacing the current indicative reference to expected tracking error ranges with a qualitative statement designed to provide more meaningful information to investors). The Supplement for Axiom Concentrated Global Growth Equity Fund was further amended to reflect a change in the Sub-Fund's sustainability approach and inclusion of additional environmental and social exclusionary screens.
MGI Passive UK Long Gilt Fund	18 Mar 2026	Supplement updated to provide for the availability of hedged share classes.
All Sub-Funds	16 Apr 2026	All Supplements updated to reflect date of the new Prospectus, minor passage of time updates (where applicable) and certain further Supplement updates as per the below.
MGI Emerging Markets Equity Fund Mercer European Equity Fund MGI Global Equity Fund MGI UK Equity Fund Mercer Global Small Cap Equity Fund Mercer Low Volatility Equity Fund Mercer Global High Yield Bond Fund Mercer Short Duration Global Bond Fund 1 Mercer Short Duration Global Bond Fund 2 Mercer Global Credit Fund Mercer Passive Global Equity Fund Mercer Absolute Return Fixed Income Fund Mercer Passive Emerging Markets Equity Fund Mercer Short Duration Bond Fund 3 Arrowstreet Global Equity Fund Mercer Passive Euro Corporate Bond Fund Mercer Passive Low Volatility Equity Feeder Fund Mercer Passive Fundamental Indexation Global Equity Feeder Fund	16 Apr 2026	Supplements of the Sub-Funds updated to: • amend the exclusions framework to add a new adult entertainment exclusion and clarify the current nuclear and automatic weapons exclusions; and • reflect a change in the settlement cycle from T+3 to T+2.

Umbrella/Sub-Fund	Issue date	Update
Acadian Global Managed Volatility Equity II	16 Apr 2026	Supplement updated to reflect that the Sub-Fund is closed to subscription and is in the course of revocation.
Mercer European Equity Fund	17 Apr 2026	Supplement was updated to reflect: • a change to the investment policy of the Sub-Fund to expand its coverage beyond Eurozone equities to wider European developed markets such as the Nordics and Switzerland; • the replacement of the existing benchmark, the MSCI EMU Net Tax Total Return (EUR), unhedged, with MSCI Europe ex UK Net Tax Total Return (EUR), unhedged, which represents developed European markets excluding the UK and will serve as the Sub-Fund's new outperformance target; and • a change of Sub-Fund name from MGI Eurozone Equity Fund to Mercer European Equity Fund, to better align with the Sub-Fund's investment policy.
Mercer Investment Fund 21 – Global High Yield	17 Apr 2026	Supplement updated to provide for investment in collateralised loan obligations (CLOs) and loan instruments, each subject to a maximum limit of 10%.
MGI UK Equity Fund	20 Apr 2026	Supplement updated to amend the investment strategy of the Sub-Fund to better align to evolving market conditions for UK equities and to take account of the Sub-Fund's present size and the current opportunity set for the asset class. The Supplement was updated to reflect that: • In the near term, the strategy will adopt an enhanced UK equity style using a single sub-investment manager, with the strategy typically characterised by investing in securities that are constituents of the Sub-Fund's benchmark index, overweighting securities which are considered to have the highest potential to outperform the benchmark index and underweighting or not investing in securities considered overvalued; and • While the Sub-Fund will remain actively managed and continue to target outperformance of the FTSE All-Share Net Tax Total Return Index (GBP), the targeted outperformance range will be reduced from 0.75% - 1.5% to 0.5%–1% per annum, and expected tracking error will narrow to 1%–2% over the medium to long term.
Acadian China A Equity Acadian European Equity Acadian Global Managed Volatility Equity Acadian European Small Cap Equity Acadian Global High Yield Bond Fund Acadian Emerging Market Enhanced Equity Acadian US Enhanced Equity Feeder Fund Acadian Global Enhanced Equity Feeder Fund Acadian Emerging Markets ex China Equity Acadian Global Enhanced Equity II* Acadian Global Equity II* Acadian Global Investment Grade Corporate Bond Fund* Acadian Global Small Cap Equity Feeder Fund* Acadian US Small Cap Equity Feeder Fund*	11 May 2026	Supplements of the Sub-Funds were restated in a more concise and focused format to enhance comprehensibility and transparency for investors. There were no changes to how the Sub-Funds are managed or operated. There were some non-material changes and clarifications. The Supplements were updated to include the following revisions: • Enhanced Investment Policy description: - description of benchmark indices, and precisely how these are used by a Sub-Fund, revised and standardised; - succinct and consistent style applied to the description of a Sub-Fund's investment universe including the main types of instrument usage and associated investment limits; - consistent approach to disclosing how each Sub-Fund may use derivatives. • The description of a typical investor profile in the Supplements has been revised to align with the approach and description for the Key Information Document (KID), pursuant to the PRIIP KID Regulation. • Risk factors updated to focus on the most material risks having regard to the particular investment policy and features of a Sub-Fund. • Fees and expenses by share class type set out in a more accessible tabular format per class type. • Introduction of an operating expenses cap in relation to certain operating expenses as described in the Prospectus. • Inclusion of signpost to the Manager's website for classes available by jurisdiction for a Sub-Fund.

Prospectus, Supplement and other document updates (continued)

Umbrella/Sub-Fund	Issue date	Update
Mercer Passive Global High Yield Bond Fund	2 Jun 2026	Supplement updated to reflect: • Name change of the existing benchmark used by the Sub-Fund for index-tracking purposes, from J.P. Morgan ESG Global High Yield BB-B Rated Liquid Corporate Total Return Index (USD), unhedged to J.P. Morgan Screened Tilted and Reweighted Global High Yield BB-B Rated Liquid Corporate Total Return Index (USD), unhedged. • Inclusion of additional disclosures as required under the German Insurance Supervision Act to permit investment by a German insurance company (subject to VAG investment restrictions).

*Sub-Fund is not currently active.

Other significant events

Effective 17 April 2026 the following Sub-Fund changed name: MGI Eurozone Equity Fund to Mercer European Equity Fund.

The Manager and Investment Manager are closely monitoring developments in the Iran conflict and in the Middle East. As of 30 June 2026, the Sub-Funds' exposure remains low. The countries considered include Iran, Israel, Egypt, Kuwait, Qatar, Saudi Arabia, Turkey, UAE, Bahrain, Jordan, Oman, Lebanon, and Palestine.

There were no other significant events affecting the Company during the financial year that require amendment to or disclosure in the financial statements.

15. Subsequent events

Sub-Funds termination

The following Sub-Funds terminated since the financial year end date.

Sub-Fund	Termination date
Mercer Global Select Equity Fund	27 Aug 2026
Acadian Global Equity Ethical Values	27 Oct 2026

Prospectus, Supplement and other document updates

The following documents were issued and updated since the financial year end date.

Umbrella/Sub-Fund	Issue date	Update
Prospectus Addendum	19 Oct 2026	Prospectus updated by Addendum primarily as follows: • Updates throughout to reflect the rebranding of various Mercer entities to reflect new 'Marsh' names, including changes to the names of the Manager, Investment Manager and Distributor and references to the Marsh group. • Update to the German Investment Tax Act disclosure within Appendix III (Investment Restrictions).
Mercer Investment Fund 21 - Global High Yield Bond	6 Jul 2026	Supplement updated to reflect that the Sub-Fund will be permitted to invest up to 10% of its net asset value in contingent convertible bonds.
Mercer Investment Fund 6	20 Aug 2026	Supplement updated to reflect that the Sub-Fund does not invest in securities listed or traded on Russian markets.
Mercer USD Cash Fund	21 Aug 2026	Supplement updated to reflect inclusion of additional disclosures as required under the German Insurance Supervision Act to permit investment by a German insurance company (subject to VAG investment restrictions).

15. Subsequent events (continued)

Prospectus, Supplement and other document updates (continued)

Umbrella/Sub-Fund	Issue date	Update
Mercer Global Select Equity Fund	27 Aug 2026	The merger of the Sub-Fund into MGI Global Equity Fund became effective at 23:59 (Irish time) and the Sub-Fund ceased to exist in accordance with Regulation 66(1)(c) of the UCITS Regulations.
Sub-Fund Schedule Supplement	31 Aug 2026	Supplement updated to reflect removal of Mercer Global Select Equity Fund, following the merger of the Sub-Fund into MGI Global Equity Fund, as well as passage of time changes.
Acadian US Enhanced Equity Feeder Fund Acadian US Small Cap Equity Feeder Fund*	3 Sep 2026	Supplements of the Sub-Funds updated to reflect changes made to their respective master funds, where the master funds were updated to reflect the use of the net of tax version of their current benchmark instead of the gross returns version.
Acadian Global Equity III	10 Sep 2026	Supplement updated to reflect an increase in the Sub-Fund's permitted exposure to emerging markets securities from 5% to 20% of net asset value.
Axiom Emerging Markets Equity Fund	17 Sep 2026	Supplement updated to correct the application of the Voluntary Cap to the Share Class G-0.3000 $ and to remove a redundant Hedging Fee footnote.
Mercer Long Term Growth Fund	21 Sep 2026	Supplement was updated to reflect: • amendments to the investment policy to facilitate greater use of direct investments alongside investments through underlying funds; • increased flexibility in relation to emerging markets exposure, below-investment-grade debt investments and securities lending; • expanded flexibility to use financial derivative instruments, including total return swaps; • related sustainability disclosure updates.
Mercer Diversified Retirement Fund Mercer Multi Asset Growth Fund	30 Sep 2026	Supplement was updated to reflect: • amendments to the investment policy to facilitate greater use of direct investments alongside investments through underlying funds; • increased flexibility in relation to emerging markets exposure, below-investment-grade debt investments and securities lending; • expanded flexibility to use financial derivative instruments, including total return swaps; • related sustainability disclosure updates.
Acadian Climate Transition Global Enhanced Equity Feeder Fund*	5 Oct 2026	Approval by the Central Bank of Ireland as a new Sub-Fund.
Mercer Long Term Growth Fund	8 Oct 2026	Supplement updated to permit the wider use of derivatives for investment purposes, including long and short exposures, while maintaining the sub-fund's existing global exposure limit.
Acadian Global Small Cap Equity Feeder Fund*	28 Oct 2026	Supplement updated to change the benchmark from MSCI World Small Cap to MSCI ACWI Small Cap and increase the limit in Emerging Market Issuers from 15% up to 30%.

*Sub-Fund is not currently active.

Other significant events

Mercer Global Select Equity Fund ("Merging Fund") merged into MGI Global Equity Fund (the "Receiving Fund") effective 27th August 2026.

Marsh McLennan officially rebranded to Marsh in January 2026. Mercer began adopting the Marsh brand on 1 September 2026 as part of the wider corporate unification project. Mercer Global Investments Management Limited and Mercer Global Investments Europe Limited changed their names to Marsh Investments Fund Management Limited and Marsh Investments International Limited on 15 October 2026.

There have been no other significant events affecting the Company since the financial year end date.

16. Approval of financial statements

These financial statements were approved by the Board of the Directors on 22 October 2026.

General

MGI Funds plc (the "Company") is an open-ended umbrella fund investment company with variable capital and with segregated liability between Sub-Funds. The share capital of the Company is divided into different series of shares with each series of shares representing a portfolio of assets which comprises a separate fund (each a "Sub-Fund"). The Company is authorised and regulated by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended from time to time, (the "UCITS Regulations") and the Central Bank's (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2026, as amended from time to time, (the "Central Bank UCITS Regulations").

The investment objective of the Company is the collective investment of its Sub-Funds in financial assets with the aim of spreading its investment risk and giving the Shareholders of the Company the benefit of the results of the management of Sub-Funds. The Company's objective to spread investment risk has been maintained during the financial year.

The Company consists of eighty-one (30 June 2025: seventy-five) Sub-Funds, sixty-six of which are active as at 30 June 2026 (30 June 2025: fifty-seven). The following tables outlines the functional currency, launch date and SFDR classification of each Sub-Fund.

+No notification for distribution in Germany has been made, therefore no shares of the Sub-Fund may be publicly distributed to investors within the scope of the German Investment Act.

SFDR Level 2 Sub-Fund disclosures and related Responsible Investment documents and policies can be found on the Mercer Sub-Funds Website (Fund Information (mercer.com)) and the Responsible Investment Website (responsible-investment (mercer.com)).

Where it is appropriate to its investment objective and policies a Sub-Fund may also invest in other Sub-Funds of this Company. A Sub-Fund may only invest in another Sub-Fund of this Company if the Sub-Fund in which it is investing does not itself hold shares in any other Sub-Fund of this Company. Any commission received by the Manager or Investment Manager in respect of such investment will be paid into the assets of the Sub-Fund. Any Sub-Fund that is invested in another Sub-Fund of this Company or any other fund to which the Manager or the Investment Manager has been appointed will be invested in a Share Class for which no Management or Investment Management Fee is charged. No subscription, conversion or redemption fees will be charged on any such cross investments by a Sub-Fund.

The Prospectus, the Key Information Document (the "KID"), the Key Investor Information Document (the "KIID"), the Articles, the annual and semi-annual reports, a list of changes in the composition of the portfolios as well as the issue and redemption prices are available free of charge pursuant to Sec. 297(1) of the German Capital Investment Code at the office of the German information agent (Mercer Global Investments Europe Limited - Niederlassung Deutschland, Platz der Einheit 1,60327 Frankfurt am Main, Hessen, Germany).

The Company may only be offered in Switzerland to qualified investors within the meaning of Article. 10 para 3 and 3ter CISA including high net worth retail clients and private investment structures set up for them if they have opted out of investor protection pursuant to art. 5 para. 1 FinSA (so called opting-out). The Prospectus, the KID, the KIID, the Articles of the Company as well as the annual and semi-annual reports can be obtained free of charge from the representative agent in Switzerland, Mercer Alternatives AG, Kasernenstrasse 77b, 8004 Zurich, Switzerland. The paying agent of the Company in Switzerland is NPB Neue Privat Bank AG, Limmatquai 1 / am Bellevue, P.O. Box, CH-8024 Zürich, Switzerland.

