Consumer Discretionary	Automobiles & Components	0.30%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

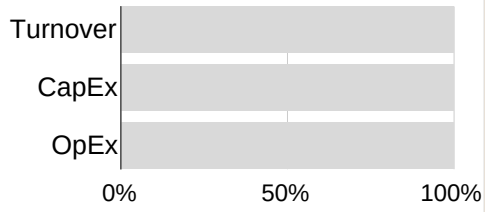
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



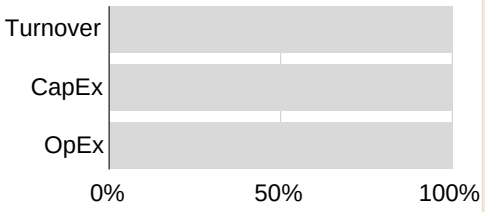
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 72.2% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 72.2% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.05% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Underlying were met:

Investment Strategy: The Underlying Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?
Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager of the Underlying Fund. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Underlying Fund throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.
Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Underlying Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

How does the reference benchmark differ from a broad market index?

The Benchmark Index of the Underlying Fund, based on the methodology and assessment of the index provider, applies a negative screen to the overall constituents of the Morningstar Developed Markets Large-Mid Cap Index or "Parent Index", to exclude those companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons outside the Nuclear Non-Proliferation Treaty (NPT) and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.
- ((iv) generate more than 1% of their revenue from adult entertainment production or generate 50% or more of their revenue from adult entertainment associated services such as distribution or streaming.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at:https://indexes.morningstar.com.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Underlying Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

How did this financial product perform compared with the reference benchmark?

Please see below. The table represents the Underlying Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

How did this financial product perform compared with the broad market index?

Please see below. The table represents the Underlying Fund and Broad Market Index (Morningstar Developed Markets Large-Mid Cap Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	3.10%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Global High Yield Bond Fund

Legal entity identifier:
549300ZK15SB6B10MJ33

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 30.7% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the J.P. Morgan ESG Global High Yield BB-B Rated Liquid Corporate Index, (the "Benchmark Index"). The Benchmark Index applies an ESG scoring and screening methodology to tilt exposure towards issuers ranked higher on ESG criteria and green bonds, which raise finance for climate and environmental projects that are sustainable and socially responsible (as categorised by the Climate Bonds Initiative, a not-for-profit organisation which provides a certification program for bonds that contribute to addressing climate change). In addition, the Benchmark Index will underweight or exclude issuers that rank lower, including issuers with direct revenue from thermal coal, tobacco or weapons and issuers that are not in compliance with the UN Global Compact ("UNGC") principles.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 5%.
The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the Sub-Fund invested in issuers that comply with the index providers requirements
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Fund was invested in line with the Benchmark Index, which it used as its reference benchmark.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.24%.

The Sub-Fund had no exposure to any issuers that did not comply with the index providers methodology. The Investment Manager assessed the Benchmark Index versus the J.P. Morgan Global Developed Market High Yield BB-B Rated Liquid Corporate Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Sub-Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?"

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
30.7%

…and compared to previous periods?

Level of Sustainable Investment
34.2%

The tracking error for the previous reporting period was 0.24%.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	94722.5	tCO2	72
Scope 2 GHG emissions	26769.5	tCO2	72
Scope 3 GHG emissions	1064689.0	tCO2	72
Total GHG emissions	1183035.4	tCO2	72
Carbon footprint	949.4	tCO2 per M invested	72
GHG intensity of investee companies	1436.0	tCO2	73
Exposure to companies active in the fossil fuel sector	10.3	Percentage	74
Share of non-renewable energy consumption and production	77.4	Percentage	72
Energy consumption intensity per high impact climate sector	9.9	GwH per million EUR invested	4
Activities negatively affecting biodiversity-sensitive areas	16.6	Percentage	64
Emissions to water	0.0	Tonnes per million EUR invested	72
Hazardous waste and radioactive waste ratio	1.7	Tonnes per million EUR invested	70
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	81
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	7.4	Percentage	77
Unadjusted gender pay gap	14.6	Percentage	65
Board gender diversity	29.5	Percentage	79
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	81
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	57.1	Percentage	72
Lack of a human rights policy	20.8	Percentage	77
Average income inequality score		Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

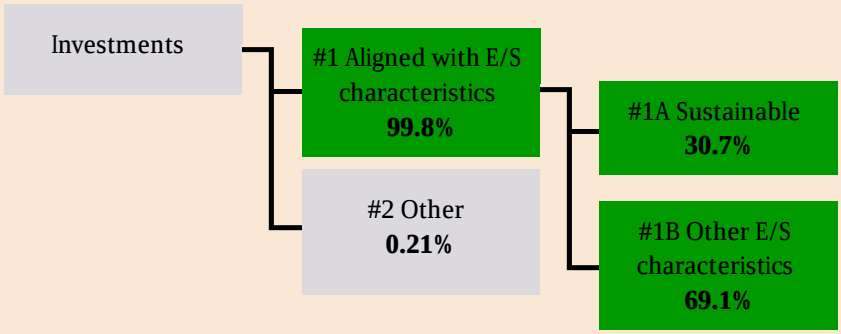
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 30.7% in sustainable investments.

The remaining 0.21% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

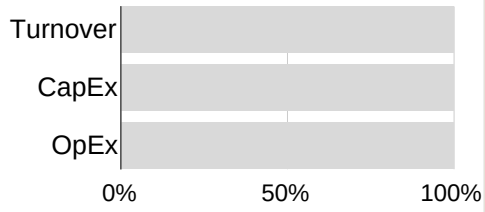
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 30.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 30.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.21% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Investment Strategy: The Sub-Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?
Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.
Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

How does the reference benchmark differ from a broad market index?

The Benchmark Index tracks the performance of corporate fixed and floating-rate debt instruments across Developed Market high yield issuers. The Benchmark Index applies an ESG scoring and screening methodology to tilt exposure towards issuers ranked higher on ESG criteria and green bonds, which raise finance for climate and environmental projects that are sustainable and socially responsible (as categorised by the Climate Bonds Initiative, a not for profit organisation which provides a certification program for bonds that contribute to addressing climate change). In addition the Benchmark Index will underweight or exclude issuers that rank lower, including issuers with direct
revenue from thermal coal, tobacco or weapons and issuers that are not in compliance with the UN Global Compact principles

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Sub-Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

How did this financial product perform compared with the reference benchmark?

Please see below. The table represents the Sub-Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

How did this financial product perform compared with the broad market index?

Please see below. The table represents the Sub-Fund and Broad Market Index (J.P. Morgan Global Developed Market High Yield BB-B Rated Liquid Corporate Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	5.60%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian China A Equity

Legal entity identifier:
5493002CH6YC0TDHCN17

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.2% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund consist of:

- targeting an improved carbon profile for the Sub-Fund by managing the portfolio with the deployment of a net zero decarbonisation glidepath by 2050 such that the Carbon Intensity of the Sub-Fund will be at least 10% lower than the Carbon Intensity of the Benchmark (MSCI China A Onshore Index,) as at the Base Date (31 December 2020); and the maximum allowable Carbon Intensity of the Sub-Fund will reduce, in absolute terms, on a year-on-year basis versus the Base Date, in line with the glidepath.

  "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

- supporting the advancement of UNSDGs by investing at least 1.1 times above Benchmark weights in sustainable investments; and maintaining on an absolute basis at least 20% in sustainable investments

- The Sub-Fund excludes the following environmental exclusions (i) Companies that derive >5% revenue from thermal coal extraction as identified via third party data. (ii) Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive 10%revenue from the extraction and production of oil and gas (as identified via third party data); or 10%revenuefrompowergeneration associated with fossil fuels thermal coal, (liquid fuel and natural gas) as identified via third party data. Additionally, In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded, using a proprietary classification model.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- The Sub-Fund excludes the following social exclusions (i) tobacco producers; (ii) controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems)
- The Sub-Fund excludes the following norms based exclusions: (i) UNGC or OECD violators; (ii) ESG Rating Laggards (The Sub-Fund will also not invest more than the Benchmark (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved in one or more severe controversies as assessed via third party data) (iii) Norges Exclusions

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby measuring that:

- The Sub-Fund maintains its Carbon Intensity target relative to the Index as at the Base Date.
- The Sub-Fund maintains its progress towards its net zero Carbon Intensity target.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.
- The Sub-Fund maintains its minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Please see below the carbon intensity of the Sub-fund as at 30 June 2026 and the Index as at the Base Date.

	Acadian China A Equity	MSCI China A Onshore Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	159.7	275.1
Level of Sustainable Investment	57.20%	52.10%

…and compared to previous periods?

	Acadian China A Equity	MSCI China A Onshore Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	126.1	275.1

Please refer to the tables above for the previous reporting years indicators. The Sub-Fund did not make a commitment to sustainable investments as at June 2025

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments are to make a positive contribution to environmental and/or social objectives through an investee company’s current positive alignment environmental and/or social considerations such as:

Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development

Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns.

The Sub-Investment Manager, using a combination of internal proprietary data and fundamental research, and third-party data, applies a Proprietary Structural Factors Rating to each security in order to identify companies which are exhibiting current positive alignment to environmental and/or social factors.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Investment Manager assesses each PAI Indicator using a combination of direct engagement with the investee company, data taken from company fundamentals and third-party data providers.

Each PAI Indicator is assessed individually to ensure that it is not at an unexpected or unreasonable level relative to its sector and business activities.

Certain PAI Indicators are assessed for absolute exposure where a company will be excluded from consideration as a sustainable investment- PAI 14 (exposure to controversial weapons) and PAI 10 (Violations of UNGC principles or OECD Guidelines).

Other PAI Indicators are assessed individually to ensure that it is not at an unexpected or unreasonable level relative to its sector and business activities i.e. PAI 2 and PAI 6 are assessed to ensure that the carbon footprint profile and the energy consumption of a company is in line with a stated net zero target, PAI 13 is assessed to ensure alignment with board diversity expectations and to confirm that a company has policies in place to address any misalignment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Through the use of third-party data providers, the Sub-Investment Manager ensures companies designated as a sustainable investment comply with the OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and the UN Global Compact. The Sub-Fund excludes companies deemed to be in violation of the UNGC Principles

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	3003	tCO2	72
Scope 2 GHG emissions	2584.6	tCO2	72
Scope 3 GHG emissions	28951.4	tCO2	72
Total GHG emissions	34539	tCO2	72
Carbon footprint	665.1	tCO2 per M invested	72
GHG intensity of investee companies	1150.1	tCO2	75
Exposure to companies active in the fossil fuel sector	2.4	Percentage	79
Share of non-renewable energy consumption and production	95.6	Percentage	72
Energy consumption intensity per high impact climate sector	11.1	GwH per million EUR invested	5
Activities negatively affecting biodiversity-sensitive areas	4	Percentage	70
Emissions to water	0	Tonnes per million EUR invested	63
Hazardous waste and radioactive waste ratio	1.2	Tonnes per million EUR invested	63
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.6	Percentage	74
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	7.6	Percentage	73
Unadjusted gender pay gap	20.2	Percentage	51
Board gender diversity	18.6	Percentage	81
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	73
GHG intensity of investee countries	0	tCO2	0
Investee countries subject to social violations (absolute)	0	Percentage	0
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	75	Percentage	72
Lack of a human rights policy	47.7	Percentage	73
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

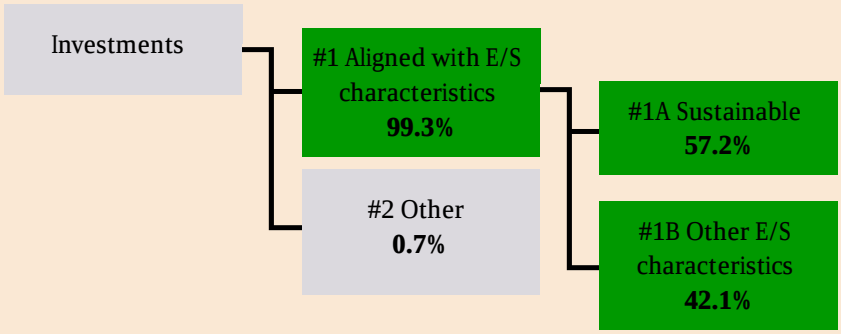
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.3% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 57.2% in sustainable investments.

The remaining 0.7% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.
These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period."))

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Technology Hardware & Equipmen	22.93%
Information Technology	Semiconductors & Semiconductor	16.54%
Industrials	Capital Goods	14.44%
Financials	Banks	13.66%
Materials	Materials	9.69%
Financials	Insurance	4.67%
Consumer Discretionary	Consumer Durables & Apparel	3.29%
Information Technology	Software & Services	2.68%
Health Care	Pharmaceuticals Biotechnology	2.41%
Energy	Energy	1.99%
Real Estate	Real Estate Management & Devel	1.66%
Consumer Staples	Food Beverage & Tobacco	1.18%
Consumer Staples	Household & Personal Products	0.92%
Industrials	Transportation	0.89%
Utilities	Utilities	0.73%
Communication Services	Media & Entertainment	0.71%
Industrials	Commercial & Professional Serv	0.58%
Consumer Discretionary	Automobiles & Components	0.28%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

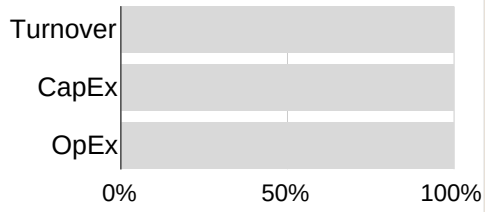
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



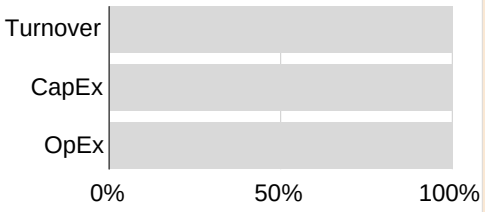
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 57.2% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

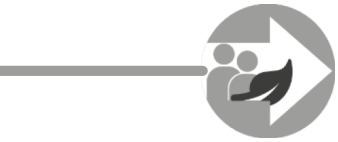
The sustainable investments measure contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:
Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development
Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns

The sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the above. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 57.2% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The sustainable investments measure contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:
Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development
Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns



The sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the above. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.7% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian European Equity

Legal entity identifier:
549300KMZ7HC6O17G403

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.9% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristic of an improved carbon profile aims to be achieved by managing the portfolio such that:
(a) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Benchmark (MSC IEurope Index (EUR)–Net Returns) as at the Base Date (31 December 2020)
(b) the maximum allowable Carbon Intensity of the Sub-Fund will reduce, in absolute terms, on a year-on-year basis versus the Base Date, in line with the glidepath.