Data protection notice

The General Data Protection Regulation (Regulation (EU) 2016/679) ("GDPR") came into effect on 25 May 2018. Information on how the Shareholders' personal data is processed in accordance with GDPR can be found here: https://investmentsolutions.mercer.com/global/all/en/investment-solutions-home/corporate-policies.html.

Remuneration policy

Mercer Global Investments Management Limited ("MGIM") is authorised and regulated by the Central Bank of Ireland (the "central Bank") to act as a fund management company for Undertakings for Collective Investment in Transferable Securities (the "UCITS Management Company") and is a wholly owned subsidiary of Mercer Ireland Holdings Limited ("MIHL") which in turn is a subsidiary of Marsh & McLennan Ireland Limited ("MMIL"). MMIL is the Union parent investment holding company for the Marsh "Investment Firm Group" which is comprised of MGIM (a captive fund management company) and two MiFID investment firms: Mercer Global Investments Europe Limited ("MGIE"), which has been appointed by MGIM as Investment Manager to the Sub-Funds, and Mercer Ireland Limited ("MIL").

MGIM is supervised by the Central Bank for prudential purposes on a consolidated basis under MMIL and, as part of the Investment Firm Group, has adopted the MMIL Remuneration Policy (the "Policy").

As part of its authorisation as a UCITS Management Company to MGI Funds plc (the "UCITS"), MGIM must comply with the provisions of Article 14a and 14b of Directive 2014/91/EU amending Directive 2009/65/EC (the "UCITS V Directive") which has been transposed into Irish law via the European Communities (Undertakings for Collective Investment in Transferable Securities)(Amendment) Regulations 2016 – S.I. No. 143 of 2016 - the Irish UCITS V Regulations and European Securities and Markets Authority ("ESMA") Guidelines on sound remuneration policies under the UCITS Directive.

The Policy complies with Directive (EU) 2019/2034 on prudential regulation of investment firms ("IFD") and Regulation (EU) 2019/2033 on prudential requirements of investment firms ("IFR") which came into effect on 26 June 2021 and includes requirements relating to remuneration which apply from remuneration years commencing 1 January 2022. MGIM is satisfied that IFR/IFD requirements in relation to remuneration are equally as effective as those applicable under the UCITS Directive.

The Policy extends to MGIM in its capacity as Management Company of the UCITS and has been devised in line with the business strategy, objectives, values and interests of MGIM and the UCITS, and includes measures to avoid conflicts of interest, promote sound and effective risk management, including in respect of sustainability risks, and discourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS that MGIM manages.

None of the non-executive Directors of MGIM are currently in receipt of variable remuneration in respect of their services as Director of MGIM or in respect of the UCITS. Accordingly, the detailed provisions of Article 14(b) of the UCITS V Directive as implemented into Irish law pursuant to the UCITS V Regulations are not applicable regarding the non-executive Directors of MGIM.

Given the organisational structure of MGIM's business, whereby it does not have any direct employees, MGIM does not pay any form of remuneration or benefits to employees. Employees are engaged by the Company pursuant to a Secondment Arrangement of employees from MGIE and to a lesser extent MIL (as "the Employers") with some supplementary services which continue to be provided under the existing Resource Sharing Agreement with MGIE dated 13 May 2014 (the "RSA"), as amended from time to time, pursuant to which MGIE makes available to MGIM sufficient appropriately qualified employees to discharge certain functions for MGIM thus enabling MGIM to leverage off the skills, experience and knowledge of specialised staff employed by MGIE.

Accordingly, the Board does not regard it as proportionate to establish a remuneration committee specifically for MGIM. Instead, MGIM seeks to ensure that there is no risk of non-compliance or circumvention of UCITS requirements and oversees the remuneration arrangements through the annual presentation to the Board by the Marsh Human Resources function, annual review of the Policy, and an annual monitoring review by the Compliance function of remuneration arrangements at the Employer.

Additionally, MGIM delegates discretionary portfolio management to MGIE, as Investment Manager, with sub-delegation to Sub-Investment Managers globally within strict investment restrictions and guidelines set out in the fund offering documentation and investment management agreement between MGIE and the Sub-Investment Manager.

Remuneration policy (continued)

Sub-Investment Managers are not incentivised or rewarded for taking excessive risk. The discretion of the Sub-Investment Manager, and thus its risk taking is strictly controlled within certain predetermined narrow parameters and/or its investment decisions are rules based. The parameters take the form of detailed investment restrictions/investment guidelines in the Prospectus and/or the investment management agreement. The Sub-Investment Manager is not permitted to manage outside of these parameters and as such cannot materially affect the risk profile of the UCITS.

Quantitative remuneration disclosure

MGIM is required under UCITS V to make quantitative disclosures of remuneration.

These disclosures are made in line with the interpretation of currently available regulatory guidance on IFD quantitative remuneration disclosures. As market or regulatory practice develops MGIM may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other fund range disclosures in that same year.

To reflect the resourcing arrangements and the delegation of discretionary portfolio management services, disclosures are provided in relation to (a) the staff of MGIM and MGIE; (b) staff who are senior management; and (c) staff who have the ability to materially affect the risk profile of the UCITS.

All individuals included in the aggregated figures disclosed are rewarded in line with MMILs Remuneration Policy for their responsibilities across the relevant Marsh business area.

Members of staff and senior management of MGIE typically provide both UCITS and non-UCITS related services (such as AIFM or MiFID services) to clients of MGIE and the broader Marsh group. Given the subjective nature of determining the proportion of an individual's activities across fund-related and other services, the figures reflect the aggregate total amount of remuneration, both fixed and variable, across all staff. Furthermore, the figures are apportioned on a pro rata basis based on the AuM of the Funds.

Total amount of remuneration awarded by MGIM and MGIE to its staff for the financial year end

	30 Jun 2026	30 Jun 2025
Fixed remuneration	€ 9,836,288	€ 9,947,995
Variable remuneration	€ 5,035,191	€ 3,203,402

*Sub-Fund terminated during the financial year ended 30 June 2025.
**Sub-Fund launched during the financial year ended 30 June 2025.

Soft commissions and directed brokerage arrangements

Sub-Investment Managers appointed by the Investment Manager are generally not permitted to enter into soft commission arrangements which would result in them receiving research for free, with the exception of minor non-monetary benefits as defined in Markets in Financial Instruments Directive ("MiFID"). Managers can accept research if they pay for it themselves or if they pay for it via a Research Payment Account ("RPA") which is funded by the assets of the Sub-Fund or similar means which result in the same level of protection as the RPA method. In exceptional circumstance, the Investment Manager may permit Sub-Investment Managers to receive research through joint payments for research and execution services so long as strict requirements relating to conflicts of interest are managed. As of the date of this report, all Sub-Investment Managers are either paying for research themselves or operating an RPA or similar method.

EPM techniques

The Company may employ investment techniques and instruments for EPM of the assets of the Company or of any Sub-Fund and for short-term investment purposes under the conditions and limits set out by the Central Bank under the UCITS Regulations and in the Prospectus. The Company may, for the purposes of hedging, enter into put and call options, spot and forward contracts, IRS, CDS, financial futures, stock and bond index futures contracts, repurchase and reverse repurchase agreements and

EPM techniques (continued)

securities lending agreements. In particular, a Sub-Fund may seek to hedge its investments against currency fluctuations which are adverse to its base currency by utilising currency options, futures contracts and forward foreign currency contracts. For FDIs that were entered into during the financial year which remained open at year end and the resulting amount of commitments/ exposures, please refer to the Portfolio Statements. FDIs and EPM techniques and instruments were used during the financial year.

A Sub-Fund may also from time to time make use of exchange traded stock index and other futures contracts for the purpose of EPM to enable it to maintain the appropriate exposure to stock markets in accordance with the relevant Investment Manager's recommended overall asset allocation. The use of exchange traded stock index and other futures contracts by the Company will be subject to the conditions and limits laid down by the Central Bank under the UCITS Regulations.

Certain Sub-Funds utilise FDIs for investment purposes and/or for EPM purposes. In addition to investment in FDIs set down in the Prospectus, and subject to the conditions and within the limits laid down by the Central Bank, certain Sub-Funds may employ techniques and instruments for EPM of the assets of the Sub-Fund relating to transferable securities and money market instruments. Transactions for the purposes of EPM may be undertaken with a view to achieving a reduction in risk and/ or a reduction in costs and may not be speculative in nature. These techniques and instruments may include investment in FDIs. New techniques and instruments may be developed which may be suitable for use by a Sub-Fund and the Manager may employ such techniques and instruments. Investment in FDIs are subject to the conditions and limits laid down by the Central Bank.

Realised and unrealised gains or losses arising from FDIs or EPM techniques and instruments are disclosed in Net gain/(loss) from financial instruments at FVTPL in the Statement of Comprehensive Income.

The Company enters into repurchase agreements and reverse repurchase agreements for the purpose of EPM. There are no material revenues arising from the use of repurchase agreements or reverse repurchase agreements.

Interest income and interest expense in relation to reverse repurchase and repurchase agreements are disclosed separately in section Repurchase and Reverse repurchase agreements of the supplemental information of the annual report.

Details of the value of collateral and the exposure to the counterparty is detailed in Note 9 to the financial statements.

Securities lending

During the financial year the Sub-Funds entered into securities lending agreements for EPM purposes. Under a securities lending transaction, a Sub-Fund makes a loan of securities which it holds to a borrower upon terms that require the borrower to return equivalent securities to the Sub-Fund within a specified period and to pay the Sub-Fund a fee for the use of the securities during the period that they are on loan. The Manager will ensure that it is able, at any time, to recall any security that has been lent out or terminate any securities lending agreement into which it has entered.

A Sub-Fund may lend its portfolio securities via a securities lending program through an appointed securities lending agent to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. Pursuant to the terms of the relevant securities lending agreement, the appointed lending agent will be entitled to retain a portion of the securities lending revenue to cover the fees and costs associated with the securities lending activity, including the delivery of loans, the management of collateral and the provision of any securities lending indemnity and such fees paid will be at normal commercial rates.

Revenue from securities lending arrangements is disclosed in Securities lending income in the Statement of Comprehensive Income.

Transaction costs relating to the securities lending transactions in relation to third parties to the agreement are embedded in the income received, therefore they are not separately identifiable for disclosure within the financial statements.

Repurchase and reverse repurchase agreements

Under a repurchase agreement a Sub-Fund sells portfolio assets subject to an agreement by the Sub-Fund to repurchase the same assets at an agreed upon price and date.

The Sub-Fund can use the proceeds received from entering into a repurchase agreement to make additional investments, which generally causes the Sub-Fund's portfolio to behave as if it were leveraged. If the buyer in a repurchase agreement files for bankruptcy or becomes insolvent, the Sub-Fund may be unable to recover the securities it sold and as a result may realise a loss on the transaction if the securities it sold are worth more than the purchase price it originally received from the buyer.

Under a reverse repurchase agreement the Sub-Fund purchases a financial asset and simultaneously enters into an agreement to resell the same or a substantially similar asset at a fixed price on a future date.

Repurchase and reverse repurchase agreements (continued)

The following table details the repurchase and reverse repurchase agreements as at 30 June 2026.

Portfolio Turnover Rate ("PTR")

This report has been prepared in accordance with the Shareholder Rights Directive II disclosure requirements to institutional investors. PTR has been calculated in accordance with the below methodology. The PTR of equities within a portfolio will vary in relation to the investment strategy. For your relevant Sub-Fund investments, the PTR of all securities within the Sub-Fund can be found within the summary table below.

$$\text{PTR} = \frac{\text{Lesser of (Purchases \& Sales)}}{\text{Average Total Net Assets over 12 months x 100}}$$

Sub-Fund	Financial year ended 30 Jun 2026 %	Financial year ended 30 Jun 2025 %

Securities Financing Transactions

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTs") and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs and total return swaps ("TRSs"). As outlined in the offering documents, only repurchase agreements, reverse repurchase agreements, securities lending, TRSs and short sales are considered SFTs for the purpose of this disclosure.

1. Listed below is the market value of all SFTs and TRSs at 30 June 2026, grouped by SFT type and the ten largest counterparties (if fewer than ten counterparties are used then all counterparties are detailed)

*The funds are regulated in the jurisdiction noted above.

**Further information on the performance fees can be found in the relevant fund's documentation.

***Investments by Sub-Funds of the Company into funds also managed by the Manager are not charged a management fee at the level of the underlying fund, thereby ensuring that there is no double charging of fees by the Manager. However, there may be a hedging fee applied to any investments by the Sub-Funds into hedged Share Classes of the underlying fund.

The following schedule of significant portfolio movements reflects the aggregate purchases of a security exceeding 1% of the total value of purchases and aggregate disposals greater than 1% of the total sales in the financial year. Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
MGI Emerging Markets Equity Fund

Legal entity identifier:
549300XM3RJF48NEAL10

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.7% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the Sub-Fund is 20% lower than the WACI of the MSCI Emerging Market Index ("the Benchmark Index"), as measured over a rolling three-year period.
The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.
The Sub-Fund commits to making a minimum allocation to sustainable investments of 10%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and socialcharacteristics.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	MGI Emerging Markets Equity Fund	**MSCI Emerging Market Index**
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	118	254

Level of Sustainable Investment
42.70%

…and compared to previous periods?

	MGI Emerging Markets Equity Fund	MSCI Emerging Market Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	121	285

Level of Sustainable Investment
43.80%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	31491.2	tCO2	85
Scope 2 GHG emissions	15847.9	tCO2	85
Scope 3 GHG emissions	304597.8	tCO2	85
Total GHG emissions	351821.5	tCO2	85
Carbon footprint	523.8	tCO2 per M invested	85
GHG intensity of investee companies	959.7	tCO2	85
Exposure to companies active in the fossil fuel sector	6.1	Percentage	85
Share of non-renewable energy consumption and production	82.5	Percentage	85
Energy consumption intensity per high impact climate sector	8.9	GwH per million EUR invested	6
Activities negatively affecting biodiversity-sensitive areas	8.5	Percentage	83
Emissions to water	0.0	Tonnes per million EUR invested	84
Hazardous waste and radioactive waste ratio	6.3	Tonnes per million EUR invested	83
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.3	Percentage	85
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1.1	Percentage	85
Unadjusted gender pay gap	14.7	Percentage	77
Board gender diversity	21.9	Percentage	90
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.1	Percentage	85
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	66.6	Percentage	84
Lack of a human rights policy	7.5	Percentage	85
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: The top investments of the Sub-Fund as at the reporting period are shown below.

Largest investments	Sector	% Assets	Country

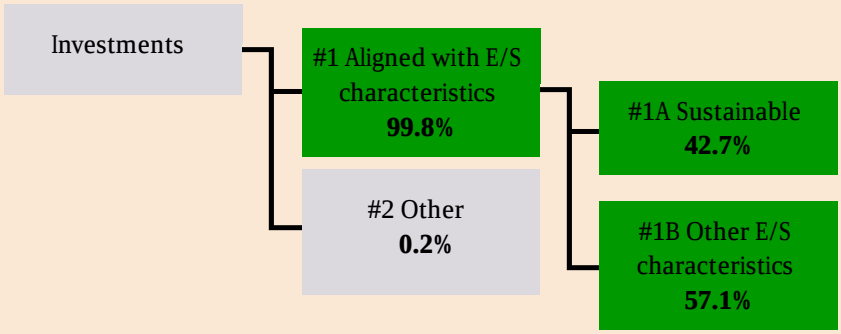
Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 42.7% in sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	17.80%
Financials	Banks	13.07%
Information Technology	Technology Hardware & Equipmen	12.86%
Industrials	Capital Goods	6.21%
Materials	Materials	6.14%

Real Estate	Equity Real Estate Investment	0.09%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

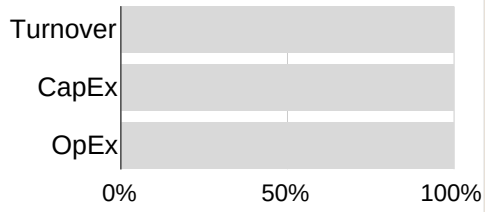
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



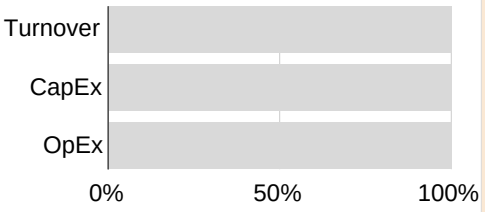
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

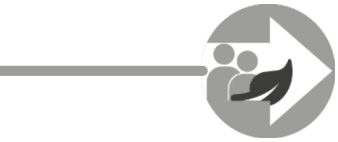
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 42.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 42.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer European Equity Fund

Legal entity identifier:
549300OUYS7PF29L0J78

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the Sub-Fund is 20% lower than the WACI of the MSCI Europe ex UK Net Tax Total Return Index ("the Benchmark Index"), as measured over a rolling three-year period.
The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.
The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and socialcharacteristics.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	Mercer European Equity Fund	MSCI Europe ex UK Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	61	76

Level of Sustainable Investment
65.00%

…and compared to previous periods?

	Mercer European Equity Fund	MSCI EMU Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	55	93

Level of Sustainable Investment
66.80%

Please refer to the tables above for the previous reporting years indicators. Please note the Sub-Fund previously had a different benchmark as shown above.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	16880.8	tCO2	96
Scope 2 GHG emissions	4202.4	tCO2	96
Scope 3 GHG emissions	220081.5	tCO2	96
Total GHG emissions	240004.0	tCO2	96
Carbon footprint	536.0	tCO2 per M invested	96
GHG intensity of investee companies	924.7	tCO2	96
Exposure to companies active in the fossil fuel sector	8.9	Percentage	96
Share of non-renewable energy consumption and production	53.5	Percentage	96
Energy consumption intensity per high impact climate sector	7.2	GwH per million EUR invested	7
Activities negatively affecting biodiversity-sensitive areas	12.0	Percentage	95
Emissions to water	0.0	Tonnes per million EUR invested	96
Hazardous waste and radioactive waste ratio	0.9	Tonnes per million EUR invested	96
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	96
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.5	Percentage	96
Unadjusted gender pay gap	13.6	Percentage	89
Board gender diversity	41.8	Percentage	98

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

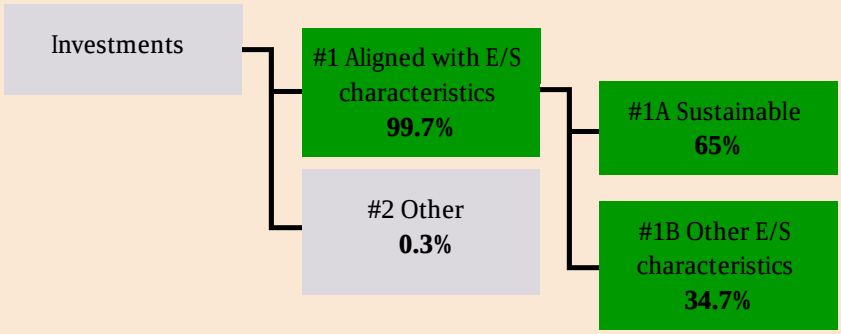
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.7% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 65% in sustainable investments.

The remaining 0.3% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	20.24%
Financials	Banks	13.81%
Health Care	Pharmaceuticals Biotechnology	9.99%
Information Technology	Semiconductors & Semiconductor	8.27%
Materials	Materials	4.67%
Consumer Staples	Food Beverage & Tobacco	4.11%
Financials	Insurance	4.06%
Health Care	Health Care Equipment & Servic	3.58%

Financials	Funds	0.07%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

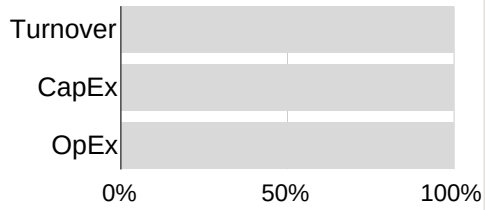
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



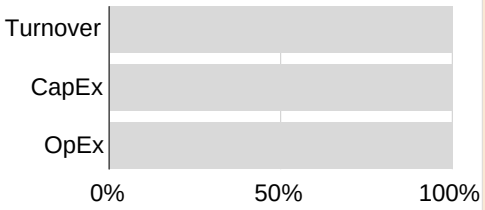
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

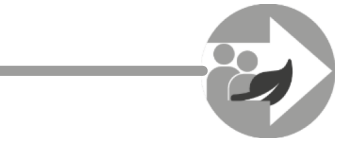
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 65% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 65% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.3% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
MGI Global Equity Fund

Legal entity identifier:
549300FNBM37M76SVO33

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.6% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the Sub-Fund is 20% lower than the WACI of the MSCI World ("the Benchmark Index"), as measured over a rolling three-year period.
The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.
The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and socialcharacteristics.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	MGI Global Equity Fund	**MSCI World Index**
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	56	96

Level of Sustainable Investment
57.60%

…and compared to previous periods?

	MGI Global Equity Fund	MSCI World Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	48	93

Level of Sustainable Investment
63.50%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	89175.4	tCO2	91
Scope 2 GHG emissions	39970.5	tCO2	91
Scope 3 GHG emissions	1261794.3	tCO2	91
Total GHG emissions	1390939.7	tCO2	91
Carbon footprint	257.7	tCO2 per M invested	91
GHG intensity of investee companies	713.8	tCO2	91
Exposure to companies active in the fossil fuel sector	5.8	Percentage	91
Share of non-renewable energy consumption and production	59.6	Percentage	91
Energy consumption intensity per high impact climate sector	6.1	GwH per million EUR invested	6
Activities negatively affecting biodiversity-sensitive areas	7.4	Percentage	87
Emissions to water	0.0	Tonnes per million EUR invested	90
Hazardous waste and radioactive waste ratio	0.8	Tonnes per million EUR invested	90
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.2	Percentage	91

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

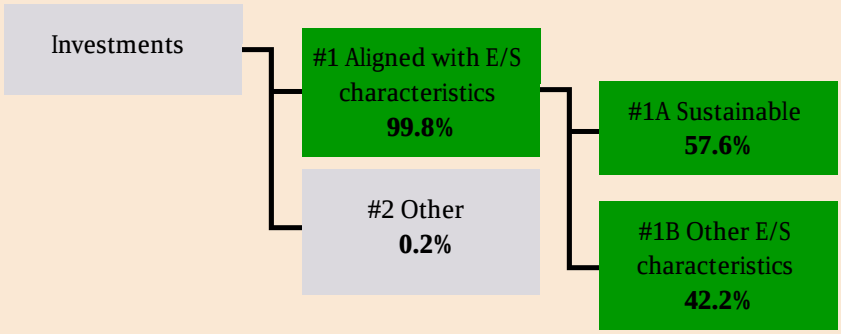
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 57.6% in sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	14.94%
Information Technology	Software & Services	9.25%
Information Technology	Technology Hardware & Equipmen	8.67%
Health Care	Health Care Equipment & Servic	7.68%
Communication Services	Media & Entertainment	7.48%
Health Care	Pharmaceuticals Biotechnology	6.31%
Consumer Discretionary	Consumer Discretionary Distrib	5.79%
Financials	Financial Services	4.93%
Financials	Banks	4.81%
Industrials	Capital Goods	4.46%
Financials	Insurance	4.12%

Real Estate	Equity Real Estate Investment	0.12%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

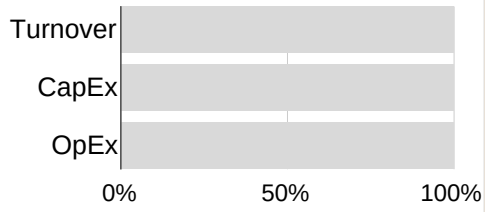
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



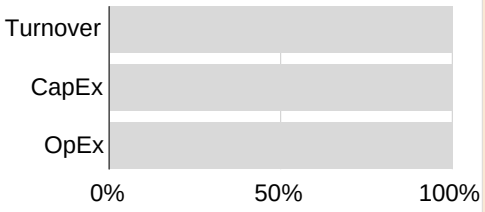
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

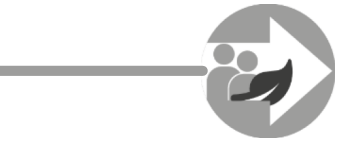
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 57.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 57.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
MGI UK Equity Fund

Legal entity identifier:
549300DGNNV8Z51QTZ82

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.4% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the Sub-Fund is 20% lower than the WACI of the FTSE Allshare Index ("the Benchmark Index"), as measured over a rolling three-year period.
The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.
The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and socialcharacteristics.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	MGI UK Equity Fund	**FTSE All Share Index**
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	54	78

Level of Sustainable Investment
67.40%

…and compared to previous periods?

	MGI UK Equity Fund	FTSE All Share Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	50	68

Level of Sustainable Investment
69.30%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	4432.5	tCO2	96
Scope 2 GHG emissions	870.7	tCO2	96
Scope 3 GHG emissions	68013.1	tCO2	96
Total GHG emissions	73316.3	tCO2	96
Carbon footprint	622.6	tCO2 per M invested	96
GHG intensity of investee companies	962.7	tCO2	96
Exposure to companies active in the fossil fuel sector	11.2	Percentage	96
Share of non-renewable energy consumption and production	63.2	Percentage	95
Energy consumption intensity per high impact climate sector	8.0	GwH per million EUR invested	6
Activities negatively affecting biodiversity-sensitive areas	17.1	Percentage	95
Emissions to water	0.0	Tonnes per million EUR invested	96
Hazardous waste and radioactive waste ratio	2.2	Tonnes per million EUR invested	95
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	96
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.4	Percentage	96
Unadjusted gender pay gap	15.9	Percentage	93
Board gender diversity	45.4	Percentage	97
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	96
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	37.0	Percentage	96
Lack of a human rights policy	2.7	Percentage	96
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

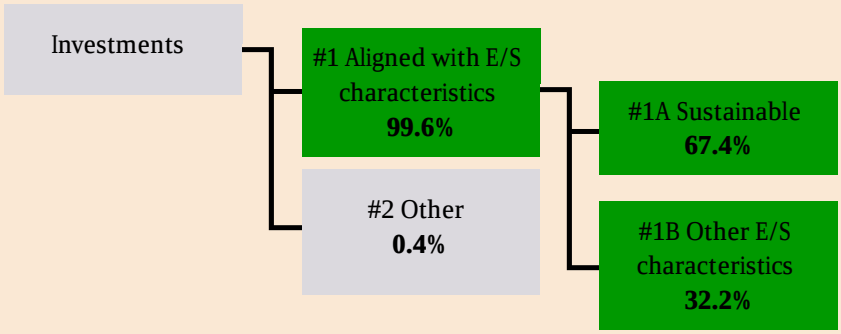
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.6% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 67.4% in sustainable investments.

The remaining 0.4% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

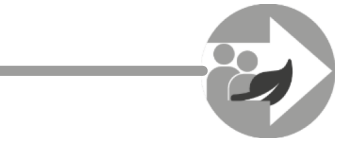
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 67.4% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 67.4% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.4% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Global Small Cap Equity Fund

Legal entity identifier:
549300EZIVU1VNHHRC40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐	☒

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 41.7% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the Sub-Fund is 20% lower than the WACI of the MSCI World Small Cap Index ("the Index"), as measured over a rolling three-year period.

The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.

The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 10%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	Mercer Global Small Cap Equity Fund	**MSCI World Small Cap Index**
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	54	128

Level of Sustainable Investment
41.70%

…and compared to previous periods?