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model. The Sub-Investment Manager sources the emissions data from MSCI. Missing carbon emissions and intensity data are imputed by the Sub-Investment Manager via a proprietary process. "Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. Note that emissions are measured in CO_2e (Carbon Dioxide Equivalent). This is a measure that apportions greenhouse gases into a common unit, allowing different bundles of greenhouse gases to be compared. CO_2e maps different greenhouse gas emissions to the equivalent of CO_2 "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

The Sub-Fund applies the following exclusions in order to avoid harm to environmental and social factors:

The following environmental product-based exclusions are applied:

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- Companies that derive >5% revenue from thermal coal extraction as identified via third party data.
- Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive:

(a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or
(b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. The Sub-Investment Manager's classification model uses proprietary techniques and third party data. This model categorizes companies as climate eaders and climate laggards. Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate laggards, and excluded during this second step.

The following social product-based exclusions are applied:

a) Companies with any identifiable revenue derived from tobacco production and/or manufacture are removed from the investment universe.
b) Companies that are deemed to have any involvement in controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as identified via third party data are removed from the investment universe.
Companies perceived as violating any of the UNGC (United Nations Global Compact) principles, as assessed via data from third parties, are removed from the investible universe.
c) The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved in one or more severe controversies as assessed via third party data. d) The Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct-based exclusions. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management www.nbim.no

The Sub-Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:
(a) the weight of sustainable investments in the Sub-Fund will be at least 1.1 times the weight of sustainable investments in the Index; and
(b) the weight of sustainable investments in the Sub-Fund on an absolute basis will be at least 20%.

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby assessing that:
- The Sub-Fund maintains its Carbon Intensity targets relative to the Benchmark, and maintains its progress through annual decarbonisation towards net zero by 2050
- The Sub-Fund has no exposures to companies excluded based on the environmental and social screens described above.
- The Sub-Fund achieves its minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Please see below the carbon intensity of the Sub-fund as at 30 June 2026 and the Benchmark as at the Base Date, and the level of sustainable investments of both the Sub-Fund and the Benchmark as a quarterly average over the reporting period. Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

	Acadian European Equity	MSCI Europe Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	44.1	143.7
Level of Sustainable Investments	44.9%	40.3%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

…and compared to previous periods?

	Acadian European Equity	MSCI Europe Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	45.6	143.7

Please refer to the tables above for the previous reporting years indicators. The Sub-Fund did not make a commitment to Sustainable Investments as at June 2025.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	8387.6	tCO2	97
Scope 2 GHG emissions	1239.3	tCO2	97
Scope 3 GHG emissions	104092.1	tCO2	97
Total GHG emissions	113718.9	tCO2	97
Carbon footprint	533	tCO2 per M invested	97
GHG intensity of investee companies	867.7	tCO2	97
Exposure to companies active in the fossil fuel sector	10.5	Percentage	97
Share of non-renewable energy consumption and production	54	Percentage	86
Energy consumption intensity per high impact climate sector	9.3	GwH per million EUR invested	37
Activities negatively affecting biodiversity-sensitive areas	11.7	Percentage	95
Emissions to water	0	Tonnes per million EUR invested	96
Hazardous waste and radioactive waste ratio	3.1	Tonnes per million EUR invested	96
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	97
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.2	Percentage	97
Unadjusted gender pay gap	14.6	Percentage	93
Board gender diversity	41.8	Percentage	97
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	97
GHG intensity of investee countries	0	tCO2	
Investee countries subject to social violations (absolute)	0	Percentage	
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	30.1	Percentage	97
Lack of a human rights policy	0.3	Percentage	97
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: The top investments of the Sub-Fund as at the reporting period are shown below.

Largest investments	Sector	% Assets	Country
NOVARTIS AG REG COMMON STOCK CHF.49	Health Care	4.35%	SWITZERLAND
ROCHE HOLDING AG COMMON STOCK CHF.001	Health Care	4.34%	SWITZERLAND

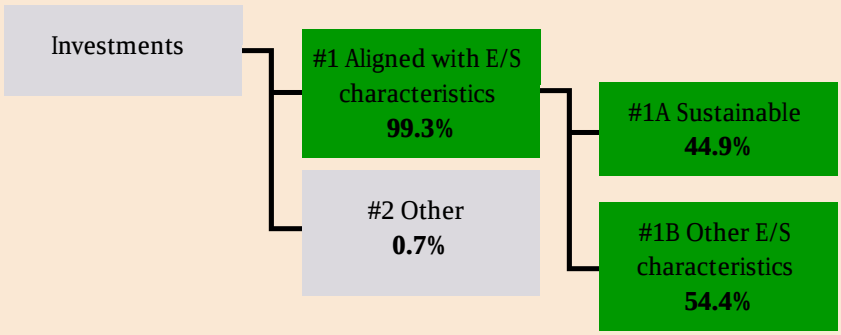
Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.3% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 44.9% in sustainable investments.

The remaining 0.7% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Financials	Banks	18.79%
Industrials	Capital Goods	17.93%
Health Care	Pharmaceuticals Biotechnology	14.11%
Information Technology	Semiconductors & Semiconductor	7.19%
Energy	Energy	5.81%
Consumer Staples	Food Beverage & Tobacco	4.65%
Materials	Materials	4.61%
Information Technology	Technology Hardware & Equipmen	3.55%
Consumer Discretionary	Consumer Durables & Apparel	2.82%
Financials	Insurance	2.74%
Financials	Financial Services	2.17%

Consumer Discretionary	Consumer Discretionary Distrib	0.42%
Consumer Discretionary	Automobiles & Components	0.40%
Consumer Discretionary	Consumer Services	0.33%
Real Estate	Funds	0.02%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

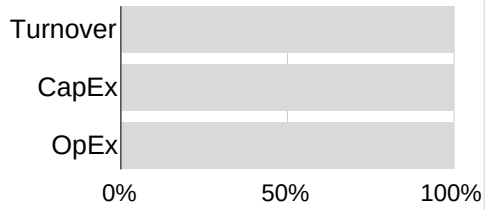
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



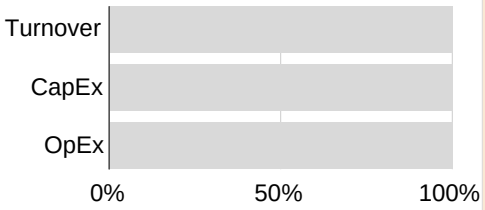
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

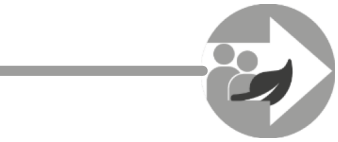
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 44.9% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 44.9% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.7% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian Global Managed Volatility Equity

Legal entity identifier:
549300C6HCOSS6CQHN10

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristic of an improved carbon profile aims to be achieved by managing the portfolio such that:
(a) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Benchmark (MSCI World Index (EUR)–Net Returns) as at the Base Date (31 December 2020)
(b) the maximum allowable Carbon Intensity of the Sub-Fund will reduce, in absolute terms, on a year-on-year basis versus the Base Date, in line with the glidepath.

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model. The Sub-Investment Manager sources the emissions data from MSCI. Missing carbon emissions and intensity data are imputed by the Sub-Investment Manager via a proprietary process. "Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. Note that emissions are measured in CO_2e (Carbon Dioxide Equivalent). This is a measure that apportions greenhouse gases into a common unit, allowing different bundles of greenhouse gases to be compared. CO_2e maps different greenhouse gas emissions to the equivalent of CO_2 "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

The Sub-Fund applies the following exclusions in order to avoid harm to environmental and social factors:

The following environmental product-based exclusions are applied:

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- Companies that derive >5% revenue from thermal coal extraction as identified via third party data.
- Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive:

(a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or
(b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. The Sub-Investment Manager's classification model uses proprietary techniques and third party data. This model categorizes companies as climate eaders and climate laggards. Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate laggards, and excluded during this second step.

The following social product-based exclusions are applied:

a) Companies with any identifiable revenue derived from tobacco production and/or manufacture are removed from the investment universe.
b) Companies that are deemed to have any involvement in controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as identified via third party data are removed from the investment universe.
Companies perceived as violating any of the UNGC (United Nations Global Compact) principles, as assessed via data from third parties, are removed from the investible universe.
c) The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved in one or more severe controversies as assessed via third party data. d) The Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct-based exclusions. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management www.nbim.no

The Sub-Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:
(a) the weight of sustainable investments in the Sub-Fund will be at least 1.1 times the weight of sustainable investments in the Index; and
(b) the weight of sustainable investments in the Sub-Fund on an absolute basis will be at least 20%.

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby assessing that:
- The Sub-Fund maintains its Carbon Intensity targets relative to the Benchmark, and maintains its progress through annual decarbonisation towards net zero by 2050
- The Sub-Fund has no exposures to companies excluded based on the environmental and social screens described above.
- The Sub-Fund achieves its minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

Please see below the carbon intensity of the Sub-fund as at 30 June 2026 and the Benchmark as at the Base Date, and the level of sustainable investments of both the Sub-Fund and the Benchmark as a quarterly average over the reporting period. Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

	Acadian Global Managed Volatility Equity	MSCI World Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	63.1	138.7
Level of Sustainable Investments	56.1%	50.3%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

…and compared to previous periods?

	Acadian Global Managed Volatility Equity	MSCI World Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	73	138.7

Please refer to the tables above for the previous reporting years indicators. The Sub-Fund did not make a commitment to Sustainable Investments as at June 2025.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	16072.6	tCO2	97
Scope 2 GHG emissions	7398.9	tCO2	97
Scope 3 GHG emissions	234825.7	tCO2	97
Total GHG emissions	258297.2	tCO2	97
Carbon footprint	341.8	tCO2 per M invested	97
GHG intensity of investee companies	665.8	tCO2	97
Exposure to companies active in the fossil fuel sector	7.8	Percentage	98
Share of non-renewable energy consumption and production	64.5	Percentage	89
Energy consumption intensity per high impact climate sector	9.9	GwH per million EUR invested	61
Activities negatively affecting biodiversity-sensitive areas	13.5	Percentage	94
Emissions to water	0	Tonnes per million EUR invested	95
Hazardous waste and radioactive waste ratio	0.4	Tonnes per million EUR invested	95
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	97
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1	Percentage	97

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

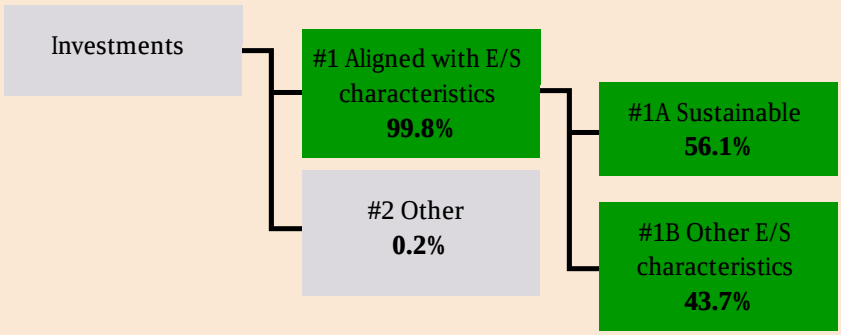
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 56.1% in sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals Biotechnology	10.66%
Information Technology	Technology Hardware & Equipmen	10.65%
Communication Services	Telecommunication Services	9.00%
Health Care	Health Care Equipment & Servic	8.73%
Consumer Staples	Food Beverage & Tobacco	8.49%
Information Technology	Semiconductors & Semiconductor	7.60%
Information Technology	Software & Services	7.56%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

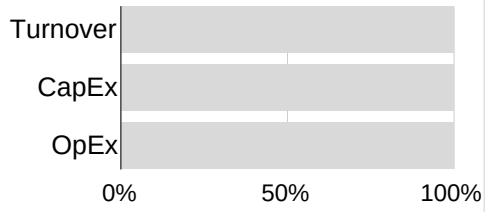
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



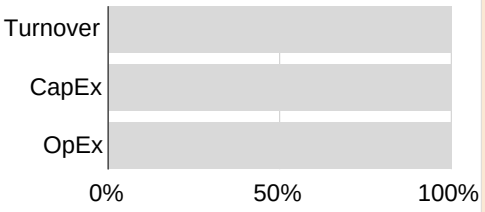
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

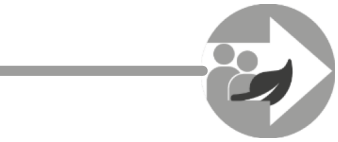
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 56.1% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 56.1% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian European Small Cap Equity

Legal entity identifier:
254900GRFH07YIHNG930

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.5% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristic of an improved carbon profile aims to be achieved by managing the portfolio such that:
(a) the weighted average Carbon Emissions of the Sub-Fund will be no greater than the weighted average Carbon Emissions of the MSCI Europe Small Cap Index (EUR)– Net Returns ("the Index"); and
(b) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Index

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model. The Sub-Investment Manager sources the emissions data from MSCI. Missing carbon emissions and intensity data are imputed by the Sub-Investment Manager via a proprietary process. "Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. Note that emissions are measured in CO_2e (Carbon Dioxide Equivalent). This is a measure that apportions greenhouse gases into a common unit, allowing different bundles of greenhouse gases to be compared. CO_2e maps different greenhouse gas emissions to the equivalent of CO_2 "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

The Sub-Fund applies the following exclusions in order to avoid harm to environmental and social factors:

The following environmental product-based exclusions are applied:

- Companies that derive >5% revenue from thermal coal extraction as identified via third party data.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive:

(a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or
(b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. The Sub-Investment Manager's classification model uses proprietary techniques and third party data. This model categorizes companies as climate eaders and climate laggards. Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate laggards, and excluded during this second step.