	Mercer Global Small Cap Equity Fund	MSCI World Small Cap Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	47	115

Level of Sustainable Investment
45.40%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	34544.1	tCO2	82
Scope 2 GHG emissions	12842.5	tCO2	82
Scope 3 GHG emissions	454189.9	tCO2	82
Total GHG emissions	501570.7	tCO2	82
Carbon footprint	524.6	tCO2 per M invested	82
GHG intensity of investee companies	763.5	tCO2	82
Exposure to companies active in the fossil fuel sector	2.1	Percentage	83
Share of non-renewable energy consumption and production	83.1	Percentage	81
Energy consumption intensity per high impact climate sector	34.9	GwH per million EUR invested	6
Activities negatively affecting biodiversity-sensitive areas	8.3	Percentage	75
Emissions to water	0.0	Tonnes per million EUR invested	80
Hazardous waste and radioactive waste ratio	3.5	Tonnes per million EUR invested	80
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	83
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	2.5	Percentage	82
Unadjusted gender pay gap	17.4	Percentage	72
Board gender diversity	31.2	Percentage	90
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	82
GHG intensity of investee countries	275.9	tCO2	0
Investee countries subject to social violations (absolute)	0	Percentage	0
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	55.4	Percentage	81
Lack of a human rights policy	19.7	Percentage	82
Average income inequality score	51.9	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

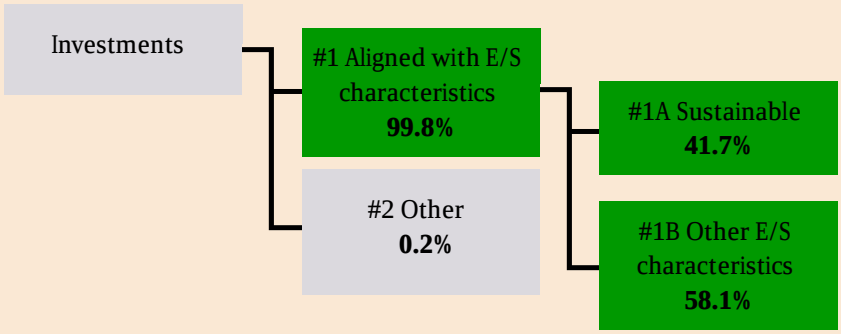
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 41.7% in sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	18.75%
Information Technology	Technology Hardware & Equipmen	9.70%
Health Care	Pharmaceuticals Biotechnology	6.74%
Information Technology	Software & Services	6.56%
Health Care	Health Care Equipment & Servic	6.55%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

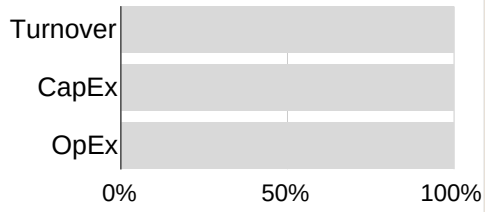
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



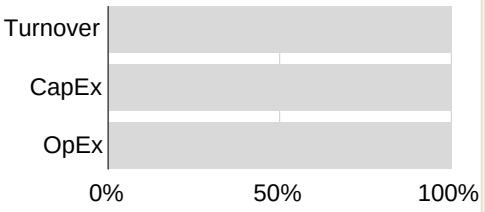
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

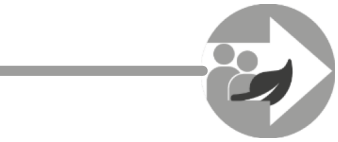
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 41.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 41.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Low Volatility Equity Fund

Legal entity identifier:
549300AT66QYIQMXDX16

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.6% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the Sub-Fund is 20% lower than the WACI of the MSCI World ("the Benchmark Index"), as measured over a rolling three-year period.
The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.
The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and socialcharacteristics.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	Mercer Low Volatility Equity Fund	**MSCI World Index**

Level of Sustainable Investment
62.60%

…and compared to previous periods?

	Mercer Low Volatility Equity Fund	MSCI World Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	51	112

Level of Sustainable Investment
67.00%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	4813.2	tCO2	92
Scope 2 GHG emissions	2329.2	tCO2	92
Scope 3 GHG emissions	77735.8	tCO2	92
Total GHG emissions	84875.	tCO2	92
Carbon footprint	257.5	tCO2 per M invested	92
GHG intensity of investee companies	700.5	tCO2	92
Exposure to companies active in the fossil fuel sector	6.6	Percentage	93
Share of non-renewable energy consumption and production	61.9	Percentage	92
Energy consumption intensity per high impact climate sector	8.6	GwH per million EUR invested	5
Activities negatively affecting biodiversity-sensitive areas	9.4	Percentage	91
Emissions to water	0.0	Tonnes per million EUR invested	92
Hazardous waste and radioactive waste ratio	0.5	Tonnes per million EUR invested	91
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.5	Percentage	92
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.5	Percentage	92
Unadjusted gender pay gap	14.4	Percentage	85
Board gender diversity	36.3	Percentage	95
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	92

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

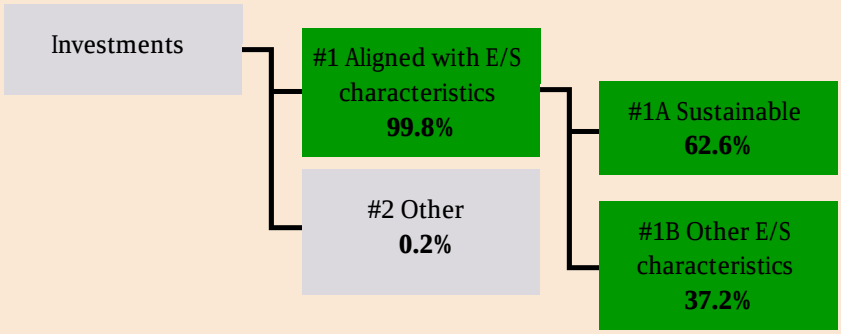
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 62.6% in sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Financial Services	8.38%
Information Technology	Software & Services	8.06%
Health Care	Pharmaceuticals Biotechnology	8.04%
Health Care	Health Care Equipment & Servic	7.72%
Information Technology	Semiconductors & Semiconductor	6.29%

Consumer Discretionary	Automobiles & Components	0.12%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

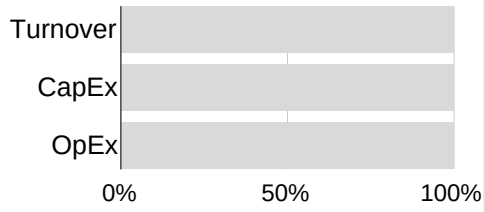
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



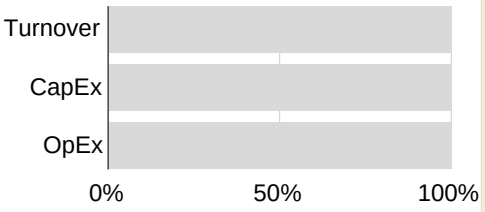
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

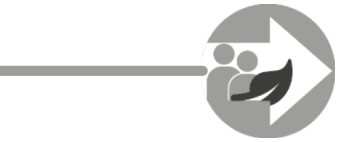
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 62.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 62.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Diversified Growth Fund

Legal entity identifier:
635400C72M37GX5EBX95

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.5% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ('WACI', defined as Scope 1 and 2 emissions tCo2/$M AUM) of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint", defined as Scope 1 and 2 emissions tCo2/$ AUM) over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2026. Carbon Footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.
The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint
31/12/2019	N/A
30/06/2025	53
30/06/2026	32

Date	WACI
31/12/2019	344
30/06/2025	148
30/06/2026	99

Level of Sustainable Investment
47.50%

…and compared to previous periods?

Date	Carbon Footprint
31/12/2019	N/A
30/06/2025	53

Date	WACI
31/12/2019	344
30/06/2025	148

Level of Sustainable Investment
42.32%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	199215.2	tCO2	24

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

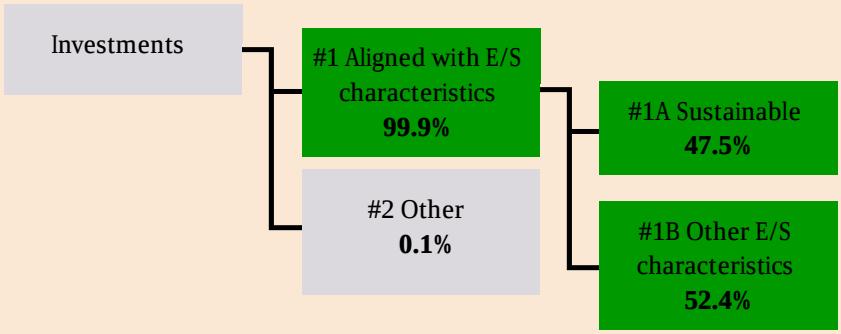
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.9% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 47.5% in sustainable investments.

The remaining 0.1% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

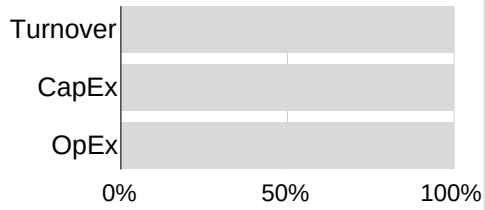
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



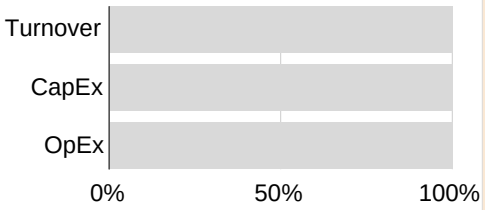
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 47.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 47.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.1% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Global High Yield Bond Fund

Legal entity identifier:
XTPS7DZ2GZKC1PRMXW30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.6% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund.
The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes (scope 1 and 2 emissions/$M revenue), being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 5%.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, any securities within the portfolio that did not meet the exclusion criteria were identified and divested from. Divestment, where required, was undertaken in line with the Investment Manager's exclusions framework and within a reasonable time to allow for an orderly exit. As such, the Sub-Fund held excluded exposures pending completion of divestment. As of the reporting date, the Sub-Fund does not have exposure to any such securities.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
25.60%

…and compared to previous periods?

Level of Sustainable Investment
29.90%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	55967.6	tCO2	53
Scope 2 GHG emissions	16997.9	tCO2	53
Scope 3 GHG emissions	663576.1	tCO2	53
Total GHG emissions	735768.4	tCO2	53
Carbon footprint	839.3	tCO2 per M invested	53
GHG intensity of investee companies	1351.6	tCO2	53
Exposure to companies active in the fossil fuel sector	12.1	Percentage	54
Share of non-renewable energy consumption and production	80.3	Percentage	53
Energy consumption intensity per high impact climate sector	12.9	GwH per million EUR invested	2
Activities negatively affecting biodiversity-sensitive areas	17.2	Percentage	45
Emissions to water	0.0	Tonnes per million EUR invested	52
Hazardous waste and radioactive waste ratio	1.3	Tonnes per million EUR invested	50
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	Percentage	62
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	10.8	Percentage	58
Unadjusted gender pay gap	15.9	Percentage	48
Board gender diversity	27.1	Percentage	65
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	62
GHG intensity of investee countries	223.2	tCO2	4
Investee countries subject to social violations (absolute)	0	Percentage	4
Investee countries subject to social violations (relative)	0	Percentage	4
Investments in companies without carbon emission reduction initiatives	57.1	Percentage	52
Lack of a human rights policy	27.2	Percentage	58
Average income inequality score	39.7	Ratio	4

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

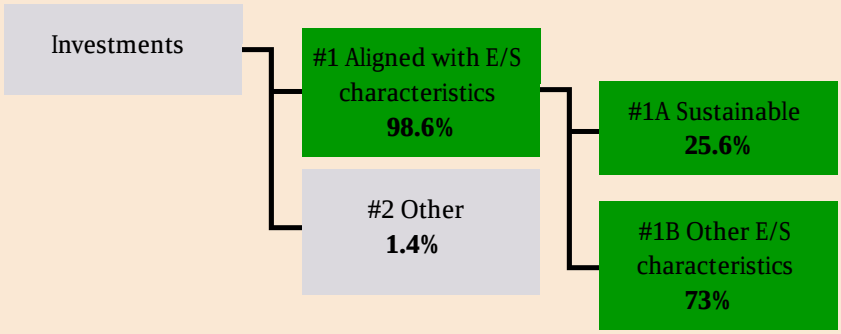
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

98.6% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 25.6% in sustainable investments.

The remaining 1.4% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

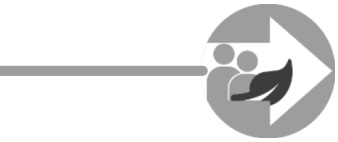
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 25.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 25.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 1.4% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo2), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Short Duration Global Bond Fund 1

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund.
The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes (scope 1 and 2 emissions/$M revenue), being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

Level of Sustainable Investment
65.00%

…and compared to previous periods?

Level of Sustainable Investment
63.80%

Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	18257.7	tCO2	55
Scope 2 GHG emissions	8770.8	tCO2	55
Scope 3 GHG emissions	250480.5	tCO2	55
Total GHG emissions	277382.7	tCO2	55
Carbon footprint	304.5	tCO2 per M invested	55
GHG intensity of investee companies	673.7	tCO2	55
Exposure to companies active in the fossil fuel sector	6.0	Percentage	55
Share of non-renewable energy consumption and production	57.1	Percentage	55
Energy consumption intensity per high impact climate sector	4.9	GwH per million EUR invested	2
Activities negatively affecting biodiversity-sensitive areas	8.2	Percentage	51
Emissions to water	0.0	Tonnes per million EUR invested	55
Hazardous waste and radioactive waste ratio	0.4	Tonnes per million EUR invested	54
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	56
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	2.2	Percentage	56
Unadjusted gender pay gap	17.4	Percentage	51
Board gender diversity	37.5	Percentage	66
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	56

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

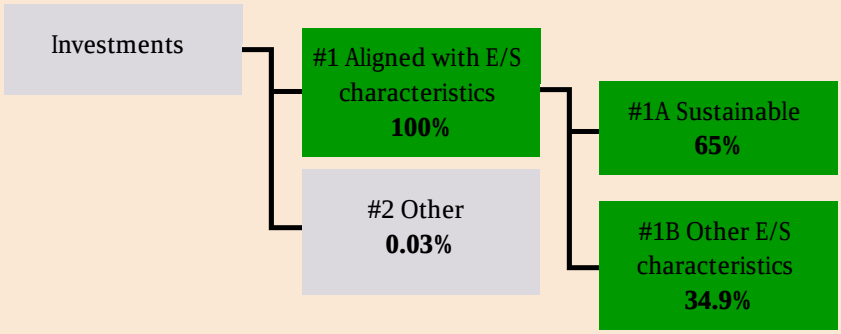
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

100% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 65% in sustainable investments.

The remaining 0.03% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund had over 100% at times due to unsettled transactions at quarter end.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	36.84%
Communication Services	Telecommunication Services	5.16%
Real Estate	Real Estate	4.94%
Utilities	Utilities	4.67%

Industrials	Industrials	0.03%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

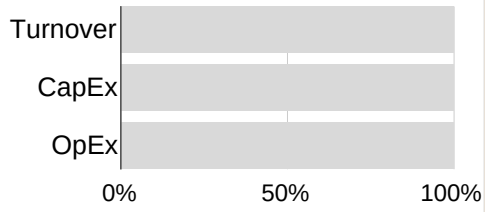
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



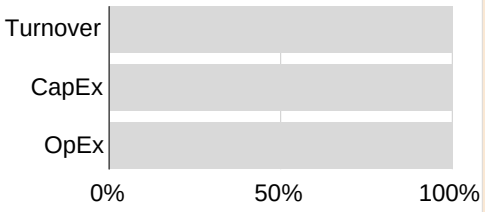
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

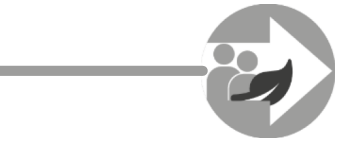
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 65% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 65% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.03% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities by the Sub-Investment Manager were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by the appointed sub-investment manager to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid issuers as described in the exclusionary screens above and to invest in line with the Sub-Funds stated strategy as decribed in section "To what extent were the environmental and/or social characteristics promoted by this financial product met?".

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Short Duration Global Bond Fund 2

Legal entity identifier:
UZ0PUFV2ZBSMG2H1BI40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It made **sustainable investments with an environmental objective:** __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective:** __%

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund.
The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes (scope 1 and 2 emissions/$M revenue), being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

…and compared to previous periods?

Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	2396.4	tCO2	12
Scope 2 GHG emissions	910.1	tCO2	12

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

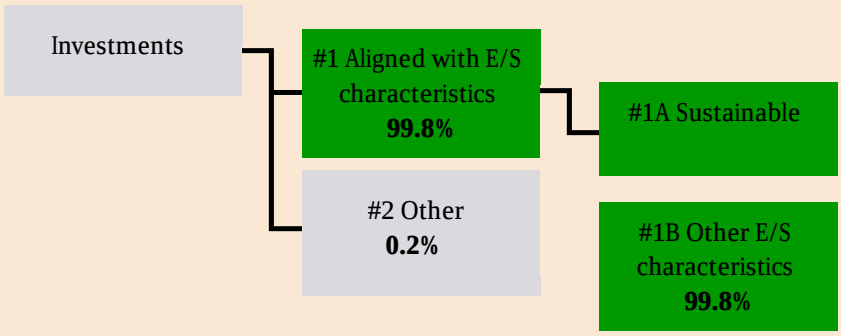
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund did not make a commitment to sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

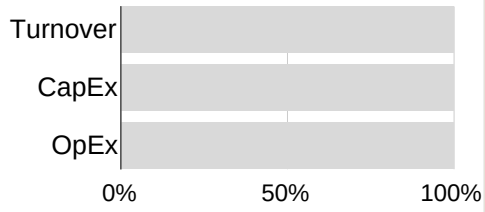
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



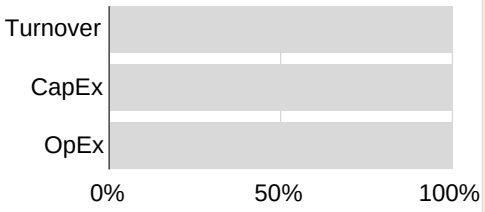
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

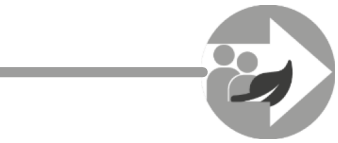
How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable



What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.18% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo2), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Global Credit Fund

Legal entity identifier:
549300VHJQTAIYI1LU59

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It made **sustainable investments with an environmental objective:** __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective:** __%

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund.
The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes (scope 1 and 2 emissions/$M revenue), being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-Fund commits to making a minimum allocation to sustainable investments of 25%.

The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:
- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.
The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.
The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
56.00%

…and compared to previous periods?

Level of Sustainable Investment
54.00%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	37673.9	tCO2	64
Scope 2 GHG emissions	11642.3	tCO2	64
Scope 3 GHG emissions	392317.7	tCO2	64
Total GHG emissions	441174.9	tCO2	64
Carbon footprint	374.4	tCO2 per M invested	64
GHG intensity of investee companies	911.3	tCO2	64
Exposure to companies active in the fossil fuel sector	14.1	Percentage	65
Share of non-renewable energy consumption and production	65.2	Percentage	64
Energy consumption intensity per high impact climate sector	7.2	GwH per million EUR invested	2
Activities negatively affecting biodiversity-sensitive areas	11.9	Percentage	59
Emissions to water	0.0	Tonnes per million EUR invested	63
Hazardous waste and radioactive waste ratio	0.5	Tonnes per million EUR invested	63
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	66
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	3.5	Percentage	65
Unadjusted gender pay gap	15.6	Percentage	59
Board gender diversity	36.8	Percentage	76
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	65
GHG intensity of investee countries	257.7	tCO2	5
Investee countries subject to social violations (absolute)	0.7	Percentage	5
Investee countries subject to social violations (relative)	5.7	Percentage	5
Investments in companies without carbon emission reduction initiatives	42.8	Percentage	61
Lack of a human rights policy	9.9	Percentage	65
Average income inequality score	37.5	Ratio	5

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

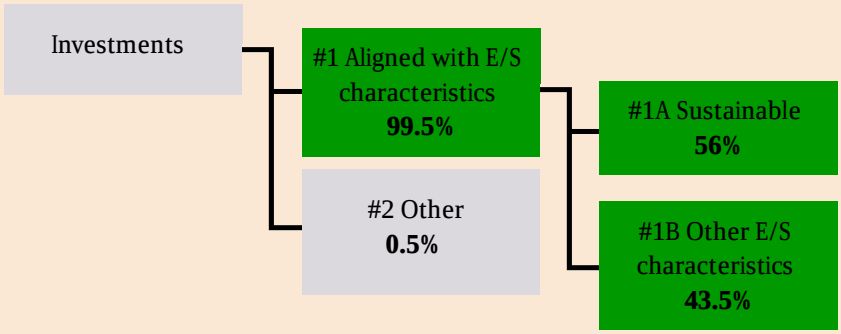
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.5% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 56% in sustainable investments.

The remaining 0.5% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

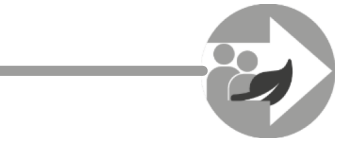
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 56% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 56% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.5% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo2), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Global Equity Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** __%
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made **sustainable investments with a social objective:** __%
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.2% of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.
The Sub-Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the MSCI World ex Selected Securities Index, (the "Benchmark Index") which applies a negative environmental and social screen in line with the environmental and social characteristics of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the extent to which the Sub-Fund tracked the benchmark
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics

How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.05%.
The exposure of the Sub-Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"
The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.
The Investment Manager assessed the Benchmark Index versus the MSCI World Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Sub-Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":
The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
65.20%

…and compared to previous periods?

Level of Sustainable Investment
69.00%

The tracking error for the previous reporting period was 0.08%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	206568.9	tCO2	94
Scope 2 GHG emissions	50574.9	tCO2	94
Scope 3 GHG emissions	2076688.8	tCO2	94
Total GHG emissions	2333829.5	tCO2	94
Carbon footprint	268.9	tCO2 per M invested	94
GHG intensity of investee companies	823.6	tCO2	94
Exposure to companies active in the fossil fuel sector	7.6	Percentage	94
Share of non-renewable energy consumption and production	56.1	Percentage	94
Energy consumption intensity per high impact climate sector	10.5	GwH per million EUR invested	6
Activities negatively affecting biodiversity-sensitive areas	10.8	Percentage	92
Emissions to water	0.0	Tonnes per million EUR invested	94
Hazardous waste and radioactive waste ratio	0.7	Tonnes per million EUR invested	94
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.1	Percentage	94
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.1	Percentage	94
Unadjusted gender pay gap	14.2	Percentage	90
Board gender diversity	35.6	Percentage	96
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	94
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	43.8	Percentage	94
Lack of a human rights policy	3.4	Percentage	94
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

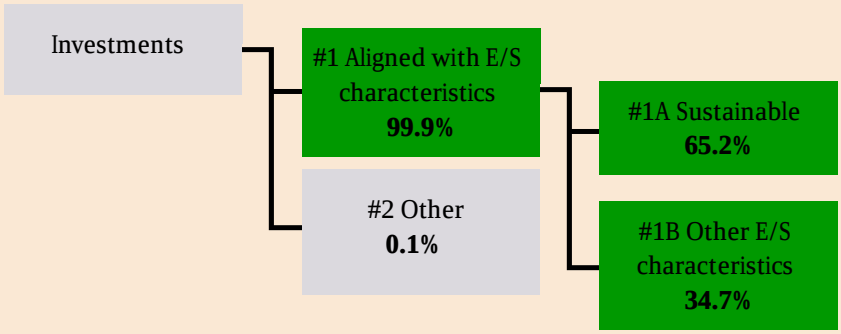
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.9% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 65.2% in sustainable investments.

The remaining 0.1% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	15.78%
Industrials	Capital Goods	8.93%
Information Technology	Technology Hardware & Equipmen	8.18%
Financials	Banks	7.39%
Communication Services	Media & Entertainment	6.81%
Information Technology	Software & Services	6.81%
Health Care	Pharmaceuticals Biotechnology	6.64%
Financials	Financial Services	5.94%
Consumer Discretionary	Consumer Discretionary Distrib	4.45%
Materials	Materials	2.98%
Financials	Insurance	2.81%
Utilities	Utilities	2.64%
Health Care	Health Care Equipment & Servic	2.59%
Energy	Energy	2.54%

Consumer Staples	Household & Personal Products	1.01%
Real Estate	Real Estate Management & Devel	0.28%
Industrials	Aerospace/Defense	0.08%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

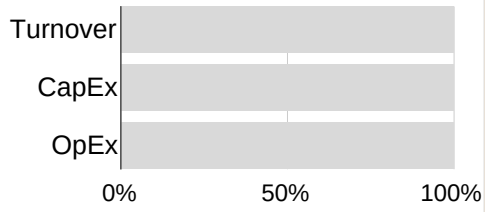
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



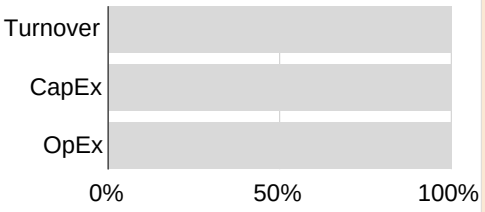
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 65.2% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 65.2% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.1% of assets which fell into the sub-category "#2 Other" represents the indirect exposures w hich were used for efficient portfolio management purposes only. Such assets were cash, FX and fi nancial derivative instruments which are used for liquidity management, and such assets are not su bject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Investment Strategy: The Sub-Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?
Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.
Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Underlying Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

How does the reference benchmark differ from a broad market index?

The Benchmark Index of the Underlying Fund, based on the methodology and assessment of the index provider, applies a negative screen to the overall constituents of the MSCI World Index or "Parent Index", to exclude those companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty (NPT) and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.
- ((iv) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at:https://www.msci.com/index-methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Sub-Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

How did this financial product perform compared with the reference benchmark?

Please see below. The table represents the Sub-Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

How did this financial product perform compared with the broad market index?

Please see below. The table represents the Sub- Fund and Broad Market Index (MSCI World Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	3.00%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Diversified Retirement Fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint", defined as Scope 1 and 2 emissions tCo2/$ AUM) over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2026. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.
The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint
31/12/2019	N/A

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	44658.9	tCO2	21
Scope 2 GHG emissions	12287.3	tCO2	21
Scope 3 GHG emissions	422762.4	tCO2	21
Total GHG emissions	479116.5	tCO2	21
Carbon footprint	375.2	tCO2 per M invested	21
GHG intensity of investee companies	859.1	tCO2	21
Exposure to companies active in the fossil fuel sector	6.7	Percentage	21
Share of non-renewable energy consumption and production	61.1	Percentage	21
Energy consumption intensity per high impact climate sector	12.7	GwH per million EUR invested	1
Activities negatively affecting biodiversity-sensitive areas	9.4	Percentage	20
Emissions to water	0.0	Tonnes per million EUR invested	21
Hazardous waste and radioactive waste ratio	1.4	Tonnes per million EUR invested	21
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.2	Percentage	22
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1.9	Percentage	22

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

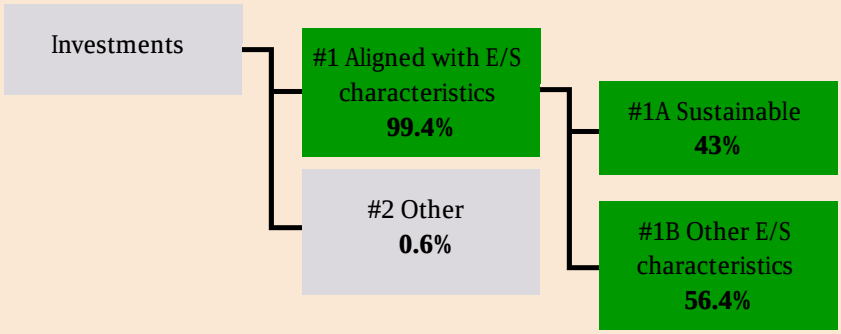
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.4% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 43% in sustainable investments.