The following social product-based exclusions are applied:

a) Companies with any identifiable revenue derived from tobacco production and/or manufacture are removed from the investment universe.
b) Companies that are deemed to have any involvement in controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as identified via third party data are removed from the investment universe.
Companies perceived as violating any of the UNGC (United Nations Global Compact) principles, as assessed via data from third parties, are removed from the investible universe.
c) The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved in one or more severe controversies as assessed via third party data. d) The Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct-based exclusions. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management www.nbim.no

The Sub-Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:
(a) the weight of sustainable investments in the Sub-Fund will be at least 1.1 times the weight of sustainable investments in the Index; and
(b) the weight of sustainable investments in the Sub-Fund on an absolute basis will be at least 20%.

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby assessing that:
- The Sub-Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Sub-Fund has no exposures to companies excluded based on the environmental and social screens described above.
- The Sub-Fund achieves its minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Emissions as at June 2026 and the Weighted Average Carbon Emissions of the Index is set out below.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2026 and the WACI of the Index is set out below. Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

The Sub-Funds sustainable investment levels and that of the index are shown below as a quarterly average over the reporting period.

	Acadian European Small Cap Equity	MSCI Europe Small Cap Equity Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	63.4	84.9
Weighted Average Carbon Emissions in Mn metric tonnes of Co2)	0.46	0.47
Level of Sustainable Investment	34.5%	27.1%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

…and compared to previous periods?

	Acadian European Small Cap Equity	MSCI Europe Small Cap Equity Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	46.9	115.9
Weighted Average Carbon Emissions in Mn metric tonnes of Co2)	0.45	0.49
Level of Sustainable Investment	31.3%	26.5%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	4217.4	tCO2	94
Scope 2 GHG emissions	846	tCO2	94
Scope 3 GHG emissions	44293.4	tCO2	94
Total GHG emissions	49155	tCO2	94
Carbon footprint	772.7	tCO2 per M invested	94
GHG intensity of investee companies	707	tCO2	94
Exposure to companies active in the fossil fuel sector	5	Percentage	95
Share of non-renewable energy consumption and production		Percentage	88
Energy consumption intensity per high impact climate sector	11.8	GwH per million EUR invested	35
Activities negatively affecting biodiversity-sensitive areas	6.7	Percentage	89
Emissions to water	0	Tonnes per million EUR invested	92
Hazardous waste and radioactive waste ratio	48.2	Tonnes per million EUR invested	92
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	95
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1.5	Percentage	94
Unadjusted gender pay gap	15.2	Percentage	80
Board gender diversity	40.4	Percentage	94
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	94
GHG intensity of investee countries	0	tCO2	
Investee countries subject to social violations (absolute)	0	Percentage	
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	38.3	Percentage	94
Lack of a human rights policy	3.8	Percentage	94
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

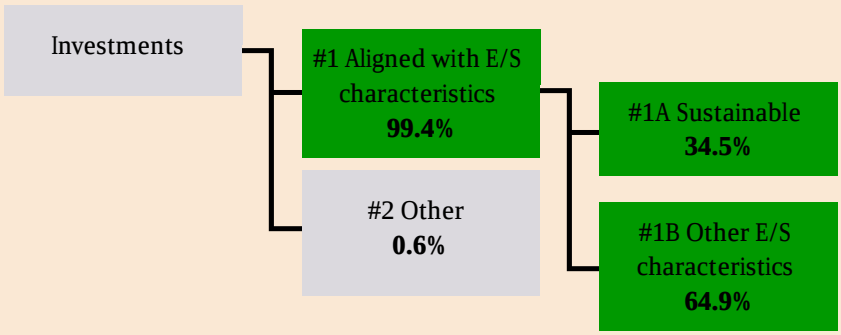
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.4% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 34.5% in sustainable investments.

The remaining 0.6% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

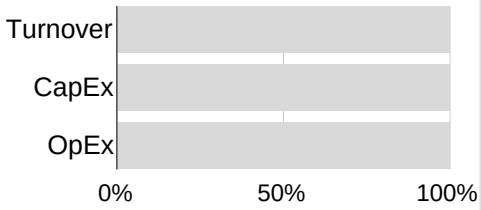
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



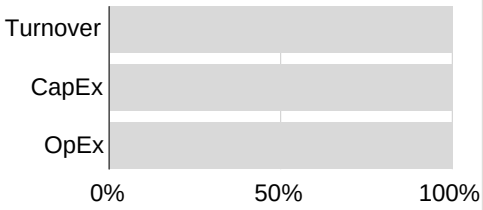
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

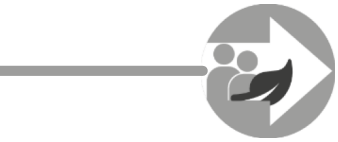
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 34.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 34.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.6% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian Global High Yield Bond Fund

Legal entity identifier:
254900TSCSPKT01BS261

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that
(a) the weighted average Carbon Emissions of the Sub-Fund will be no greater than the weighted average Carbon Emissions of the ICE BofA Developed Markets High Yield Index Hedged (USD) ("the Index"); and
(b) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Index.

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model and are monitored on a daily basis.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Environmental Product-Based Exclusions: The following environmental product-based exclusions are applied:

Thermal Coal Exclusion Companies that derive >5% revenue from thermal coal extraction as identified via third party data .

Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive: (a) >10% revenue from the extraction and production of oil and gas (as identified

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

via third party data); or (b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data; are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. This model categorizes companies as climate leaders and climate transition laggards.

Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. A company is allowed back into the investment universe for the Sub-Fund if it is classified as a climate transition leader These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate transition laggards, and excluded during this second step. The Sub-Investment Manager's classification model uses proprietary techniques and third-party data.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production: (a) of tobacco products as defined by MSCI; or (b) controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as defined by MSCI. The Sub-Fund will also avoid investing in companies perceived to violate the UNGC principles, as assessed by MSCI and Sustainalytics.

The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved one or more severe controversies as assessed by MSCI. Lastly, the Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct based exclusions. For example, in the product-based exclusions, companies that produce cannabis for recreational use are excluded. In relation to the conduct-based exclusions, any companies where this an unacceptable risk of them contributing to or being responsible for fundamental ethical norms. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management (nbim.no).

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby measuring that:

- The Sub-Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Emissions as at June 2026 and the Weighted Average Carbon Emissions of the Index is set out below.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2026 and the WACI of the Index is set out below.
Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

	Acadian Global High Yield Bond Fund	ICE BofA Developed Markets High Yield Index Hedged
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	101.7	134.5
Weighted Average Carbon Emissions in Mn metric tonnes of Co2)	1.05	2.13

…and compared to previous periods?

	Acadian Global High Yield Bond Fund	ICE BofA Developed Markets High Yield Index Hedged
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	149.9	205.1
Weighted Average Carbon Emissions in Mn metric tonnes of Co2)	1.25	2.33

Please refer to the tables above for the previous reporting years indicators.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	2178.7	tCO2	70
Scope 2 GHG emissions	600	tCO2	70
Scope 3 GHG emissions	26686.4	tCO2	70
Total GHG emissions	29464.6	tCO2	70
Carbon footprint	1149.2	tCO2 per M invested	70
GHG intensity of investee companies	1239	tCO2	70
Exposure to companies active in the fossil fuel sector	12.3	Percentage	71
Share of non-renewable energy consumption and production	81.8	Percentage	72
Energy consumption intensity per high impact climate sector	14.3	GwH per million EUR invested	27
Activities negatively affecting biodiversity-sensitive areas	14.1	Percentage	61
Emissions to water	0	Tonnes per million EUR invested	69
Hazardous waste and radioactive waste ratio	19.1	Tonnes per million EUR invested	68
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.7	Percentage	73
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	6.1	Percentage	72
Unadjusted gender pay gap	15.6	Percentage	63
Board gender diversity	28.4	Percentage	70
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	73
GHG intensity of investee countries	0	tCO2	
Investee countries subject to social violations (absolute)	0	Percentage	
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	61.7	Percentage	68
Lack of a human rights policy	23.4	Percentage	72
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

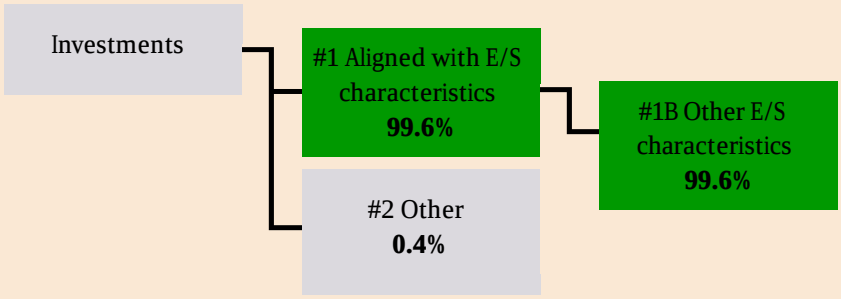
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.6% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund did not make a commitment to sustainable investments.

The remaining 0.4% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Energy	Energy	10.32%
Communication Services	Telecommunication Services	6.59%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Long Term Growth Fund

Legal entity identifier:
254900D6V7EUU3SRUW82

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.7% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from December 2019 levels by 2030, calculated relative to the size of the Sub-Fund. The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ('WACI',defined as Scope 1 and 2 emissions tCo2/) of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint", defined as Scope 1 and 2 emissions tCo2/$ AUM) over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2026. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint
31/12/2019	N/A
30/06/2025	39
30/06/2026	31

Date	WACI

Date	WACI
31/12/2019	274
30/06/2025	97

Level of Sustainable Investment
59.70%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	208635.5	tCO2	38
Scope 2 GHG emissions	57819.3	tCO2	38
Scope 3 GHG emissions	1767778.6	tCO2	38
Total GHG emissions	2033035.4	tCO2	38
Carbon footprint	292.1	tCO2 per M invested	38
GHG intensity of investee companies	796.6	tCO2	38
Exposure to companies active in the fossil fuel sector	5.5	Percentage	38
Share of non-renewable energy consumption and production	58.6	Percentage	38
Energy consumption intensity per high impact climate sector	14.2	GwH per million EUR invested	3
Activities negatively affecting biodiversity-sensitive areas	8.2	Percentage	37
Emissions to water	0.0	Tonnes per million EUR invested	38
Hazardous waste and radioactive waste ratio	1.6	Tonnes per million EUR invested	38
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.3	Percentage	38
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.6	Percentage	38
Unadjusted gender pay gap	14.3	Percentage	36
Board gender diversity	34.0	Percentage	52
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.1	Percentage	38
GHG intensity of investee countries	445.3	tCO2	3
Investee countries subject to social violations (absolute)	3.5	Percentage	9
Investee countries subject to social violations (relative)	5.8	Percentage	9
Investments in companies without carbon emission reduction initiatives	43.9	Percentage	34
Lack of a human rights policy	4.2	Percentage	38
Average income inequality score	38.3	Ratio	3

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

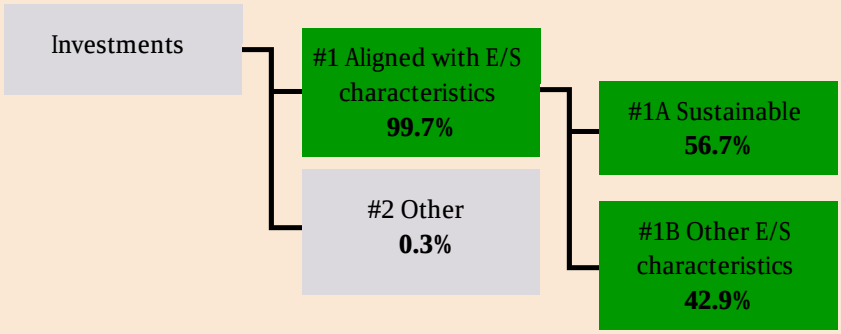
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.7% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 56.7% in sustainable investments.

The remaining 0.3% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

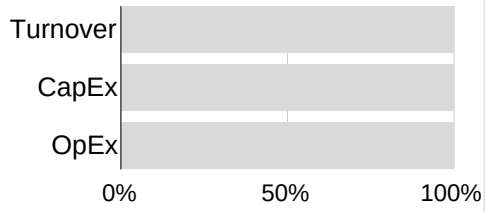
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



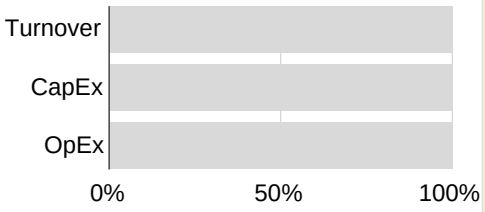
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

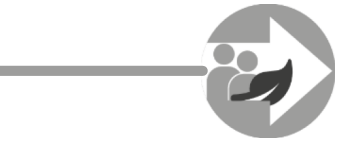
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 56.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 56.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.3% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to appointed sub-investment managers to Mercer funds). The Investment Manager also screened and monitored listed portfolios for high-severity ESG-related risks as flagged according to the UN Global Compact ("UNGC") Principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen were deemed an engagement priority. Stewardship activities were also monitored via an annual Manager Engagement Survey.

Investment Strategy: As part of the selection and continued monitoring of investments, the Investment Manager completed initial and ongoing diligence of underlying fund exposures to excluded securities and assurance around effective implementation of the exclusions by appointed sub-investment managers to the Sub-Fund as binding criteria in the investment process, with the aim of ensuring that investment decisions were made in line with the binding commitment to avoid companies as described in the exclusionary screens above. Carbon emissions and intensity metrics were taken into account by the appointed sub-investment managers with the aim of ensuring that investment decisions were made in line with the binding commitment of lower carbon intensity relative to the Index.

The Investment Manager implemented the strategy through delegating investment management activities to appointed third party sub-investment managers. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the Sub-Investment Managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian Emerging Markets Enhanced Equity

Legal entity identifier:
25490083MNH80LIAUO30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It made **sustainable investments with an environmental objective:** __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective:** __%

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.3% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that

- (a) the weighted average Carbon Emissions of the Sub-Fund will be no greater than the weighted average Carbon Emissions of the MSCI Emerging Markets Index ("the Index"); and
- (b) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Index.

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Environmental Product-Based Exclusions: The following environmental product-based exclusions are applied:

Thermal Coal Exclusion Companies that derive >5% revenue from thermal coal extraction as identified via third party data Fossil Fuel Laggards.

Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive: (a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or (b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data; are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. This model categorizes companies as climate leaders and climate transition laggards.

Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. A company is allowed back into the investment universe for the Sub-Fund if it is classified as a climate transition leader These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate transition laggards, and excluded during this second step. The Sub-Investment Manager's classification model uses proprietary techniques and third-party data.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production: (a) of tobacco products as defined by MSCI; or (b) controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as defined by MSCI. The Sub-Fund will also avoid investing in companies perceived to violate the UNGC principles, as assessed by MSCI and Sustainalytics.

The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved one or more severe controversies as assessed by MSCI. Lastly, the Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct based exclusions. For example, in the product-based exclusions, companies that produce cannabis for recreational use are excluded. In relation to the conduct-based exclusions, any companies where this an unacceptable risk of them contributing to or being responsible for fundamental ethical norms. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management (nbim.no).

The Sub-Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:
(a) the weight of sustainable investments in the Sub-Fund will be at least 1.1 times the weight of sustainable investments in the Index; and
(b) the weight of sustainable investments in the Sub-Fund on an absolute basis will be at least 20%.

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby measuring that:

- The Sub-Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.
- The Sub-Fund maintains its minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Emissions as at June 2026 and the Weighted Average Carbon Emissions of the Index is set out below.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2026 and the WACI of the Index is set out below. The level of sustainable investments for both Sub-Fund and Index are shown below as a quarterly average over the reporting period. Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

	Acadian Emerging Markets Enhanced Equity	MSCI Emerging Markets Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	136.9	254.7
Weighted Average Carbon Emissions in Mn metric tonnes of Co2)	8.25	9.43
Level of Sustainable Investment	64.3%	59.0%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

…and compared to previous periods?

	Acadian Emerging Markets Enhanced Equity	MSCI Emerging Markets Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	132.6	285.4
Weighted Average Carbon Emissions in Mn metric tonnes of Co2)	4.08	8.12
Level of Sustainable Investment	55.7%	53.5%

Please refer to the tables above for the previous reporting years indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	6359.1	tCO2	83
Scope 2 GHG emissions	3130.3	tCO2	83
Scope 3 GHG emissions	44040.3	tCO2	83
Total GHG emissions	53529.7	tCO2	83
Carbon footprint	471.3	tCO2 per M invested	83
GHG intensity of investee companies	869	tCO2	83
Exposure to companies active in the fossil fuel sector	5.1	Percentage	84
Share of non-renewable energy consumption and production	83.5	Percentage	82
Energy consumption intensity per high impact climate sector	10.1	GwH per million EUR invested	29
Activities negatively affecting biodiversity-sensitive areas	4.8	Percentage	82
Emissions to water	0	Tonnes per million EUR invested	83
Hazardous waste and radioactive waste ratio	23.6	Tonnes per million EUR invested	83
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	84
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1.1	Percentage	83
Unadjusted gender pay gap	15.2	Percentage	75
Board gender diversity	21.8	Percentage	84
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	84
GHG intensity of investee countries	0	tCO2	
Investee countries subject to social violations (absolute)	0	Percentage	
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	66.6	Percentage	83
Lack of a human rights policy	7.9	Percentage	83

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

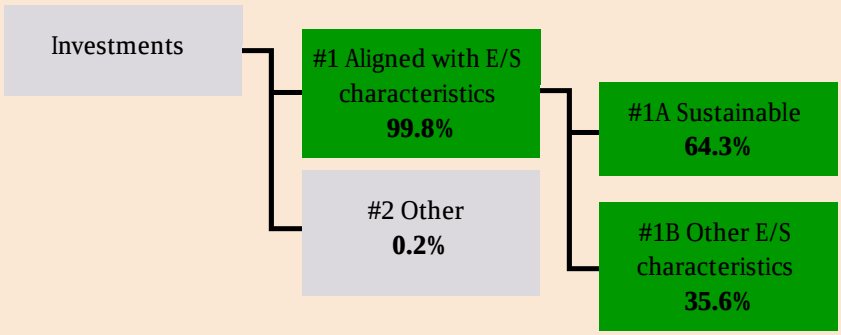
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 64.3% in sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	26.88%
Information Technology	Technology Hardware & Equipmen	17.35%
Financials	Banks	15.32%
Communication Services	Media & Entertainment	5.04%
Industrials	Capital Goods	4.46%
Materials	Materials	4.42%
Financials	Insurance	3.22%
Energy	Energy	3.20%
Communication Services	Telecommunication Services	3.06%
Consumer Discretionary	Consumer Discretionary Distrib	2.97%
Health Care	Pharmaceuticals Biotechnology	2.14%

Real Estate	Real Estate Management & Devel	0.44%
Consumer Discretionary	Consumer Durables & Apparel	0.37%
Consumer Staples	Consumer Staples Distribution	0.04%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

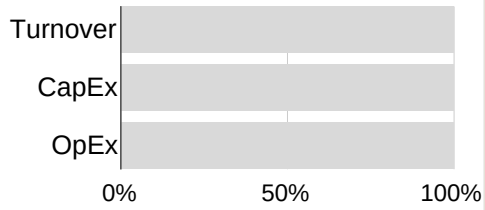
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



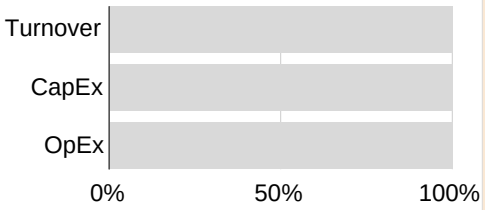
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

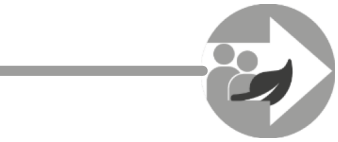
In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 64.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?



The Sub-Fund had 64.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Universal Global Equity Fund

Legal entity identifier:
2549004Y1261YHQTH367

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the MSCI World Universal ex Selected Securities Net Total Return Index (EUR) "Benchmark" using an index tracking approach. In this regard, the Sub-Fund will rebalance its portfolio holdings and associated weights to match, as far as practicable, to the constituents and weights reflected in the Benchmark at each rebalancing date.

The Benchmark is constructed by firstly excluding companies with the weakest ESG profile from the universe of securities within the MSCI World Index, "Parent Index" . Secondly, an ESG re-weighting factor is defined for each security reflecting an assessment by the index provider of both the current ESG rating, as well as the trend in this rating, which is defined as the change in the security's ESG rating over time (together the "Combined ESG Score"). Finally, the free-float market cap weightsof the available universe of securities are re-weighted using this Combined ESG Score. In addition, based on the methodology and assessment of the index provider, the Benchmark applies a negative environmental and social screen to the investable universe represented by the Parent Index to exclude companies that:

- generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining;
- are involved in the manufacture, distribution or sales of controversial weapons;
- manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales;
- have not been assessed or rated by the index provider on the basis of ESG metrics; or
- have faced very severe controversies pertaining to ESG issues (including UN Global Compact violations).

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In tracking the Benchmark, and where the Sub-Investment Manager seeks to make an investment not included in the Benchmark (via optimisation), that investment is not permitted where it is inconsistent with the environmental and social screens referenced above.
The Investment Manager measured the attainment of the environmental and social characteristics by assessing the extent to which the Sub-Fund tracked the benchmark.

Please refer to the section below, 'How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.04%.
The exposure of the Sub-Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Investment Manager assessed the Benchmark Index versus the MSCI World Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Sub-Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?".

…and compared to previous periods?

The tracking error for the previous reporting period was 0.14%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.
Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	44927.1	tCO2	72
Scope 2 GHG emissions	10674.6	tCO2	72

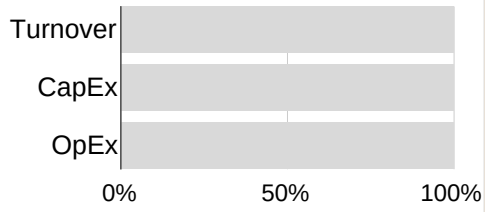
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



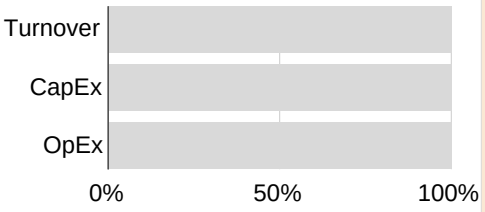
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Investment Strategy: The Sub-Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?
Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.
Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Sub-Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

How does the reference benchmark differ from a broad market index?

The Benchmark differs to the MSCI World Index (the Parent Index) by the environmental and social based features which, in particular:

- tilts away from free-float market cap weights used in the Parent Index, to enhance exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile; and
- based on the methodology and assessment of the index provider, applies a negative environmental and social screen to exclude companies included as constituents of the Parent Index.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at: www.msci.com/index-methodology .

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Sub-Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

How did this financial product perform compared with the reference benchmark?

Please see below. The table represents the Sub-Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

How did this financial product perform compared with the broad market index?

Please see below. The table represents the Sub- Fund and Broad Market Index (MSCI World Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	3.00%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:
Acadian US Enhanced Equity Feeder Fund

Legal entity identifier:
2549008WLGL8WHNVEP86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It made **sustainable investments with an environmental objective:** __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective:** __%

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.8% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Acadian US Enhanced Equity, a Sub-Fund of Mercer UCITS Common Contractual Fund (the "Master Fund").

The Master Fund's environmental characteristic of an improved carbon profile are achieved by managing the portfolio such that:

(a) the weighted average Carbon Emissions of the Master Fund will be no greater than the weighted average Carbon Emissions of the S&P 500 Index ("the Index); and
(b) the Carbon Intensity of the Master Fund will be at least 20% lower than the Carbon Intensity of the Index.
This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model. The Sub-Investment Manager sources the emissions data from MSCI. Missing carbon emissions and intensity data are imputed by the Sub-Investment Manager via a proprietary process.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. Note that emissions are measured in CO2e (Carbon Dioxide Equivalent). This is a measure that apportions greenhouse gases into a common unit, allowing different bundles of greenhouse gases to be compared. CO2e maps different greenhouse gas emissions to the equivalent of CO2 "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Master Fund applies the following exclusions in order to avoid harm to environmental and social factors:

The following environmental product-based exclusions are applied:

- Companies that derive >5% revenue from thermal coal extraction as identified via third party data.
- Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive:

(a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or
(b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data. are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub Investment Manager employs a proprietary classification model. The Sub-Investment Manager's classification model uses proprietary techniques and third party data. This model categorizes companies as climate leaders and climate laggards. Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely, companies not displaying any of the above characteristics are categorized as climate laggards, and excluded during this second step.

The following social product-based exclusions are applied:

a) Companies with any identifiable revenue derived from tobacco production and/or manufacture are removed from the investment universe.
b) Companies that are deemed to have any involvement in controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as identified via third party data are removed from the investment universe.
Companies perceived as violating any of the UNGC (United Nations Global Compact) principles, as assessed via data from third parties, are removed from the investible universe.
c) The Master Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved in one or more severe controversies as assessed via third party data.

d) The Master Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct-based exclusions. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management www.nbim.no

The Master Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:
(a) the weight of sustainable investments in the Master Fund will be at least 1.1 times the weight of sustainable investments in the Index; and
(b) the weight of sustainable investments in the Master Fund on an absolute basis will be at least 20%.

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby assessing that:

- The Master Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Master Fund has no exposures to companies excluded based on the environmental and social screens described above.
- The Master Fund achieves its minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Master Funds Weighted Average Carbon Emissions as at June 2026 and the Weighted Average Carbon Emissions of the Index is set out below.

The Master Funds Weighted Average Carbon Intensity ("WACI") as at June 2026 and the WACI of the Index is set out below. Throughout the reporting period, the Master Fund had no exposure to companies not meeting the exclusionary criteria described above. The Master Funds sustainable investment levels and that of the index are shown below as of the reporting date, there is no quarterly average as the inception of the fund was during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

	Acadian US Enhanced Equity Feeder Fund	S&P 500 Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	55	91.6
Weighted Average Carbon Emissions in Mn metric tonnes of Co2)	4.5	5.36
Level of Sustainable Investment	61.8%	55.3%

…and compared to previous periods?

Not applicable. This is the first reporting period for this Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Master Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Master Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	1131.4	tCO2	99
Scope 2 GHG emissions	399.8	tCO2	99
Scope 3 GHG emissions	16529.5	tCO2	99
Total GHG emissions	18060.6	tCO2	99
Carbon footprint	232.3	tCO2 per M invested	99
GHG intensity of investee companies	599.6	tCO2	99
Exposure to companies active in the fossil fuel sector	7.2	Percentage	99
Share of non-renewable energy consumption and production	51.3	Percentage	87
Energy consumption intensity per high impact climate sector	4.7	GwH per million EUR invested	33
Activities negatively affecting biodiversity-sensitive areas	8.2	Percentage	97
Emissions to water	0	Tonnes per million EUR invested	99
Hazardous waste and radioactive waste ratio	0.1	Tonnes per million EUR invested	99
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	99
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0	Percentage	99
Unadjusted gender pay gap	13.3	Percentage	95
Board gender diversity	35.8	Percentage	99
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	99
GHG intensity of investee countries	0	tCO2	
Investee countries subject to social violations (absolute)	0	Percentage	
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	45.5	Percentage	99
Lack of a human rights policy	2.8	Percentage	99
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: The top investments of the Master Fund as at the reporting period are shown below.

Largest investments	Sector	% Assets	Country
NVIDIA CORP COMMON STOCK USD.001	Information Technology	7.57%	UNITED STATES
APPLE INC COMMON STOCK USD.00001	Information Technology	7.07%	UNITED STATES

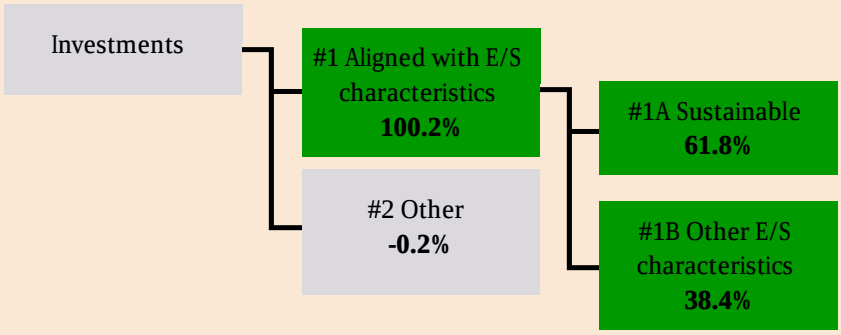
Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

100.2% of the Sub-Fund's assets were invested in the Master Fund in line with the environmental and/or social characteristics promoted by the Master Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Master Fund. The Master Fund invested 61.8% in sustainable investments.