The remaining 0.6% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

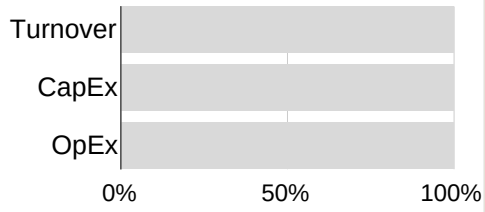
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



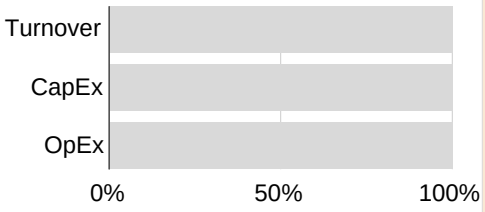
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 43% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 43% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.6% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Absolute Return Fixed Income Fund

Legal entity identifier:
549300EQ9OZ2OIZDGK60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund.
The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes (scope 1 and 2 emissions/$M revenue), being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, any securities within the portfolio that did not meet the exclusion criteria were identified and divested from. Divestment, where required, was undertaken in line with the Investment Manager's exclusions framework and within a reasonable time to allow for an orderly exit. As such, the Sub-Fund held excluded exposures pending completion of divestment. As of the reporting date, the Sub-Fund does not have exposure to any such securities. The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

…and compared to previous periods?

Throughout the previous reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	9975.6	tCO2	8
Scope 2 GHG emissions	2281.9	tCO2	8

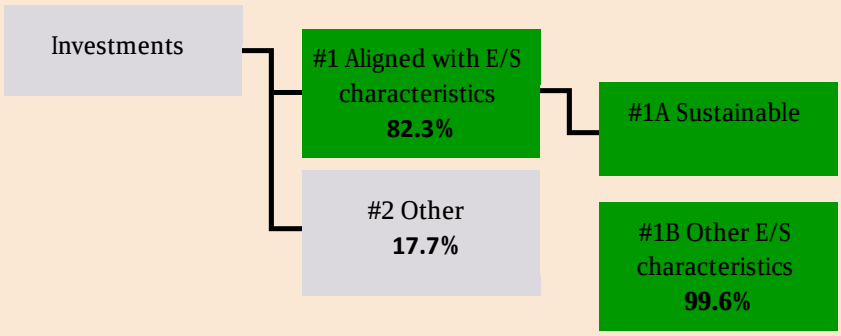
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

82.3% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristicspr omoted by the Sub-Fund. The Sub-Fund did not make a commitment to sustainable investments.

The remaining 17.7% of the Sub-Fund's assets are in other investments ("#2Other)," which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table is as at the reporting date. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period. These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Government	Sovereign	41.80%
Mortgage Securities	UMBS Collateral	17.97%
Mortgage Securities	WL Collateral CMO	7.80%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

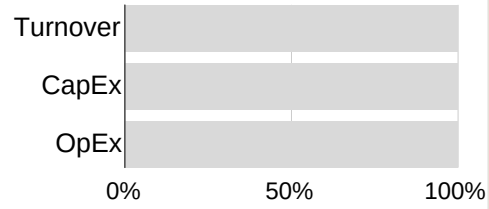
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g.f or a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



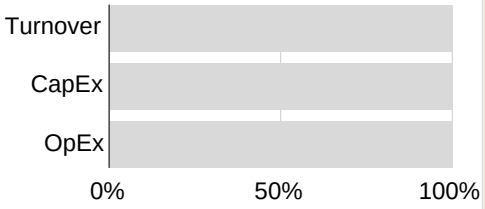
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph representsof the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin.

The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.4% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo2), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Emerging Markets Equity Fund

Legal entity identifier:
549300G3M7HA84YPTC87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** __%
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made **sustainable investments with a social objective:** __%
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.6% of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.
The Sub-Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the MSCI Emerging Markets ex Selected Securities Index, (the "Benchmark Index") which applies a negative environmental and social screen in line with the environmental and social characteristics of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 10%.
The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the extent to which the Sub-Fund tracked the benchmark
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics

How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.43%.
The exposure of the Sub-Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"
The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.
The Investment Manager assessed the Benchmark Index versus the MSCI Emerging Markets Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Sub-Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":
The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period is found below.

Level of Sustainable Investment
42.60%

…and compared to previous periods?

Level of Sustainable Investment
40.50%

The tracking error for the previous reporting period was 0.57%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	299368.3	tCO2	90
Scope 2 GHG emissions	96237.5	tCO2	90
Scope 3 GHG emissions	1218941.9	tCO2	90
Total GHG emissions	1614547.7	tCO2	90
Carbon footprint	439.3	tCO2 per M invested	90
GHG intensity of investee companies	1048.5	tCO2	90
Exposure to companies active in the fossil fuel sector	5.4	Percentage	90
Share of non-renewable energy consumption and production	86.0	Percentage	89
Energy consumption intensity per high impact climate sector	32.2	GwH per million EUR invested	7
Activities negatively affecting biodiversity-sensitive areas	5.2	Percentage	88
Emissions to water	0.0	Tonnes per million EUR invested	90
Hazardous waste and radioactive waste ratio	9.4	Tonnes per million EUR invested	89
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.4	Percentage	90
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.8	Percentage	89
Unadjusted gender pay gap	14.1	Percentage	80
Board gender diversity	21.5	Percentage	90
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.4	Percentage	90
GHG intensity of investee countries	223.2	tCO2	4
Investee countries subject to social violations (absolute)	0	Percentage	4
Investee countries subject to social violations (relative)	0	Percentage	4
Investments in companies without carbon emission reduction initiatives	71.0	Percentage	89
Lack of a human rights policy	7.9	Percentage	90
Average income inequality score	39.7	Ratio	4

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

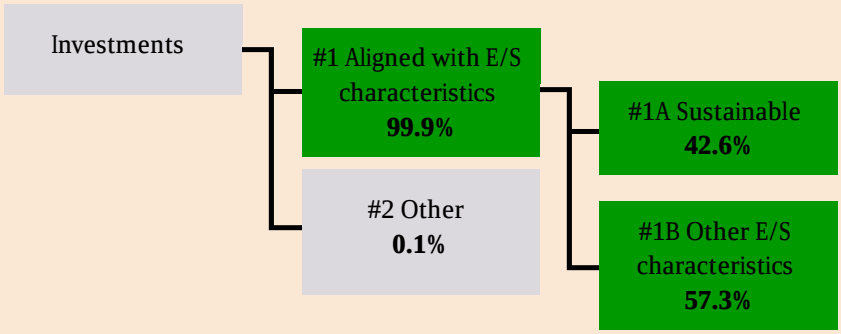
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.9% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 42.6% in sustainable investments.

The remaining 0.1% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

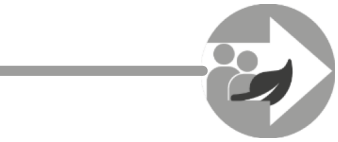
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 42.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 42.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.1% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Investment Strategy: The Sub-Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?
Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.
Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.0
The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.
Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Underlying Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

How does the reference benchmark differ from a broad market index?

The Benchmark Index of the Underlying Fund, based on the methodology and assessment of the index provider, applies a negative screen to the overall constituents of the MSCI Emerging Markets Index or "Parent Index", to exclude at each rebalancing date those companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty (NPT) and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales;
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.
- ((iv) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at https://www.msci.com/index-methodology.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Sub-Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

How did this financial product perform compared with the reference benchmark?

Please see below. The table represents the Sub- Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

How did this financial product perform compared with the broad market index?

Please see below. The table represents the Underlying Fund and Broad Market Index (MSCI Emerging Markets Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	1.10%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Global Select Equity Fund

Legal entity identifier:
549300QVG3ZL5MLNSG41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.9% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental and social characteristics are to allocate to securities that have environmental and social considerations. In order to assist with the promotion of environmental and social characteristics by the Sub-Fund, in selecting Sub-Investment Managers for the Sub-Fund, the Investment Manager will limit the available universe to those strategies that have received, at the time of appointment, the highest (ESG1) or second highest (ESG2) ESG rating by Mercer's global manager research team i.e. strategies considered best-in-class, which are responsive to ESG risks as well as opportunities, and those with strong stewardship processes.

In selecting the Sub-Investment Managers for the Sub-Fund, the Investment Manager seeks to combine strategies that in turn embed various environmental and/or social considerations in their investment processes while also adhering to good governance standards. Environmental considerations may include greenhouse gas reduction, renewable energy, waste reduction, clean water provision, biodiversity or the circular economy and social considerations include the reduction of inequality, encouraging social cohesion, fair labour practices, investments in human capital or investments in socially disadvantaged communities.

The Sub-Fund applies a negative screen to the overall constituents of the investment universe to exclude companies with material involvement in the following:

- Adult Entertainment.
- Alcohol
- Fossil Fuels
- Coal
- Oil Sands
- Gambling

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-Fund commits to making a minimum allocation to sustainable investments of 35%.

The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the ESG Ratings of the Sub-Investment Managers
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to Sub-Investment Managers that were rated ESG 3 or ESG 4.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
60.90%

…and compared to previous periods?

Level of Sustainable Investment
67.30%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	7681.9	tCO2	93
Scope 2 GHG emissions	5474.5	tCO2	93
Scope 3 GHG emissions	124672.3	tCO2	93
Total GHG emissions	137828.6	tCO2	93
Carbon footprint	208.6	tCO2 per M invested	93
GHG intensity of investee companies	728.8	tCO2	93
Exposure to companies active in the fossil fuel sector	3.5	Percentage	93
Share of non-renewable energy consumption and production	63.5	Percentage	93
Energy consumption intensity per high impact climate sector	3.4	GwH per million EUR invested	7
Activities negatively affecting biodiversity-sensitive areas	12.7	Percentage	91
Emissions to water	0.0	Tonnes per million EUR invested	93
Hazardous waste and radioactive waste ratio	0.3	Tonnes per million EUR invested	93
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	93
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.3	Percentage	93
Unadjusted gender pay gap	12.7	Percentage	89
Board gender diversity	35.5	Percentage	95
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	93
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	48.0	Percentage	93
Lack of a human rights policy	2.9	Percentage	93
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

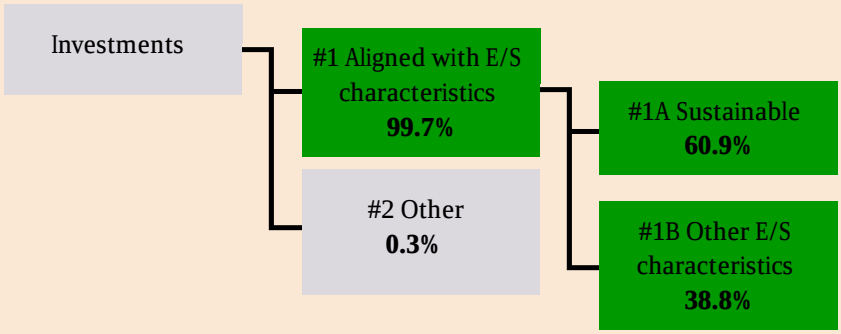
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.7% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 60.9% in sustainable investments.

The remaining 0.3% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	17.52%
Industrials	Capital Goods	12.72%
Information Technology	Software & Services	7.69%
Health Care	Pharmaceuticals Biotechnology	7.01%
Financials	Banks	6.68%
Information Technology	Technology Hardware & Equipmen	6.17%
Materials	Materials	5.33%
Consumer Discretionary	Consumer Discretionary Distrib	4.59%
Industrials	Commercial & Professional Serv	3.93%
Health Care	Health Care Equipment & Servic	3.78%
Communication Services	Media & Entertainment	3.71%

Consumer Staples	Household & Personal Products	0.35%
Real Estate	Equity Real Estate Investment	0.32%
Real Estate	Real Estate Management & Devel	0.11%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

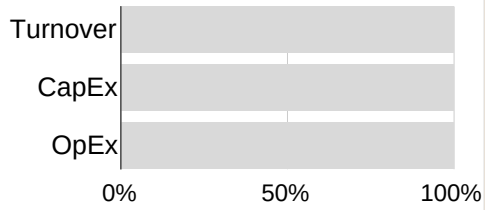
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



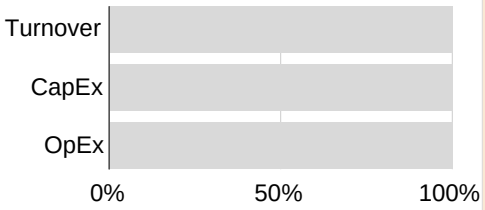
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

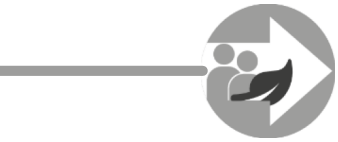
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 60.9% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 60.9% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.3% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. The Investment Manager also assessed the Sub-Investment Managers ESG ratings as part of the selection process.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Short Duration Bond Fund 3

Legal entity identifier:
549300INXDODUBEO6082

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.5% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change by reducing the potential carbon footprint of the Sub-Fund.
The Sub-Fund seeks to avoid exposure to, in the opinion of the Investment Manager (or its delegate), the worst carbon emitters with the lowest carbon transition potential, being those companies:

- whose carbon emissions intensity exceed 3,000 tonnes (scope 1 and 2 emissions/$M revenue), being the worst carbon emitters, unless Investment Manager's (or its delegates') proprietary analysis of such companies indicates strong carbon transition potential; or
- that generate more than 1% of their revenue from (i) thermal coal extraction; (ii) arctic drilling; or (iii) oil tar sand mining

The Sub-Fund's social characteristics are to avoid investment in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 15%.

The Investment Manager measured the attainment of the environmental and social characteristics by

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order:

- to identify companies based on the carbon intensity thresholds metrics set out above in order to determine exposure to considered the worst carbon emitters with the lowest carbon transition potential; and.
- to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.
The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.
The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
72.50%

…and compared to previous periods?

Level of Sustainable Investment
66.10%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	5660.1	tCO2	51
Scope 2 GHG emissions	2373.8	tCO2	51
Scope 3 GHG emissions	120832.5	tCO2	51
Total GHG emissions	128799.6	tCO2	51
Carbon footprint	291.5	tCO2 per M invested	51
GHG intensity of investee companies	628.5	tCO2	52
Exposure to companies active in the fossil fuel sector	2.8	Percentage	52
Share of non-renewable energy consumption and production	59.4	Percentage	52
Energy consumption intensity per high impact climate sector	2.7	GwH per million EUR invested	1
Activities negatively affecting biodiversity-sensitive areas	6.9	Percentage	49
Emissions to water	0.0	Tonnes per million EUR invested	51
Hazardous waste and radioactive waste ratio	0.2	Tonnes per million EUR invested	51
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	52
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	2.2	Percentage	52
Unadjusted gender pay gap	17.4	Percentage	49
Board gender diversity	38.0	Percentage	63

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

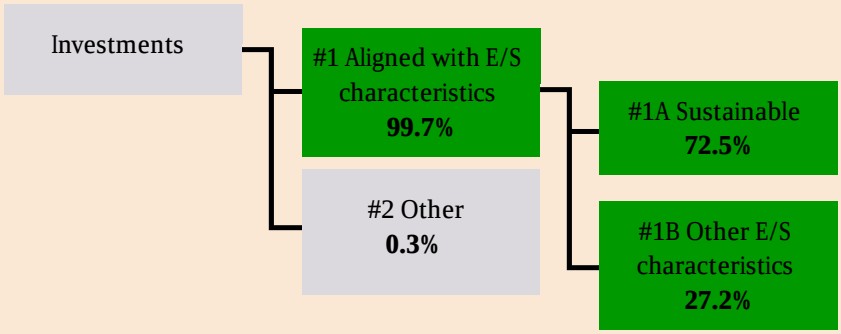
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.7% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 72.5% in sustainable investments.

The remaining 0.3% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	42.88%
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.96%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

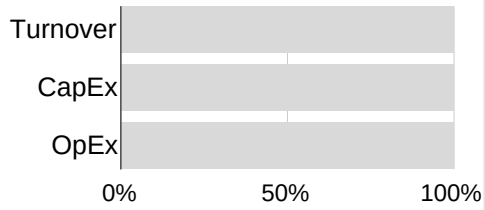
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



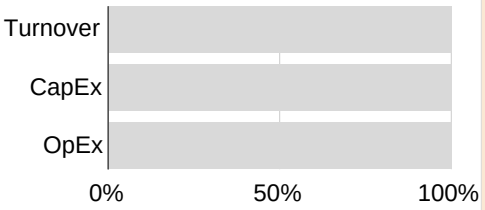
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

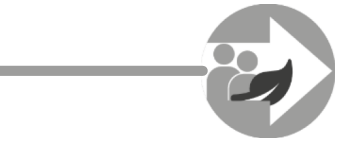
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 72.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 72.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.3% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and attained assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies with high carbon emissions (deemed as over 3000tCo2), and low transition capacity.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Multi Asset Defensive Fund

Legal entity identifier:
549300DKVQRAEEUK5Y14

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.7% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 5%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint", defined as Scope 1 and 2 emissions tCo2/$ AUM) over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2026. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint
31/12/2019	N/A
30/06/2025	51
30/06/2026	40

Date	WACI

30/06/2025	51

Date	WACI
31/12/2019	202
30/06/2025	104

Level of Sustainable Investment
26.10%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	451.2	tCO2	16
Scope 2 GHG emissions	127.6	tCO2	16

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

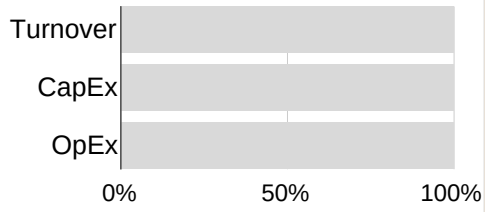
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



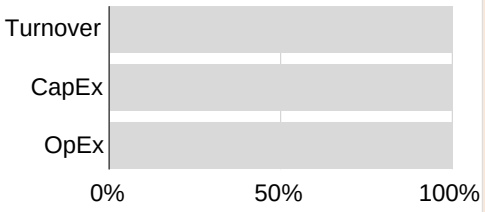
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 32.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 32.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Multi Asset High Growth Fund

Legal entity identifier:
549300FC6DZB61B1L534

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.6% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint", defined as Scope 1 and 2 emissions tCo2/$ AUM) over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2026. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint
31/12/2019	NA
30/06/2025	52
30/06/2026	34

Date	WACI
31/12/2019	313
30/06/2025	116
4/7/2026	101

Level of Sustainable Investment
51.60%

…and compared to previous periods?

Date	Carbon Footprint
31/12/2019	NA
30/06/2025	52

Date	WACI
31/12/2019	313
30/06/2025	116

Level of Sustainable Investment
53.40%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	16291.8	tCO2	33
Scope 2 GHG emissions	4482.1	tCO2	33
Scope 3 GHG emissions	142722.5	tCO2	33
Total GHG emissions	163346.9	tCO2	33
Carbon footprint	324.6	tCO2 per M invested	33
GHG intensity of investee companies	835.6	tCO2	33
Exposure to companies active in the fossil fuel sector	6.1	Percentage	33
Share of non-renewable energy consumption and production	59.6	Percentage	33
Energy consumption intensity per high impact climate sector	13.9	GwH per million EUR invested	2
Activities negatively affecting biodiversity-sensitive areas	8.8	Percentage	32
Emissions to water	0.0	Tonnes per million EUR invested	33
Hazardous waste and radioactive waste ratio	1.6	Tonnes per million EUR invested	33
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.2	Percentage	33
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.9	Percentage	33
Unadjusted gender pay gap	14.3	Percentage	31
Board gender diversity	33.9	Percentage	49
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.1	Percentage	33
GHG intensity of investee countries	413.7	tCO2	5
Investee countries subject to social violations (absolute)	4.3	Percentage	13
Investee countries subject to social violations (relative)	5.9	Percentage	13
Investments in companies without carbon emission reduction initiatives	44.9	Percentage	30
Lack of a human rights policy	5.0	Percentage	33
Average income inequality score	37.9	Ratio	5

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

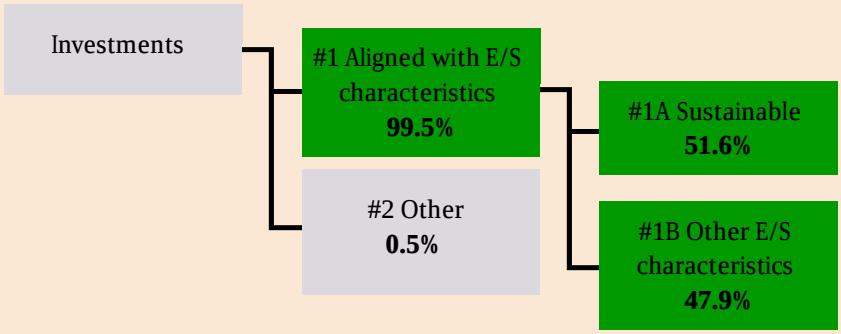
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.5% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 51.6% in sustainable investments.

The remaining 0.5 % of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 51.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 51.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.5% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Multi Asset Moderate Growth Fund

Legal entity identifier:
5493006SDSNPPMPUJ315

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** __%
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made **sustainable investments with a social objective:** __%
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 45.3% of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 10%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ('WACI',defined as Scope 1 and 2 emissions tCo2/$M AUM) of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint", defined as Scope 1 and 2 emissions tCo2/$ AUM) over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2026. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint

30/06/2025	119

Level of Sustainable Investment
42.10%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	3310.2	tCO2	26
Scope 2 GHG emissions	907.6	tCO2	26
Scope 3 GHG emissions	30552.4	tCO2	26
Total GHG emissions	34729.7	tCO2	26
Carbon footprint	359.3	tCO2 per M invested	26
GHG intensity of investee companies	862.2	tCO2	26
Exposure to companies active in the fossil fuel sector	6.8	Percentage	26
Share of non-renewable energy consumption and production	60.1	Percentage	26
Energy consumption intensity per high impact climate sector	12.9	GwH per million EUR invested	2
Activities negatively affecting biodiversity-sensitive areas	9.5	Percentage	25
Emissions to water	0.0	Tonnes per million EUR invested	26
Hazardous waste and radioactive waste ratio	1.5	Tonnes per million EUR invested	25
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.2	Percentage	26
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1.5	Percentage	26
Unadjusted gender pay gap	14.5	Percentage	24
Board gender diversity	34.5	Percentage	43
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.1	Percentage	26
GHG intensity of investee countries	362.4	tCO2	7
Investee countries subject to social violations (absolute)	5	Percentage	20
Investee countries subject to social violations (relative)	6.2	Percentage	20
Investments in companies without carbon emission reduction initiatives	45.1	Percentage	23
Lack of a human rights policy	6.1	Percentage	26
Average income inequality score	37.6	Ratio	7

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: The top investments of the Sub-Fund as at the reporting period are shown below.

Largest investments	Sector	% Assets	Country

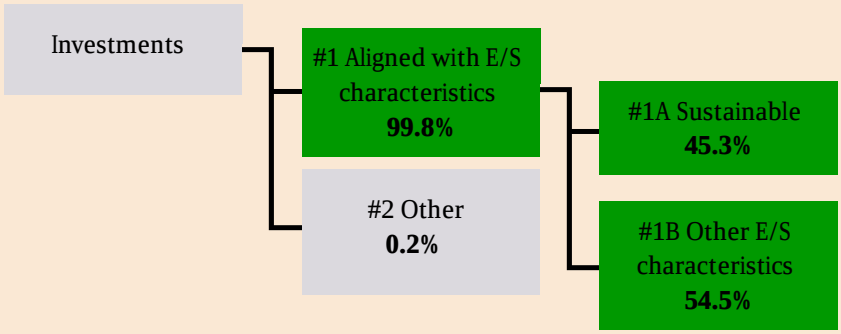
Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 45.3% in sustainable investments.

The remaining 0.2 % of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

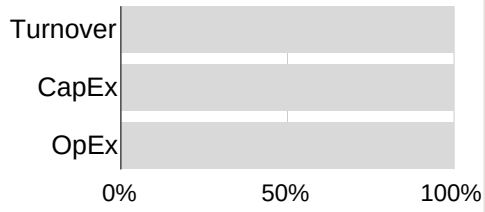
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



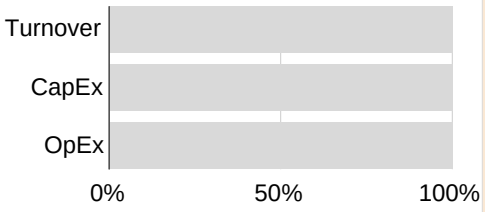
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 45.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 45.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Multi Asset Growth Fund

Legal entity identifier:
5493001MO4IPX7PWS070

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from 2019 levels by 2030, calculated relative to the size of the Sub-Fund.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint", defined as Scope 1 and 2 emissions tCo2/$ AUM) over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2026. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	188234.5	tCO2	31
Scope 2 GHG emissions	51380.9	tCO2	31
Scope 3 GHG emissions	1605328.6	tCO2	31
Total GHG emissions	1843761.7	tCO2	31
Carbon footprint	291.6	tCO2 per M invested	31
GHG intensity of investee companies	797.4	tCO2	31
Exposure to companies active in the fossil fuel sector	5.7	Percentage	31
Share of non-renewable energy consumption and production	58.4	Percentage	31
Energy consumption intensity per high impact climate sector	14.0	GwH per million EUR invested	2
Activities negatively affecting biodiversity-sensitive areas	8.3	Percentage	31
Emissions to water	0.0	Tonnes per million EUR invested	31
Hazardous waste and radioactive waste ratio	1.6	Tonnes per million EUR invested	31
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.2	Percentage	32
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.6	Percentage	31
Unadjusted gender pay gap	14.5	Percentage	30
Board gender diversity	34.5	Percentage	47
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.1	Percentage	32
GHG intensity of investee countries	325.4	tCO2	6
Investee countries subject to social violations (absolute)	4.3	Percentage	11
Investee countries subject to social violations (relative)	5.9	Percentage	11
Investments in companies without carbon emission reduction initiatives	44.1	Percentage	28
Lack of a human rights policy	4.2	Percentage	31
Average income inequality score	37.4	Ratio	6

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

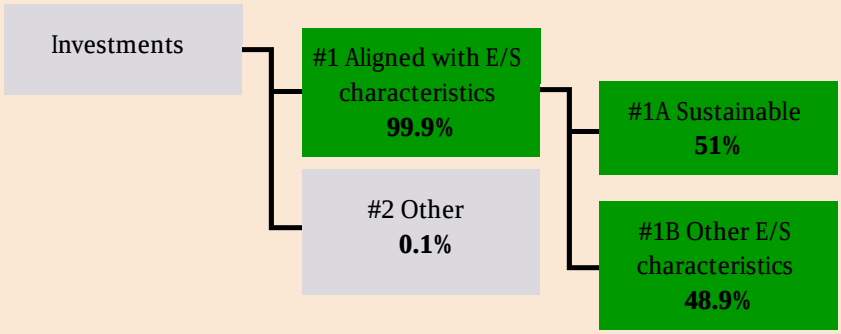
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.9% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 51% in sustainable investments.

The remaining 0.1% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

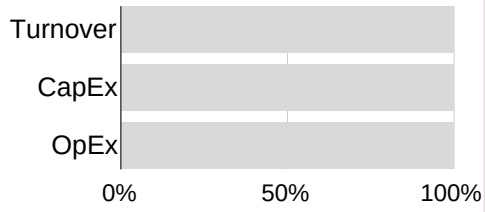
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



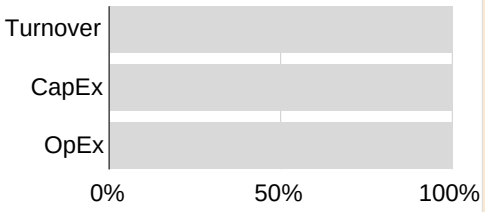
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 51% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 51% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.1% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Arrowstreet Global Equity Fund

Legal entity identifier:
549300TCUHIDV15HL197

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It made **sustainable investments with an environmental objective:** __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective:** __%
- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.7% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through decarbonisation on a relative basis and manage the assets such that the weighted average carbon intensity ("WACI" , defined as Scope 1 and 2 emissions tCo2/$M Revenue) of the Sub-Fund is 20% lower than the WACI of the MSCI World Index ("the Index"), as measured over a rolling three-year period.
The Sub-Fund also seeks to avoid investing in companies that generate more than 1% of their revenue from (i) thermal coal extraction, (ii) arctic drilling, or (iii) oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies that (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.
The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Sub-Funds' WACI, with a view to attaining 20% lower WACI relative to the Index over a rolling three year period since the date of commitment
- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did the sustainability indicators perform?