The remaining -0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Master Fund. The negative figure is due to unsettled transactions at quarter end.

These figures and the below table is as at the reporting date. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Master Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	20.09%
Information Technology	Technology Hardware & Equipmen	11.76%
Communication Services	Media & Entertainment	8.96%
Information Technology	Software & Services	8.37%
Financials	Financial Services	6.25%
Health Care	Pharmaceuticals Biotechnology	6.05%
Consumer Discretionary	Consumer Discretionary Distrib	5.30%
Industrials	Capital Goods	4.87%
Financials	Banks	4.38%
Health Care	Health Care Equipment & Servic	3.59%
Energy	Energy	2.78%
Real Estate	Equity Real Estate Investment	2.69%
Materials	Materials	2.05%
Financials	Insurance	1.97%
Consumer Staples	Consumer Staples Distribution	1.70%
Consumer Discretionary	Consumer Services	1.67%
Consumer Staples	Household & Personal Products	1.35%
Industrials	Commercial & Professional Serv	1.29%
Consumer Discretionary	Automobiles & Components	1.05%
Utilities	Utilities	1.00%
Consumer Staples	Food Beverage & Tobacco	0.77%
Financials	Funds	0.56%
Communication Services	Telecommunication Services	0.55%
Consumer Discretionary	Consumer Durables & Apparel	0.37%
Industrials	Transportation	0.34%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

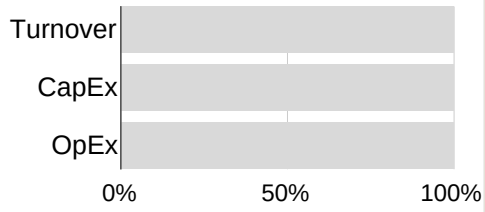
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Master Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



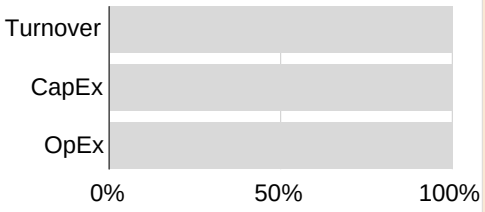
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Master Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

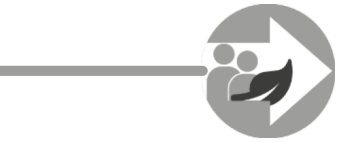
are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Master Fund had 61.8% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Master Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Master Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Master Fund had 61.8% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Master Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Master Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.



What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The -0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards. The negative figure is due to unsettled transactions at quarter end.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Axiom Concentrated Global Growth Equity Fund

Legal entity identifier:
2549007WDFS28NXINT87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.6% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics of the Sub-Fund are to invest in companies that are deemed positive ESG contributors, using the Sub-Investment Managers' proprietary analysis of companies' ESG performance (Proprietary Structural Factors Ratings)and third party ESG ratings of companies' exposure to and management of ESG risks and opportunities.

To be regarded as a positive contributor, companies will be engaged in economic activities considered as advancing environmental and/or social objectives that may include, but are not limited to the following: Environmental: pollution management, energy efficiency, air quality, water management, waste management, renewable generation, participation in green technology development Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns.

To promote compliance with the UN Global Compact (UNGC), the Sub-Fund also excludes companies which are deemed to be UNGC violators by third party data providers.

In addition, the Sub-Fund excludes companies that:

- develop or produce weapons or key components of weapons that violate fundamental humanitarian principles through their normal use. Such weapons include biological weapons, chemical weapons, nuclear weapons, non-detectable fragments, incendiary weapons, blinding laser weapons, antipersonnel mines and cluster munitions;
- produce tobacco or tobacco products;
- produce recreational cannabis;
- have material exposure to production of coal or coal-related products; or

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- are considered to contribute to or are responsible for gross corruption and other serious economic crime, severe environmental damage or serious violations of international law/human rights.

The Investment Manager measured the attainment of the environmental and social characteristics by measuring:

- Percentage of the portfolio (which in aggregate will not be less than 80%) invested in companies deemed positive ESG contributors, based on the following thresholds:
  (i) Companies with an ESG rating from an external data provider of: Environmental or Social Score >=5 (1-10 scale;) and
  (ii) Companies assessed by the Sub-Investment Manager as having a Proprietary Structural Factors Rating (ESG) >=D
- Confirmation that the Sub-Fund did not invest in any companies deemed to be UNGC violators or companies excluded based on the environmental and social screens described above.

How did the sustainability indicators perform?

Please see below as at June 2026:

- Percentage of the portfolio (which in aggregate will not be less than 80%) invested in companies deemed positive ESG contributors: 93.2%
- During the reporting period, the Sub-Fund did not invest in any companies deemed to be UNGC violators or companies excluded based on the environmental and social screens described above.

…and compared to previous periods?

Not applicable. This is the first reporting period for this Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments are to make a positive contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:

Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development

Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns.

The Sub-Investment Manager, using a combination of internal proprietary data and fundamental research, and third-party data, applies a Proprietary Structural Factors Rating to each security in order to identify companies which are exhibiting current positive alignment to environmental and/or social factors.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Investment Manager assesses each PAI Indicator using a combination of direct engagement with the investee company, data taken from company fundamentals and third-party data providers.

Each PAI Indicator is assessed individually to ensure that it is not at an unexpected or unreasonable level relative to its sector and business activities.

Certain PAI Indicators are assessed for absolute exposure where a company will be excluded from consideration as a sustainable investment- PAI 14 (exposure to controversial weapons) and PAI 10 (Violations of UNGC principles or OECD Guidelines).

Other PAI Indicators are assessed individually to ensure that it is not at an unexpected or unreasonable level relative to its sector and business activities i.e. PAI 2 and PAI 6 are assessed to ensure that the carbon footprint profile and the energy consumption of a company is in line with a stated net zero target, PAI 13 is assessed to ensure alignment with board diversity expectations and to confirm that a company has policies in place to address any misalignment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Through the use of third-party data providers, the Sub-Investment Manager ensures companies designated as a sustainable investment comply with the OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and the UN Global Compact. The Sub-Fund excludes companies deemed to be in violation of the UNGC Principles

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund does not consider PAIs

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	1432.8	tCO2	98
Scope 2 GHG emissions	3574.7	tCO2	98

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

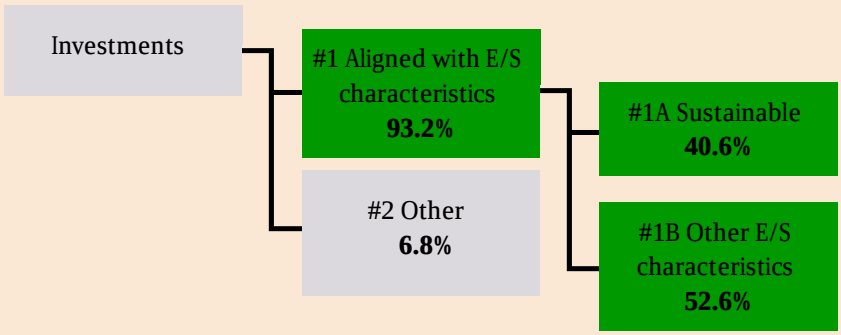
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

93.2% of the Sub-Fund's assets were in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 40.6% in sustainable investments.

The remaining 6.8% of the Sub-Fund's assets are in other investments ('#2 Other'), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table is as at the reporting date. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	43.89%
Industrials	Capital Goods	25.07%
Communication Services	Media & Entertainment	7.58%
Financials	Banks	6.53%
Financials	Financial Services	3.85%
Consumer Discretionary	Consumer Discretionary Distrib	3.79%
Information Technology	Technology Hardware & Equipmen	3.78%
Real Estate	Real Estate Management & Devel	2.16%
Materials	Materials	1.42%
Health Care	Pharmaceuticals Biotechnology	1.37%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

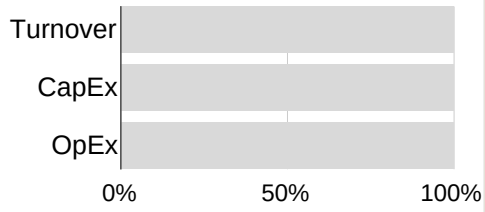
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?

Yes:



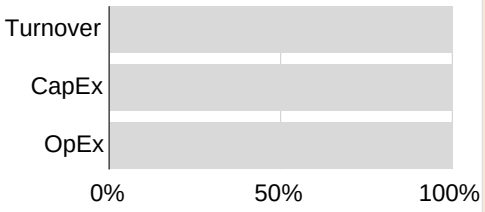
In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 40.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The sustainable investments measure contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:
Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development
Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns

The sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the above. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 40.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The sustainable investments measure contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:
Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development
Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns

The sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the above. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 6.8% of assets which fell into the sub-category "#2 Other" represents the companies which are not aligned with the environmental and social characteristics of the Sub-Fund. These investments are made for the purpose of achieving the Sub-Fund's investment objective and are subject to minimum safeguards via the Sub-Fund's exclusion of UNGC violators, and the exclusion of companies based on the other environmental and social screens outlined.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager and the Sub-Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Sub-Investment Manager has an active engagement program that seeks to actively engage with select portfolio companies, in particular those not currently deemed positive ESG contributors, in order to advance positive change in the ESG profile of such companies and enhancing management awareness and practices in relation to managing sustainability risks and opportunities relevant to those companies.

Investment: The Sub-Investment Manager fundamentally evaluated the environmental and social activities of companies through its stock selection-based investment philosophy and process and allocated a minimum proportion of the portfolio towards what it deemed to be positive ESG contributors.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Axiom Emerging Markets Equity Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.4% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics of the Sub-Fund are to invest in companies that are deemed positive ESG contributors, using the Sub-Investment Managers' proprietary analysis of companies' ESG performance (Proprietary Structural Factors Ratings)and third party ESG ratings of companies' exposure to and management of ESG risks and opportunities.

To be regarded as a positive contributor, companies will be engaged in economic activities considered as advancing environmental and/or social objectives that may include, but are not limited to the following: Environmental: pollution management, energy efficiency, air quality, water management, waste management, renewable generation, participation in green technology development Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns.

To promote compliance with the UN Global Compact (UNGC), the Sub-Fund also excludes companies which are deemed to be UNGC violators by third party data providers.

In addition, the Sub-Fund excludes companies that:

- develop or produce weapons or key components of weapons that violate fundamental humanitarian principles through their normal use. Such weapons include biological weapons, chemical weapons, nuclear weapons, non-detectable fragments, incendiary weapons, blinding laser weapons, antipersonnel mines and cluster munitions;
- produce tobacco or tobacco products;
- produce recreational cannabis;
- have material exposure to production of coal or coal-related products; or

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- are considered to contribute to or are responsible for gross corruption and other serious economic crime, severe environmental damage or serious violations of international law/human rights.

The Investment Manager measured the attainment of the environmental and social characteristics by measuring:

- Percentage of the portfolio (which in aggregate will not be less than 70%) invested in companies deemed positive ESG contributors, based on the following thresholds:
  (i) Companies with an ESG rating from an external data provider of: Environmental or Social Score >=5 (1-10 scale;) and
  (ii) Companies assessed by the Sub-Investment Manager as having a Proprietary Structural Factors Rating (ESG) >=D
- Confirmation that the Sub-Fund did not invest in any companies deemed to be UNGC violators or companies excluded based on the environmental and social screens described above.

How did the sustainability indicators perform?

Please see below as at June 2026:

- Percentage of the portfolio (which in aggregate will not be less than 70%) invested in companies deemed positive ESG contributors: 74.3%
- During the reporting period, the Sub-Fund did not invest in any companies deemed to be UNGC violators or companies excluded based on the environmental and social screens described above.

…and compared to previous periods?

Not applicable. This is the first reporting period for this Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments are to make a positive contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:

Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development

Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns.

The Sub-Investment Manager, using a combination of internal proprietary data and fundamental research, and third-party data, applies a Proprietary Structural Factors Rating to each security in order to identify companies which are exhibiting current positive alignment to environmental and/or social factors.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Investment Manager assesses each PAI Indicator using a combination of direct engagement with the investee company, data taken from company fundamentals and third-party data providers.

Each PAI Indicator is assessed individually to ensure that it is not at an unexpected or unreasonable level relative to its sector and business activities.

Certain PAI Indicators are assessed for absolute exposure where a company will be excluded from consideration as a sustainable investment- PAI 14 (exposure to controversial weapons) and PAI 10 (Violations of UNGC principles or OECD Guidelines).

Other PAI Indicators are assessed individually to ensure that it is not at an unexpected or unreasonable level relative to its sector and business activities i.e. PAI 2 and PAI 6 are assessed to ensure that the carbon footprint profile and the energy consumption of a company is in line with a stated net zero target, PAI 13 is assessed to ensure alignment with board diversity expectations and to confirm that a company has policies in place to address any misalignment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Through the use of third-party data providers, the Sub-Investment Manager ensures companies designated as a sustainable investment comply with the OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and the UN Global Compact. The Sub-Fund excludes companies deemed to be in violation of the UNGC Principles

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund does not consider PAIs

Indicator	Metric	Measure	Data Coverage %

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

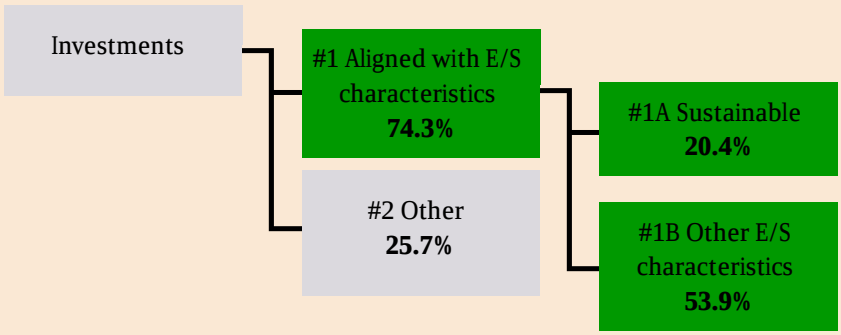
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

74.3% of the Sub-Fund's assets were in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 20.4% in sustainable investments.

The remaining 25.7% of the Sub-Fund's assets are in other investments ('#2 Other'), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table is as at the reporting date. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	28.39%
Information Technology	Technology Hardware & Equipmen	21.05%
Industrials	Capital Goods	17.08%
Financials	Banks	8.87%
Financials	Funds	3.66%
Financials	Financial Services	2.89%
Consumer Discretionary	Automobiles & Components	2.79%
Health Care	Pharmaceuticals Biotechnology	2.44%
Communication Services	Telecommunication Services	2.43%
Materials	Materials	2.10%
Communication Services	Media & Entertainment	1.86%
Financials	Insurance	1.13%
Consumer Staples	Household & Personal Products	0.90%
Industrials	Transportation	0.78%
Real Estate	Real Estate Management & Devel	0.68%
Consumer Discretionary	Consumer Discretionary Distrib	0.60%
Utilities	Utilities	0.60%
Consumer Staples	Food Beverage & Tobacco	0.54%
Energy	Energy	0.19%
Consumer Discretionary	Consumer Durables & Apparel	0.11%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

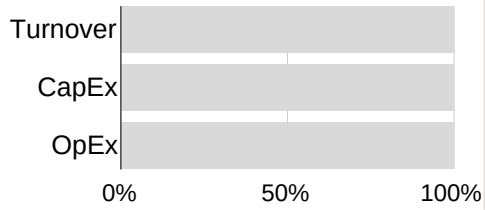
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?

Yes:



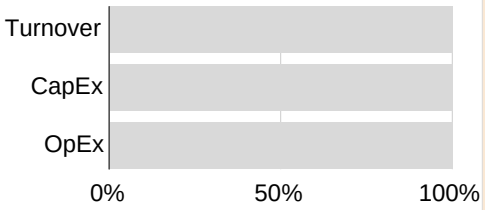
In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 20.4% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The sustainable investments measure contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:
Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development
Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns

The sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the above. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 20.4% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The sustainable investments measure contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:
Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development
Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns

The sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the above. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 25.7% of assets which fell into the sub-category "#2 Other" represents the companies which are not aligned with the environmental and social characteristics of the Sub-Fund. These investments are made for the purpose of achieving the Sub-Fund's investment objective and are subject to minimum safeguards via the Sub-Fund's exclusion of UNGC violators, and the exclusion of companies based on the other environmental and social screens outlined.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager and the Sub-Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Sub-Investment Manager has an active engagement program that seeks to actively engage with select portfolio companies, in particular those not currently deemed positive ESG contributors, in order to advance positive change in the ESG profile of such companies and enhancing management awareness and practices in relation to managing sustainability risks and opportunities relevant to those companies.

Investment: The Sub-Investment Manager fundamentally evaluated the environmental and social activities of companies through its stock selection-based investment philosophy and process and allocated a minimum proportion of the portfolio towards what it deemed to be positive ESG contributors.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Axiom Global Small Cap Equity Fund

Legal entity identifier:
254900BB9MXIGZSB8A67

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.9% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics of the Sub-Fund are to invest in companies that are deemed positive ESG contributors, using the Sub-Investment Managers' proprietary analysis of companies' ESG performance (Proprietary Structural Factors Ratings)and third party ESG ratings of companies' exposure to and management of ESG risks and opportunities.

To be regarded as a positive contributor, companies will be engaged in economic activities considered as advancing environmental and/or social objectives that may include, but are not limited to the following: Environmental: pollution management, energy efficiency, air quality, water management, waste management, renewable generation, participation in green technology development Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns.

To promote compliance with the UN Global Compact (UNGC), the Sub-Fund also excludes companies which are deemed to be UNGC violators by third party data providers.

In addition, the Sub-Fund excludes companies that:

- develop or produce weapons or key components of weapons that violate fundamental humanitarian principles through their normal use. Such weapons include biological weapons, chemical weapons, nuclear weapons, non-detectable fragments, incendiary weapons, blinding laser weapons, antipersonnel mines and cluster munitions;
- produce tobacco or tobacco products;
- produce recreational cannabis;
- have material exposure to production of coal or coal-related products; or

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- are considered to contribute to or are responsible for gross corruption and other serious economic crime, severe environmental damage or serious violations of international law/human rights.

The Investment Manager measured the attainment of the environmental and social characteristics by measuring:

- Percentage of the portfolio (which in aggregate will not be less than 60%) invested in companies deemed positive ESG contributors, based on the following thresholds:
  (i) Companies with an ESG rating from an external data provider of: Environmental or Social Score >=5 (1-10 scale;) and
  (ii) Companies assessed by the Sub-Investment Manager as having a Proprietary Structural Factors Rating (ESG) >=D
- Confirmation that the Sub-Fund did not invest in any companies deemed to be UNGC violators or companies excluded based on the environmental and social screens described above.

How did the sustainability indicators perform?

Please see below as at June 2026:

- Percentage of the portfolio (which in aggregate will not be less than 60%) invested in companies deemed positive ESG contributors: 61.4%
- During the reporting period, the Sub-Fund did not invest in any companies deemed to be UNGC violators or companies excluded based on the environmental and social screens described above.

…and compared to previous periods?

Not applicable. This is the first reporting period for this Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments are to make a positive contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:

Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development

Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns.

The Sub-Investment Manager, using a combination of internal proprietary data and fundamental research, and third-party data, applies a Proprietary Structural Factors Rating to each security in order to identify companies which are exhibiting current positive alignment to environmental and/or social factors.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Investment Manager assesses each PAI Indicator using a combination of direct engagement with the investee company, data taken from company fundamentals and third-party data providers.

Each PAI Indicator is assessed individually to ensure that it is not at an unexpected or unreasonable level relative to its sector and business activities.

Certain PAI Indicators are assessed for absolute exposure where a company will be excluded from consideration as a sustainable investment- PAI 14 (exposure to controversial weapons) and PAI 10 (Violations of UNGC principles or OECD Guidelines).

Other PAI Indicators are assessed individually to ensure that it is not at an unexpected or unreasonable level relative to its sector and business activities i.e. PAI 2 and PAI 6 are assessed to ensure that the carbon footprint profile and the energy consumption of a company is in line with a stated net zero target, PAI 13 is assessed to ensure alignment with board diversity expectations and to confirm that a company has policies in place to address any misalignment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Through the use of third-party data providers, the Sub-Investment Manager ensures companies designated as a sustainable investment comply with the OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and the UN Global Compact. The Sub-Fund excludes companies deemed to be in violation of the UNGC Principles

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund does not consider PAIs

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	448.6	tCO2	92

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 20.9% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The sustainable investments measure contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:
Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development
Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns

The sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the above. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 20.9% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective.

The sustainable investments measure contribution to environmental and/or social objectives through an investee company's current positive alignment environmental and/or social considerations such as:
Environmental: pollution management, energy efficiency air quality, water management, waste management, renewable generation, participation in green technology development
Social: human capital initiatives, accessibility/customer welfare, data security/privacy, transparent disclosure, positive marketing practices and regulatory/license concerns

The sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the above. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 38.6% of assets which fell into the sub-category "#2 Other" represents the companies which are not aligned with the environmental and social characteristics of the Sub-Fund. These investments are made for the purpose of achieving the Sub-Fund's investment objective and are subject to minimum safeguards via the Sub-Fund's exclusion of UNGC violators, and the exclusion of companies based on the other environmental and social screens outlined.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager and the Sub-Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Sub-Investment Manager has an active engagement program that seeks to actively engage with select portfolio companies, in particular those not currently deemed positive ESG contributors, in order to advance positive change in the ESG profile of such companies and enhancing management awareness and practices in relation to managing sustainability risks and opportunities relevant to those companies.

Investment: The Sub-Investment Manager fundamentally evaluated the environmental and social activities of companies through its stock selection-based investment philosophy and process and allocated a minimum proportion of the portfolio towards what it deemed to be positive ESG contributors.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

☐ Yes	☒ No

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Acadian Global Enhanced Equity, a Sub-Fund of Mercer UCITS Common Contractual Fund (the "Master Fund").

The Master Funds environmental characteristic of an improved carbon profile are achieved by managing the portfolio such that:

(a) the weighted average Carbon Emissions of the Master Fund will be no greater than the weighted average Carbon Emissions of the MSCI All Country World Index ("the Index); and
(b) the Carbon Intensity of the Master Fund will be at least 20% lower than the Carbon Intensity of the Index. This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model. The Sub-Investment Manager sources the emissions data from MSCI. Missing carbon emissions and intensity data are imputed by the Sub-Investment Manager via a proprietary process.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. Note that emissions are measured in CO2e (Carbon Dioxide Equivalent). This is a measure that apportions greenhouse gases into a common unit, allowing different bundles of greenhouse gases to be compared. CO2e maps different greenhouse gas emissions to the equivalent of CO2 "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

The Master Fund applies the following exclusions in order to avoid harm to environmental and social factors:

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The following environmental product-based exclusions are applied:

- Companies that derive >5% revenue from thermal coal extraction as identified via third party data.
- Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive:

(a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or
(b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data. are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub Investment Manager employs a proprietary classification model. The Sub-Investment Manager's classification model uses proprietary techniques and third party data. This model categorizes companies as climate leaders and climate laggards. Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely, companies not displaying any of the above characteristics are categorized as climate laggards, and excluded during this second step.

The following social product-based exclusions are applied:

a) Companies with any identifiable revenue derived from tobacco production and/or manufacture are removed from the investment universe.
b) Companies that are deemed to have any involvement in controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as identified via third party data are removed from the investment universe.
Companies perceived as violating any of the UNGC (United Nations Global Compact) principles, as assessed via data from third parties, are removed from the investible universe.
c) The Master Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved in one or more severe controversies as assessed via third party data.

d) The Master Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct-based exclusions. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management www.nbim.no

The Master Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:
(a) the weight of sustainable investments in the Master Fund will be at least 1.1 times the weight of sustainable investments in Index; and
(b) the weight of sustainable investments in the Master Fund on an absolute basis will be at least 20%.

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby assessing that:

- The Master Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Master Fund has no exposures to companies excluded based on the environmental and social screens described above.
- The Master Fund achieves its minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Master Funds Weighted Average Carbon Emissions as at June 2026 and the Weighted Average Carbon Emissions of the Index is set out below.

The Master Funds Weighted Average Carbon Intensity ("WACI") as at June 2026 and the WACI of the Index is set out below. Throughout the reporting period, the Master Fund had no exposure to companies not meeting the exclusionary criteria described above. The Master Funds sustainable investment levels and that of the index are shown below as of the reporting date, there is no quarterly average as the inception of the fund was during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

	Acadian Global Enhanced Equity Fund	MSCI All Country World Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	66.7	115.3
Weighted Average Carbon Emissions in Mn metric tonnes of Co2)	4.38	5.24
Level of Sustainable Investment	57.1%	51.3%

…and compared to previous periods?

Not applicable. This is the first reporting period for this Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Master Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Master Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	6936.9	tCO2	98
Scope 2 GHG emissions	2568.5	tCO2	98
Scope 3 GHG emissions	79945	tCO2	98
Total GHG emissions	89450.4	tCO2	98
Carbon footprint	431.4	tCO2 per M invested	98
GHG intensity of investee companies	748.1	tCO2	98
Exposure to companies active in the fossil fuel sector	7.5	Percentage	98
Share of non-renewable energy consumption and production	59.6	Percentage	85
Energy consumption intensity per high impact climate sector	8.3	GwH per million EUR invested	24
Activities negatively affecting biodiversity-sensitive areas	10	Percentage	97
Emissions to water	0	Tonnes per million EUR invested	98
Hazardous waste and radioactive waste ratio	4.7	Tonnes per million EUR invested	98
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	98
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.2	Percentage	98
Unadjusted gender pay gap	14.1	Percentage	94
Board gender diversity	34.2	Percentage	98
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	98
GHG intensity of investee countries	0	tCO2	
Investee countries subject to social violations (absolute)	0	Percentage	
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	44.6	Percentage	98
Lack of a human rights policy	4.1	Percentage	98
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: The top investments of the Master Fund as at the reporting period are shown below.

Largest investments	Sector	% Assets	Country
APPLE INC COMMON STOCK USD.00001	Information Technology	4.64%	UNITED STATES
NVIDIA CORP COMMON STOCK USD.001	Information Technology	4.52%	UNITED STATES

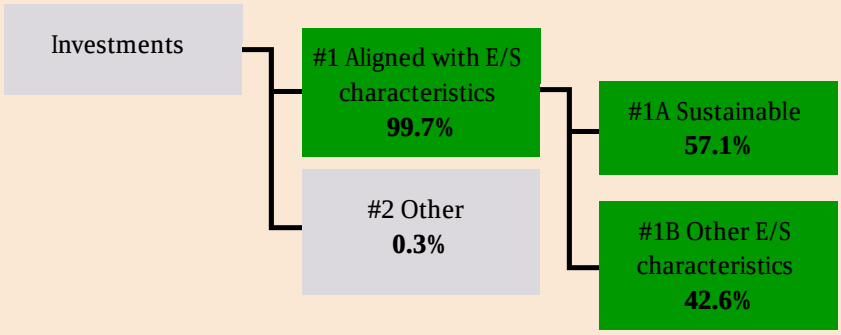
Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.7% of the Sub-Fund's assets were invested in the Master Fund in line with the environmental and/or social characteristics promoted by the Master Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Master Fund. The Sub-Fund invested 57.1% in sustainable investments.

The remaining 0.3% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Master Fund.