The Sub-Funds WACI as at the date of reporting, and the WACI of the Benchmark Index is shown below.

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reference period can be found in the table below.

	Arrowstreet Global Equity Fund	**MSCI World Index**
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	67	96

Level of Sustainable Investment
60.70%

…and compared to previous periods?

	Arrowstreet Global Equity Fund	MSCI World Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	48	93

Level of Sustainable Investment
72.60%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	6198.2	tCO2	96
Scope 2 GHG emissions	2873.3	tCO2	96

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

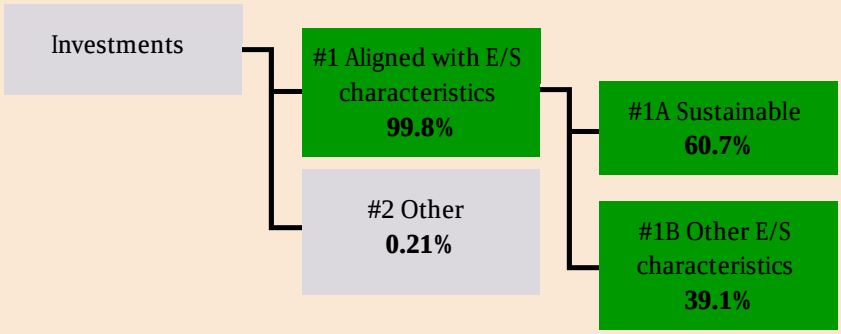
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 60.7% in sustainable investments.

The remaining 0.21% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

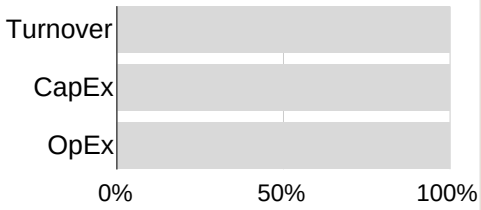
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



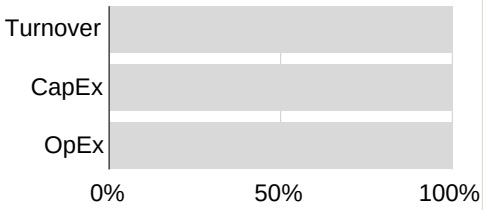
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

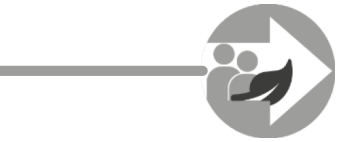
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 60.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 60.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.21% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

549300FV1Y7LYI4LSY97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 78% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental and social characteristics will be achieved through tracking the performance of the Solactive Sustainable Global Developed Equity EU Paris-Aligned Index ("Benchmark Index"). The Benchmark Index methodology incorporates the following environmental and social characteristics which are promoted by the Sub-Fund:

- a reduction in carbon emissions with a view to achieving net zero carbon emissions by 2050;
- The Benchmark Index is designed to enhance exposure to positive environmental, social and governance ("ESG") factors and stay compliant with EU Paris-Aligned benchmark regulatory requirements set out in the EU Climate Benchmarks Regulation and provide low carbon emission exposure with a view to achieving the long-term global warming objectives of the Paris Agreement. The Benchmark Index, based on the methodology and assessment of the index provider, also applies a negative screen to the overall constituents of the Investable Universe, to exclude companies with certain levels of exposure in the following:
- Adult Entertainment
- Alcohol
- Controversial Weapons
- Civilian Firearms
- Fossil Fuels
- Gambling
- Tobacco Companies
- Norm-based (UNGC and OECD Guidelines) - Companies with verified failure to respect established norms as well as severe or very severe controversies.
- Environmental – Significant negative impact on Sustainable Development Goals such as: SDG 12 -

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life below Water, SDG 15 - Life on Land.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 35%.

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Passive Sustainable Global Equity UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the extent to which the Underlying Fund tracked the benchmark
- assessing if the Underlying Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Underlying Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Underlying Fund versus the Benchmark Index over the reference period was 0.06%.

The exposure of the Underlying Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Investment Manager assessed the Benchmark Index of the Underlying Fund versus the Solactive GBS Developed Large & Mid Cap Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Underlying Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
78.00%

…and compared to previous periods?

Level of Sustainable Investment
82.60%

The tracking error of the Underlying Fund versus the Benchmark Index over the previous reference period was 0.26%. The level of sustainable investments in the portfolio as at June 2024 can be found in the table above.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations at the Underlying Fund level, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	1920.0	tCO2	81
Scope 2 GHG emissions	1292.8	tCO2	81
Scope 3 GHG emissions	39223.8	tCO2	81
Total GHG emissions	42435.1	tCO2	81
Carbon footprint	87.4	tCO2 per M invested	81
GHG intensity of investee companies	438.2	tCO2	81
Exposure to companies active in the fossil fuel sector	0.1	Percentage	81
Share of non-renewable energy consumption and production	48.7	Percentage	81
Energy consumption intensity per high impact climate sector	5.4	GwH per million EUR invested	6
Activities negatively affecting biodiversity-sensitive areas	4.2	Percentage	80
Emissions to water	0.0	Tonnes per million EUR invested	81
Hazardous waste and radioactive waste ratio	0.1	Tonnes per million EUR invested	81
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	81
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.3	Percentage	81
Unadjusted gender pay gap	13.8	Percentage	79
Board gender diversity	36.3	Percentage	85
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	Percentage	81
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	39.1	Percentage	81
Lack of a human rights policy	3.0	Percentage	81
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

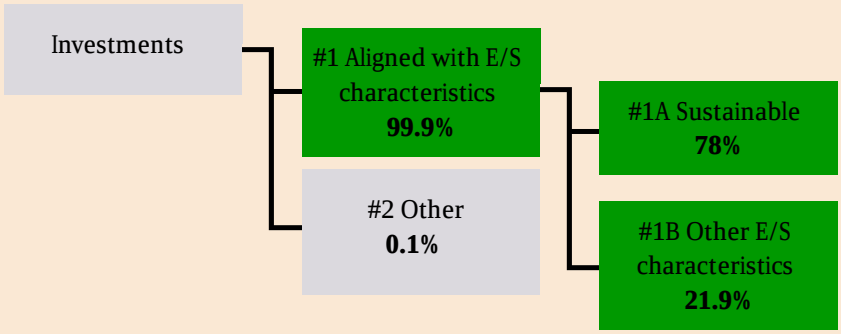
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.9% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 78% in sustainable investments.

The remaining 0.1% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	20.22%
Information Technology	Technology Hardware & Equipmen	10.36%
Health Care	Pharmaceuticals Biotechnology	10.31%
Information Technology	Software & Services	9.26%
Communication Services	Media & Entertainment	7.93%
Financials	Financial Services	7.61%
Real Estate	Equity Real Estate Investment	7.13%
Financials	Banks	3.83%
Consumer Discretionary	Consumer Discretionary Distrib	3.40%
Industrials	Capital Goods	3.15%
Health Care	Health Care Equipment & Servic	2.30%
Consumer Discretionary	Automobiles & Components	2.30%
Real Estate	Real Estate Management & Devel	2.15%
Consumer Discretionary	Consumer Durables & Apparel	1.54%

Financials	Insurance	0.87%
Communication Services	Telecommunication Services	0.86%
Materials	Materials	0.71%
Industrials	Transportation	0.68%
Consumer Staples	Household & Personal Products	0.51%
Consumer Staples	Food Beverage & Tobacco	0.40%
Utilities	Utilities	0.28%
Energy	Energy	0.18%
Consumer Staples	Consumer Staples Distribution	0.13%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

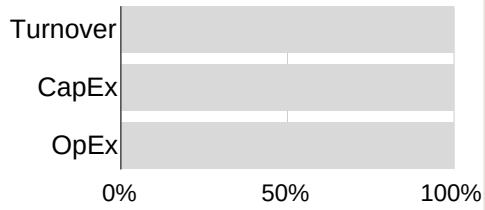
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 78% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 78% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.
The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.1% of assets which fell into the sub-category "#2 Other" represents the indirect exposures w hich were used for efficient portfolio management purposes only. Such assets were cash, FX and fi nancial derivative instruments which are used for liquidity management, and such assets are not su bject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Underlying were met:

Investment Strategy: The Underlying Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?
Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager of the Underlying Fund. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Underlying Fund throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.
Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Underlying Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

How does the reference benchmark differ from a broad market index?

The Benchmark Index of the Underlying Fund is designed to enhance exposure to positive ESG factors and stay compliant with EU Paris-Aligned benchmark regulatory requirements set out in the EU Climate Benchmarks Regulation and provide low carbon emission exposure with a view to achieving the longterm global warming objectives of the Paris Agreement. The Benchmark Index tends to overweight companies with higher ESG ratings and underweight companies with lower ratings and intends to have lower carbon emissions than a broad-based global equity index such as the Solactive GBS Developed Large & Mid Cap Index.
Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at www.solactive.com.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Underlying Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

How did this financial product perform compared with the reference benchmark?

Please see below. The table represents the Underlying Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

How did this financial product perform compared with the broad market index?

Please see below. The table represents the Underlying Fund and Broad Market Index (Solactive GBS Developed Large & Mid Cap Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	18.80%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.8% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund seeks to promote environmental and social characteristics by excluding investment in companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming; or
- (iv) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.
The Sub-Fund commits to making a minimum allocation to sustainable investments of 25%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the screening criteria described above were applied
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did the sustainability indicators perform?

Screening has been applied during the reference period to the Sub-Fund's portfolio in order to identify any companies falling within the additional exclusion criteria listed above.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
65.80%

…and compared to previous periods?

Level of Sustainable Investment
64.30%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	67888.4	tCO2	95
Scope 2 GHG emissions	16071.3	tCO2	95

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

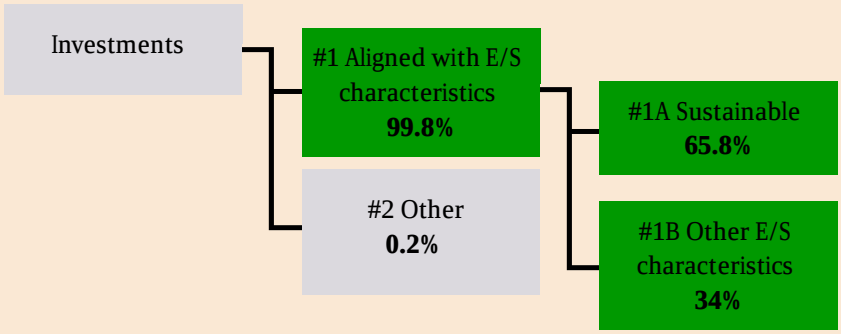
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 65.8% in sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	30.70%
Utilities	Utilities	8.07%
Consumer Staples	Food, Beverage & Tobacco	7.88%
Consumer Discretionary	Automobiles and Components	5.33%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

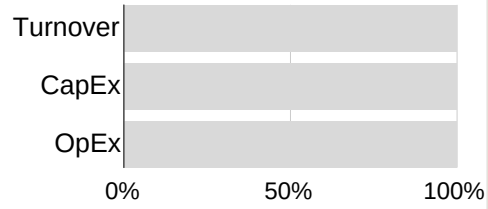
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Industrials	Industrials	0.04%
Industrials	Health Care Equipment & Services	0.03%
Utilities	Industrials	0.02%
Energy	Retailing	0.01%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



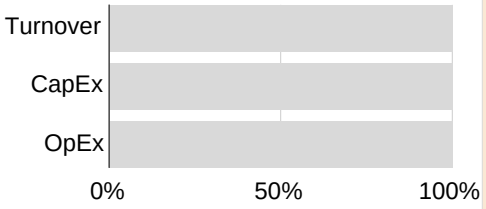
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph representsof the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

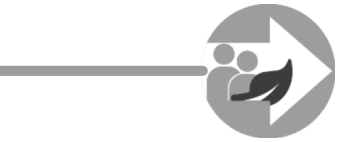
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 65.8% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 65.8% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.
Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.
Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Low Volatility Equity Feeder Fund

Legal entity identifier:
549300QHD1JXVXKDK359

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.2% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining.
The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales. The Sub-Fund has no exposure to companies identified as in violation of UN Global Compact ("UNGC") principles and in respect of which the Investment Manager has determined that there is no/low remediation opportunity of such issues by engagement within an acceptable timeframe.

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Passive Low Volatility Equity UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by
- assessing the extent to which the Underlying Fund tracked the benchmark
- assessing if the Underlying Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Underlying Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Underlying Fund versus the Benchmark Index over the reference period was 0.13%.

The exposure of the Underlying Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Underlying Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Investment Manager assessed the Benchmark Index of the Underlying Fund versus the Morningstar Developed Markets Large-Mid Cap Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Underlying Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found below.

Level of Sustainable Investment
72.2%

…and compared to previous periods?

Level of Sustainable Investment
71.4%

The tracking error of the Underlying Fund versus the Benchmark Index over the previous reference period was 0.24%. The level of sustainable investments in the portfolio as at June 2024 can be found in the table above.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations at the Underlying Fund level, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	2930.1	tCO2	98
Scope 2 GHG emissions	1100.6	tCO2	98

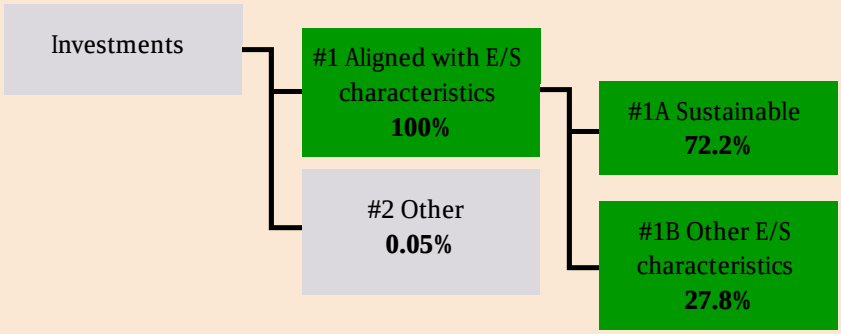
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

100% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 72.2% in sustainable investments.

The remaining 0.05% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund had an allocation of above 100% due to unsettled transactions at quarter end.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