These figures and the below table is as at the reporting date. The Master Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Master Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	18.20%
Information Technology	Technology Hardware & Equipmen	10.17%
Financials	Banks	9.08%
Health Care	Pharmaceuticals Biotechnology	7.05%
Industrials	Capital Goods	6.73%
Communication Services	Media & Entertainment	6.66%
Information Technology	Software & Services	6.04%
Financials	Financial Services	4.42%
Consumer Discretionary	Consumer Discretionary Distrib	4.30%
Energy	Energy	3.55%
Financials	Insurance	3.31%
Health Care	Health Care Equipment & Servic	3.28%
Materials	Materials	3.23%
Real Estate	Equity Real Estate Investment	2.17%
Consumer Discretionary	Consumer Services	1.92%
Communication Services	Telecommunication Services	1.58%
Consumer Staples	Consumer Staples Distribution	1.46%
Consumer Staples	Food Beverage & Tobacco	1.41%
Consumer Discretionary	Automobiles & Components	1.25%
Industrials	Commercial & Professional Serv	1.02%
Consumer Staples	Household & Personal Products	0.89%
Industrials	Transportation	0.87%
Utilities	Utilities	0.49%
Consumer Discretionary	Consumer Durables & Apparel	0.46%
Real Estate	Real Estate Management & Devel	0.19%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

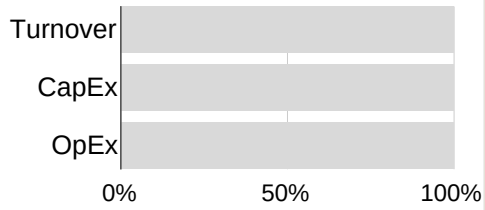
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Master Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



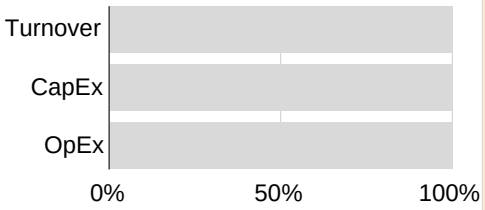
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Master Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

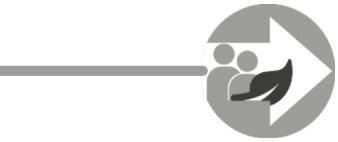
are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Master Fund had 57.1% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Master Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Master Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Master Fund had 57.1% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Master Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Master Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.



What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.3% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Climate Transition Listed Infrastructure Feeder Fund

Legal entity identifier:
549300A71EKRP6G30E78

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.6% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's social characteristics are to avoid investing in companies which engage in the production of controversial weapons which are defined by the Benchmark provider as anti-personnel mines, cluster munitions, and chemical and biological weapons; or engage in the production of tobacco and/or tobacco products.
The Sub-Fund's environmental characteristics are to avoid investing in companies that generate 50% or more of their total revenue from the extraction of thermal coal.

Additionally, the Sub-fund excludes companies which are considered by the Benchmark provider to be in violation of one or more of the UNGC principles (including companies breaching the OECD Guidelines for Multinational Enterprises).

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Passive Climate Transition Listed Infrastructure UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

The Benchmark also weights constituents in favour of companies preparing for the transition to a low carbon economy. Constituent weights are determined with consideration given to four climate factors, namely companies fossil fuel reserves, operational carbon emission intensity, climate governance activities and forward-looking commitments to carbon emission pathways.

The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.
The Investment Manager measured the attainment of the environmental and social characteristics by:

- assessing the extent to which the Sub-Fund tracked the benchmark
- assessing if the Sub-Fund met the minimum commitment to sustainable investments

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Underlying Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Underlying Fund versus the Benchmark Index over the reference period was 0.11%.

The exposure of the Underlying Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Investment Manager assessed the Benchmark Index of the Underlying Fund versus the Solactive GBS Developed Large & Mid Cap Index (the “Parent Index”) to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Underlying Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

Level of Sustainable Investment
42.60%

…and compared to previous periods?

Not Applicable. This is the first reporting period for the Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	3886.8	tCO2	98
Scope 2 GHG emissions	458.2	tCO2	98
Scope 3 GHG emissions	6750.9	tCO2	98

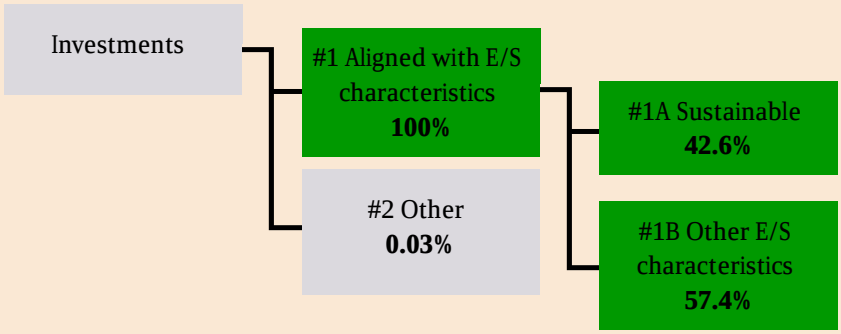
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

100% of the Sub-Fund's assets were invested in the Underlying Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Underlying Fund. The Sub-Fund invested 42.6% in sustainable investments.

The remaining 0.03% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Utilities	Utilities	49.71%
Industrials	Transportation	27.45%
Energy	Energy	14.37%
Real Estate	Equity Real Estate Investment	4.25%
Communication Services	Telecommunication Services	2.23%
Information Technology	Technology Hardware & Equipmen	0.24%
Communication Services	Media & Entertainment	0.13%
Financials	Private Equity	0.03%
Real Estate	REITs	0.02%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

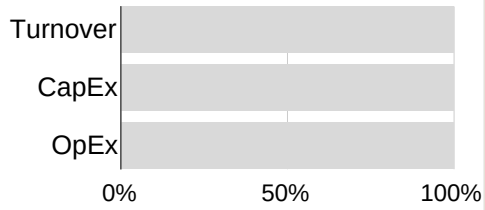
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?

Yes:



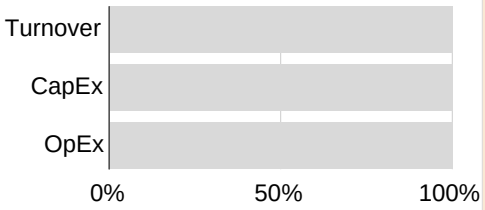
In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 42.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 42.6% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.03% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Benchmark of the Underlying Fund is designed to vary exposure to companies to account for the risks and opportunities associated with the transition to a low carbon economy. The Benchmark, based on the methodology and assessment of the index provider, also applies a negative screen to the overall constituents of the investable universe, to exclude companies which:

• engage in the production of controversial weapons which are defined by the Benchmark provider as anti-personnel mines, cluster munitions, and chemical and biological weapons;
• engage in the production of tobacco and/or tobacco products;
• generate 50% or more of their total revenue from the extraction of thermal coal; or
• are considered by the Benchmark provider to be in violation of one or more of the UNGC principles (including companies breaching the OECD Guidelines for Multinational Enterprises).

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at https://www.lseg.com/en/ftse-russell/indices/tpi-climate-transition.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Underlying Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

How did this financial product perform compared with the reference benchmark?

Please see below. The table represents the Underlying Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

How did this financial product perform compared with the broad market index?

Please see below. The table represents the Underlying Fund and Reference Benchmark (FTSE Global Core Infrastructure TPI Climate Transition Index) without the exclusions applied as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	4.37%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian Global Equity III

Legal entity identifier:
254900JK1SM02NDZK455

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No

☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.5% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristic of an improved carbon profile are achieved by managing the portfolio such that:

(a)the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Benchmark ("MSCI World") as at 31 December 2020 (the "Base Date"); and
(b)the maximum allowable Carbon Intensity of the Sub-Fund will reduce by 7%, in absolute terms, on a year-on-year basis versus the Base Date, in line with the glidepath.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. Note that emissions are measured in CO2e (Carbon Dioxide Equivalent). This is a measure that apportions greenhouse gases into a common unit, allowing different bundles of greenhouse gases to be compared. CO2e maps different greenhouse gas emissions to the equivalent of CO2 "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model. The Sub-Investment Manager sources the emissions data from MSCI. Missing carbon emissions and intensity data are imputed by the Sub-Investment Manager via a proprietary process.

The Sub-Fund avoids harm to environmental and social factors by excluding companies that:
- derive more than 5% of revenue from thermal coal extraction
- are deemed climate transition laggards. The Sub-Investment Manager employs a two-step process to

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

classify a company as a climate transition laggard. Any companies that derive: >10% revenue from the extraction and production of oil and gas (as identified via third party data); or >10%revenue from power generation associated with fossil fuels (liquid fuel and natural gas) as identified via third party data; are identified in the first step. In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. The Sub-Investment Manager's classification model uses proprietary techniques and third party data.

- are involved in the manufacture and/or production of tobacco products or controversial weapons
- are perceived to violate the UN Global Compact ("UNGC") principles
- are perceived to violate the Organisation for Economic Co-operation and Development ("OECD") guidelines for Multinational Enterprises,
- are included on the DNB exclusions list, which cover norm based exclusions and exclusions on oils sands, pornography, tobacco and cannabis. DNB's Exclusion List Methodology can be found in DNB's Group Instructions for Responsible Investment at https://www.dnb.no/en/about-us/sustainability/sustainable-finance/responsible investments The list of excluded companies can be found at https://dnbam.com/en/sustainability/exclusions

The Sub-Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:
(a) the weight of sustainable investments in the Sub-Fund will be at least 1.1 times the weight of sustainable investments in Parent Benchmark; and
(b) the weight of sustainable investments in the Sub-Fund on an absolute basis will be at least 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by assessing that:

- The Sub-Fund maintains its Carbon Intensity targets relative to the Benchmark.
- The Sub-Fund has no exposures to companies excluded based on the environmental and social screens described above.
- The Sub-Fund achieves its minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2026 and the WACI of the Index as at the base date (31 December 2020) is set out below. Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above. The Sub-Funds sustainable investment levels and that of the index are shown below as of the reporting date, there is no quarterly average as the inception of the fund was during the reporting period.

	Acadian Global Equity III	MSCI World Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	37.5	138.7
Level of Sustainable Investments	59.5%	52.9%

…and compared to previous periods?

Not applicable. This is the first reporting period for this Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	27691	tCO2	97
Scope 2 GHG emissions	5800.5	tCO2	97

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

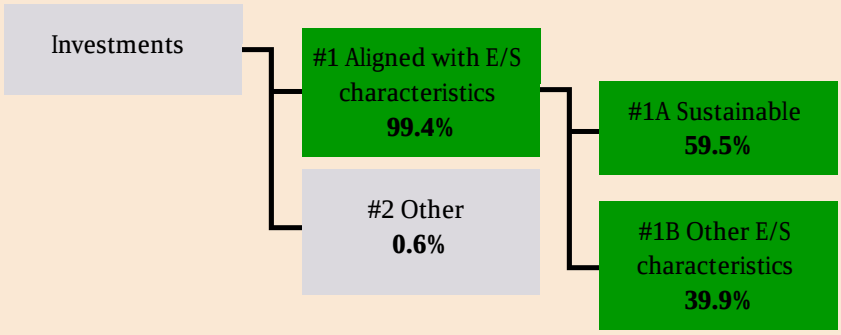
What was the proportion of sustainability-related investments?

Please see the information below in this respect.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.4% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 59.5% in sustainable investments.

The remaining 0.6% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table is as at the reporting date. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 59.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 59.5% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.6% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian Emerging Markets ex China Equity

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.7% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund consist of:

- targeting an improved carbon profile for the Sub-Fund by managing the portfolio with the deployment of a net zero decarbonisation glidepath by 2050 such that the Carbon Intensity of the Sub-Fund will be at least 10% lower than the Carbon Intensity of the Benchmark (MSCI Emerging Markets ex China 10/40 Index (USD)- Net Returns,) as at the Base Date (31 December 2020); and the maximum allowable Carbon Intensity of the Sub-Fund will reduce, in absolute terms, on a year-on-year basis versus the Base Date, in line with the glidepath.

  'Carbon Intensity' means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

- supporting the advancement of UNSDGs by investing at least 1.1 times above Benchmark weights in sustainable investments; and maintaining on an absolute basis at least 20% in sustainable investments

- The Sub-Fund excludes the following environmental exclusions (i) Companies that derive >5% revenue from thermal coal extraction as identified via third party data. (ii) Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive 10%revenue from the extraction and production of oil and gas (as identified via third party data); or 10%revenuefrompowergeneration associated with fossil fuels thermal coal, (liquid fuel and natural gas) as identified via third party data. Additionally, In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded, using a proprietary classification model.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- The Sub-Fund excludes the following social exclusions (i) tobacco producers; (ii) controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems)
- The Sub-Fund excludes the following norms based exclusions: (i) UNGC or OECD violators; (ii) ESG Rating Laggards (The Sub-Fund will also not invest more than the Benchmark (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved in one or more severe controversies as assessed via third party data) (iii) Norges Exclusions

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby measuring that:

- The Sub-Fund maintains its Carbon Intensity target relative to the Index as at the Base Date.
- The Sub-Fund maintains its progress towards its net zero Carbon Intensity target.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.
- The Sub-Fund maintains its minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2026 and the WACI of the Index as at the Base Date (31 December 2020) is set out below. Throughout the reporting period, the Sub-fund had no exposure to companies not meeting the exclusionary criteria described above. The Sub-Funds sustainable investment levels and that of the index are shown below as of the reporting date, there is no quarterly average as the inception of the fund was during the reporting period.

	Acadian Emerging Markets ex China Equity	MSCI Emerging Markets ex China10/40 Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	149.6	322.7
Level of Sustainable Investments	69.7%	62.7%

…and compared to previous periods?

Not applicable. This is the first reporting period for this Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund’s sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the 'do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	6058.2	tCO2	93
Scope 2 GHG emissions	2595.6	tCO2	93
Scope 3 GHG emissions	56145.5	tCO2	93
Total GHG emissions	64799.2	tCO2	93
Carbon footprint	843.8	tCO2 per M invested	93
GHG intensity of investee companies	1557.8	tCO2	93
Exposure to companies active in the fossil fuel sector	7.7	Percentage	94
Share of non-renewable energy consumption and production	85.2	Percentage	92
Energy consumption intensity per high impact climate sector	9	GwH per million EUR invested	33
Activities negatively affecting biodiversity-sensitive areas	5.3	Percentage	86
Emissions to water	0	Tonnes per million EUR invested	90
Hazardous waste and radioactive waste ratio	43.5	Tonnes per million EUR invested	90
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.4	Percentage	93
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1.6	Percentage	93
Unadjusted gender pay gap	13.1	Percentage	83
Board gender diversity	20.9	Percentage	93
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	93
GHG intensity of investee countries	0	tCO2	
Investee countries subject to social violations (absolute)	0	Percentage	
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	73	Percentage	93
Lack of a human rights policy	5.4	Percentage	93
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

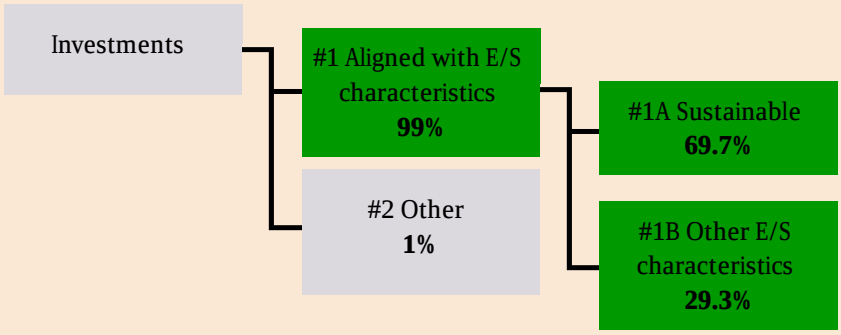
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 69.7% in sustainable investments.

The remaining 1% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table is as at the reporting date. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	26.54%
Information Technology	Technology Hardware & Equipmen	20.15%
Financials	Banks	16.31%

Financials	Private Equity	0.03%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

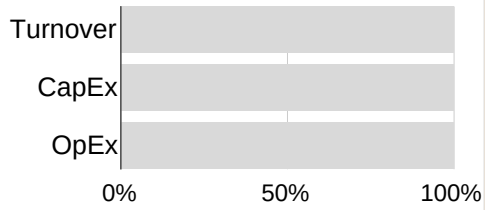
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



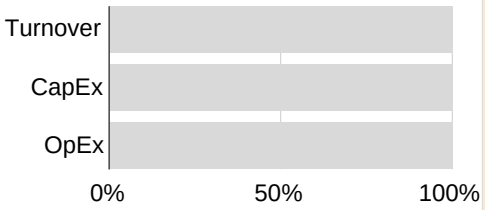
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

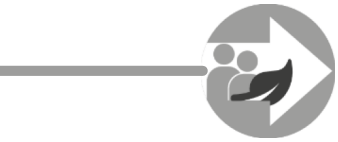
are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 69.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 69.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.



What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 1% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian Global Equity Ethical Values

Legal entity identifier:
254900F6W0QQNYEHL588

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** __%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.2% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** __%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristic of an improved carbon profile are achieved by managing the portfolio such that:

(a)the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Parent Benchmark ("MSCI World") as at 31 December 2020 (the "Base Date"); and
(b)the maximum allowable Carbon Intensity of the Sub-Fund will reduce by 7%, in absolute terms, on a year-on-year basis versus the Base Date, in line with the glidepath.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy. Note that emissions are measured in CO2e (Carbon Dioxide Equivalent). This is a measure that apportions greenhouse gases into a common unit, allowing different bundles of greenhouse gases to be compared. CO2e maps different greenhouse gas emissions to the equivalent of CO2 "Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model. The Sub-Investment Manager sources the emissions data from MSCI. Missing carbon emissions and intensity data are imputed by the Sub-Investment Manager via a proprietary process.

The Sub-Fund applies the following exclusions in order to avoid harm to environmental and social factors:

The following environmental product-based exclusions are applied:

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

- PAB exclusion criteria referred to in the EU Paris-aligned Benchmark (PAB) exclusions (Article 12(1)(a) to (g) of CDR (EU) 2020/1818).
- Companies with evidence of owning fossil fuel reserves, as identified via third party data, and via a proprietary process in instances where the third-party data has no coverage
- Companies with >1% revenue derived from conventional weapons production
- Companies with any identifiable revenue derived from production and/or manufacture and/or retail of civilian firearms, including ammunition
- Companies with ≥3% revenue derived from adult entertainment production and/or distribution
- Companies with ≥10% revenue derived from alcohol production and/or manufacture
- Companies with ≥10% revenue derived from gambling related business activities
- Companies with any identifiable revenue derived from contraceptive manufacturing or licensing
- Companies with any identifiable revenue derived from abortifacients manufacturing
- Companies identified as conducting stem cell research on human embryos
- The Sub-Fund will also not invest more than the Parent Benchmark (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved in one or more severe controversies as assessed via third party data

- Companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct-based exclusions. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management www.nbim.no

The Sub-Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:
(a) the weight of sustainable investments in the Sub-Fund will be at least 1.1 times the weight of sustainable investments in Parent Benchmark; and
(b) the weight of sustainable investments in the Sub-Fund on an absolute basis will be at least 20%.

The Investment Manager measuredtheattainment of theenvironmental andsocial characteristicsby assessing that:
- The Sub-Fund maintains its Carbon Intensity targets relative to the Parent Benchmark.
- The Sub-Fund has no exposures to companies excluded based on the environmental and social screens described above.
- The Sub-Fund achieves its minimum commitment to sustainable investments.

Please refer to the section below, “How did the sustainability indicators perform?”, which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2026 and the WACI of the Parent Index as at the base date (31 December 2020) is set out below. Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above. The Sub-Funds sustainable investment levels and that of the index are shown below as of the reporting date, there is no quarterly average as the inception of the fund was during the reporting period.

	Acadian Global Equity Ethical Values	MSCI World Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	28.9	138.7
Level of Sustainable Investments	58.2%	52.9%

…and compared to previous periods?

Not applicable. This is the first reporting period for this Sub-Fund.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.
Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.
The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	588.3	tCO2	95
Scope 2 GHG emissions	334.5	tCO2	95
Scope 3 GHG emissions	9142	tCO2	95
Total GHG emissions	10064.8	tCO2	95
Carbon footprint	179.1	tCO2 per M invested	95
GHG intensity of investee companies	472.3	tCO2	95
Exposure to companies active in the fossil fuel sector	3.6	Percentage	96
Share of non-renewable energy consumption and production	56.8	Percentage	96
Energy consumption intensity per high impact climate sector	16.3	GwH per million EUR invested	13
Activities negatively affecting biodiversity-sensitive areas	3.3	Percentage	93
Emissions to water	0	Tonnes per million EUR invested	95
Hazardous waste and radioactive waste ratio	22.9	Tonnes per million EUR invested	95
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	96
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.2	Percentage	96
Unadjusted gender pay gap	14	Percentage	94
Board gender diversity	35.6	Percentage	96
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	96
GHG intensity of investee countries	0	tCO2	
Investee countries subject to social violations (absolute)	0	Percentage	
Investee countries subject to social violations (relative)	0	Percentage	0
Investments in companies without carbon emission reduction initiatives	37	Percentage	96
Lack of a human rights policy	8.3	Percentage	96
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

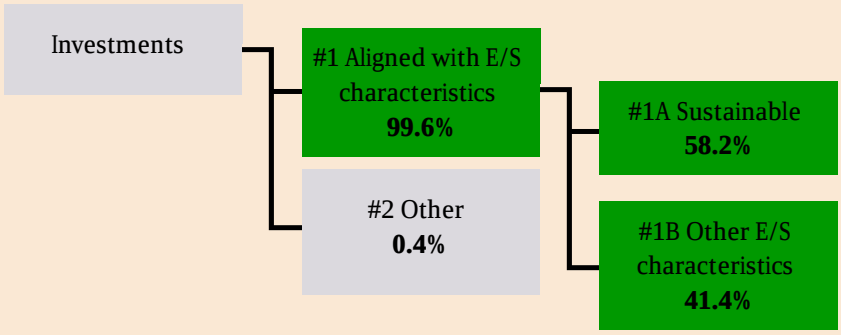
Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?



Please see the information below in this respect.

What was the asset allocation?

99.6% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 58.2% in sustainable investments.

The remaining 0.4% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table is as at the reporting date. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	19.82%
Information Technology	Technology Hardware & Equipmen	15.68%
Financials	Banks	11.14%
Health Care	Health Care Equipment & Servic	7.91%
Consumer Discretionary	Consumer Discretionary Distrib	7.52%
Information Technology	Software & Services	7.04%
Health Care	Pharmaceuticals Biotechnology	5.64%
Communication Services	Media & Entertainment	5.40%
Industrials	Capital Goods	4.97%
Consumer Discretionary	Consumer Services	4.68%
Consumer Staples	Consumer Staples Distribution	2.91%
Energy	Energy	2.45%
Materials	Materials	1.49%
Real Estate	Equity Real Estate Investment	0.70%
Consumer Staples	Food Beverage & Tobacco	0.62%
Financials	Financial Services	0.57%

Financials	Insurance	0.20%
Consumer Discretionary	Consumer Durables & Apparel	0.11%
Real Estate	Real Estate Management & Devel	0.06%
Consumer Discretionary	Automobiles & Components	0.05%
Real Estate	Funds	0.04%
Consumer Staples	Household & Personal Products	0.02%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

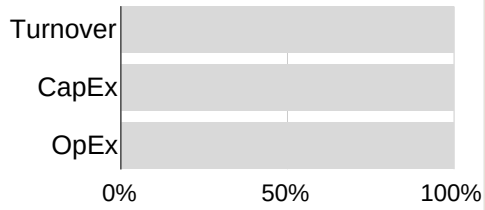
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[(1)]?



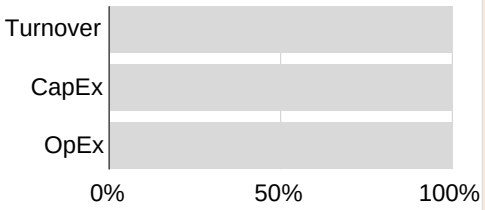
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

**** For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.***

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

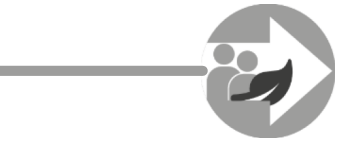
are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 58.2% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 58.2% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.



What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.4% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour —Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

How did this financial product perform compared to the reference benchmark?

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

PAIs for this Sub-Fund are reviewed at quarterly Investment Risk Management Committee meetings, taking into account data coverage and relevance. The Investment Manager has not, based on its monitoring in the period, set any specific targets on these metrics having regard to the nature and profile of the portfolios. As such, the Investment Manager over the period has no additional actions to report in relation to mitigating these PAIs at present for this Sub-Fund. PAI trends continue to be monitored, as applicable to the portfolio, for adverse developments. Should a PAI present or begin trending adversely such that it is then considered outside of its expected range, the Investment Manager will investigate and may action a mitigation plan if appropriate. This may also involve liaising with the relevant Sub-Investment Manager(s) where it is determined that there are practical actions to be taken in the investment process, including informing engagement priorities and strategies where this is considered an effective mitigating action.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period. If there are no corporate assets in the Sub-Fund or there is no data available for a particular metric of any of the corporate assets in the Sub-Fund, the metric may show as a blank.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	7096.51	tCO2	30

PAIs for this Sub-Fund are reviewed at quarterly Investment Risk Management Committee meetings, taking into account data coverage and relevance. The Investment Manager has not, based on its monitoring in the period, set any specific targets on these metrics having regard to the nature and profile of the portfolios. As such, the Investment Manager over the period has no additional actions to report in relation to mitigating these PAIs at present for this Sub-Fund. PAI trends continue to be monitored, as applicable to the portfolio, for adverse developments. Should a PAI present or begin trending adversely such that it is then considered outside of its expected range, the Investment Manager will investigate and may action a mitigation plan if appropriate. This may also involve liaising with the relevant Sub-Investment Manager(s) where it is determined that there are practical actions to be taken in the investment process, including informing engagement priorities and strategies where this is considered an effective mitigating action.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period. If there are no corporate assets in the Sub-Fund or there is no data available for a particular metric of any of the corporate assets in the Sub-Fund, the metric may show as a blank.

**Security in default.
***These are zero coupon securities.
****Citigroup also incorporates positions held with Citibank.

The following table outlines the investment types and geographic concentrations of financial assets at fair value through profit or loss at 30 June 2025 where the Sub-Fund is no longer invested in at 30 June 2026.

Financial assets at fair value through profit or loss	
Transferable securities	
Corporate bonds	
Chile	0.12%
Czech Republic	0.02%
Gibraltar	0.02%
Liberia	0.07%
Panama	0.41%
Singapore	0.00%
Supranational	2.74%
Financial derivative instruments	
Warrants	
Luxembourg	0.00%

Total assets comprised as follows.

	% of Total assets
Transferable securities admitted to an official stock exchange listing;	37.46
Transferable securities dealt in on another regulated market;	52.17
Other transferable securities of the type referred to in Regulation 68 (1)(a), (b) and (c);	2.40
Loans;	1.62
Money market instruments;	0.39
Financial derivative instruments dealt in on a regulated market;	0.12
Over the Counter financial derivative instruments;	0.09
Other current assets	5.75
	100.00

Country classifications are based upon country of incorporation and/or country of domicile.

The following securities have been pledged by the Sub-Fund and are held by the counterparty as collateral in respect of financial derivative instruments.

Security	Counterparty	Par value	Market value US$
U.S. Treasury Notes 4.38% due 31/07/2026	JP Morgan Chase Bank	572,000	572,292
U.S. Treasury Notes 4.13% due 15/11/2027	Bank of America Merrill Lynch	1,162,000	1,161,660
	Goldman Sachs	40,000	39,988
	JP Morgan Chase Bank	929,000	928,728
			2,130,376

All options purchased and written are covered.

The following table outlines the investment types and geographic concentrations of financial assets at fair value through profit or loss at 30 June 2025 where the Sub-Fund is no longer invested in at 30 June 2026.

Financial assets at fair value through profit or loss	
Transferable securities	
Corporate bonds	
Finland	0.31%
New Zealand	0.13%
Panama	0.36%
Government bonds	
New Zealand	0.14%
Saudi Arabia	0.03%
Money market instruments	
United States of America	0.51%
Financial derivative instruments	
Total return swaps	0.04%

Total assets comprised as follows.

	% of Total assets
Transferable securities admitted to an official stock exchange listing;	75.75
Transferable securities dealt in on another regulated market;	13.98
Other transferable securities of the type referred to in Regulation 68 (1)(a), (b) and (c);	2.87
UCITS and AIFs;	1.95
Financial derivative instruments dealt in on a regulated market;	0.38
Over the Counter financial derivative instruments;	0.27
Other current assets	4.80
	100.00

Country classifications are based upon country of incorporation and/or country of domicile.

The following securities have been pledged by the Sub-Fund and are held by the counterparty as collateral in respect of financial derivative instruments.

Security	Counterparty	Par value	Market value US$
